BUSHBUCKRIDGE LOCAL MUNICIPALITY DRAFT INTEGRATED DEVELOPMENT PLANNING
2022/23

FOREWORD BY THE EXECUTIVE MAYOR

It is the greatest privilege to present our IDP for the 2022-2023 financial year. This strategic document outlines the direction of our municipality over the next 5 years and how it will meet the service delivery targets. We have noted the progress that has been made in the previous term and we thank the community of Bushbuckridge for giving us another mandate in the 2021 local government election to continue building a better life for our people. We have made progress since the previous local government election to change the lives of our people for the better. However, there are also many difficulties which we still confront and many tasks to complete.

In our 2022/2023 program of action, our municipality will continue to work hard to ensure that our municipal objectives are met and to meet its commitments to the people. We must work together to build our common dream.

On behalf of all councilors, I make a pledge that we will continue to work together to change Bushbuckridge Local Municipality into a municipality defined by a shared dream.

Our municipality is committed to work with everyone to implement programmes that would let the municipality move forward as quickly as possible.

Creation of jobs, and reducing poverty are the heart of the heart of these programmes. We need to succeed in solving all challenges which we are facing. in partnership to build our municipality's defined by common dream

BUSHBUCKRIDGE LOCAL MUNICIPALITY DRAFT INTEGRATED DEVELOPMENT PLANNING
2022/23

MUNICIPAL MANAGER'S IDP FOREWORD

The municipality hereby congratulates and welcomes all the newly elected Councilors that were successfully bestowed the responsibility to represent the people of Bushbuckridge in leading this municipality for the next 5 years in the local government elections that were held during the period of November 2021. Per the requirement of the Municipal Systems Act, Council upon its appointment during November 2021, considered and adopted the five-year Integrated Development plan (IDP) that was in place for the period 2021-2022. The incoming council found the 2021/22 IDP being implemented as much as it was approved by the previous council. The development of the draft IDP 2022/23 was already under way and thus the municipality took the new council through what

was already done during its induction.

The draft IDP was developed based on the directives or objectives that seeks to fulfill the mandate of local government as set out in the Constitution of the Republic. Service delivery through good governance remains the cornerstone with which this IDP is developed. The municipality held a strategic session where the performance of the last five years was presented and gaps that hindered service delivery were laid bare. New strategies were developed that are outcomes based of which that is the new direction that the municipality has taken, in that it needs to focus on the outcomes of the projects and programs that it implements and the impact that it has on the lives of the community of Bushbuckridge Local Municipality.

The municipality has ensured that it develops an Integrated Development Plan (IDP) document that is people focused. We have followed legislation that requires municipalities to establish appropriate mechanism, processes and procedures and organs of state, including traditional authorities and other role players to be identified and consulted on the drafting of the Integrated Development Plan.

The municipality will be embarking on community consultations on the draft IDP/Budget and tariffs, where the community and all stakeholders are expected to make inputs that will further enhance the planning of the municipality. In the past two years, it was hard to conduct consultations due to the COVID-19 pandemic that had engulfed the municipality, country, and the world. Recently the state of disaster was lifted by the president of the country, this does in no way mean that COVID-19 is no longer an issue. I urge everyone in the municipality to stick to the regulations that are still in place. This directly has an impact on the public consultations that will be held that 50% of people are allowed indoors and therefore I urge our community members to still utilize our social media and alternative platforms to make their inputs.

My sincere appreciation to Council, the administration, and all external stakeholders for your continued contribution in our planning process.

BUSHBUCKRIDGE LOCAL MUNICIPALITY DRAFT INTEGRATED DEVELOPMENT PLANNING 2022/23

CHAPTER 1: EXECUTIVE SUMMARY

1. Executive Summary

The Municipal Systems Act 2000 (Act No 32 of 2000) stipulates that each council must, within a prescribed period after the start of its elected term, adopt a single, inclusive, and strategic plan for the development of the municipality. Bushbuckridge Local Municipality (BLM) integrated development plan (IDP) is the primary strategic planning tool which guides and informs all planning, budgeting, management, and decision making for the municipality. The Municipality covers the largest population size of 548 760 persons as per 2016 Community survey, which is 34% of the total population of the Ehlanzeni District Municipality and 14% of the Provincial population. It is renowned for its agricultural and tourism attractions.

It was declared a presidential nodal point by the president of the republic in 2001, it is located in the north-eastern part of the Mpumalanga Province and is bounded by Kruger National Park in the east, City of Mbombela Local Municipality in the South and Thaba Chweu local Municipality and it covers approximately over 1 000, 000 ha, Kruger National Park forms part of the municipal land. The Municipality consists of 38 wards with 38 ward Councillors and 38 PR Councillors.

This document is the Integrated Development Plan (IDP) of the Bushbuckridge Local Municipality for the 2022/23 financial year. It provides basic key service delivery challenges in areas that have been prioritised for 2022/23 financial year and is reviewed annually. It is also based on the multi-year approach principle to enable Municipal Council to have a multi discipline budgetary process. The Municipality has several challenges which form part of the priorities in the medium-term and certainly the Long-Term Development Strategy. These are high poverty levels, Crime, Unemployment, Back log of service delivery, Skills shortage, High illiteracy, rural nature, HIV/AIDS epidemic and more certainly the lack of adequate access to basic services.

Poverty and unemployment are core development challenges in Bushbuckridge Local Municipality, most people in the municipal area of jurisdiction are unemployed and this poses a big challenge for the municipal economic development. The Municipality has adopted a holistic approach in addressing the inter-related socio-economic factors that can contribute to the quality of life for all the people living in the Bushbuckridge Local Municipality.

1.1. Legislations Framework

Constitution of South Africa

The Constitution of the Republic of South Africa (Act 108 of 1996) is the supreme law of the country and fundamentally aims to protect human rights and promote democratic governance. The Constitution therefore provides for a new approach to government on national, provincial, and local government levels. The new Constitutional model redefines the relationships between the three spheres of government, by replacing the system of a vertical hierarchy of ties, with three overlapping planning process and sets of plans each relating to a different sphere of government. The focus of cooperative governance is however to ensure that scarce resources are used for maximum impact. The constitution of the republic of South Africa dictates that local government must:

- Provide democratic and accountable government to all communities.
- Ensure the provision of services to communities in a sustainable manner.
- Promote social and economic development.
- Promote a safe and healthy environment; and
- Encourage the involvement of communities in the matters of local government

Municipal Systems Act

In terms of the Local Government: Municipal Systems Act (2000) requires that Municipalities draw up an integrated Development Plan (IDP) - a Strategic Plan, which all Developments in a municipal area are based upon. The IDP is the principal planning instrument that guides and informs the municipal budget. It is a plan that not only concentrates on other provisions of municipal services, but also seeks to alleviate poverty, boost Local Economic Development, eradicate unemployment, and promote the process of reconstruction and development.

BUSHBUCKRIDGE LOCAL MUNICIPALITY DRAFT INTEGRATED DEVELOPMENT PLANNING
2022/23

Chapter four (4), section 26 of the Act indicates the core components of an IDP and that such an IDP must reflect the following:

- The municipal council's vision for the long-term development of the municipality with special emphasis on the municipality's most critical development and internal transformation needs.
- An assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services.
- The council's development priorities and objectives for its elected term, including its local economic development and internal transformation needs.
- The council's development strategies which must be aligned with any national and provincial sectoral plans and planning requirements that are binding on the municipality in terms of legislation.
- A Spatial development framework which must include the provision of basic guidelines for a land use management system for the municipality.
- The council's operational strategies.
- Applicable disaster management plans.
- The key performance indicators and performance targets determined in terms of section 41 of the MSA.

Municipal Finance Management Act

In addition to compiling an IDP, it is also a legislative requirement, in terms of the municipal Systems Act and the municipal Finance Management Act (2003) that the municipality's I.D.P be reviewed on an annual basis. The aim of the review is to ensure that the municipal planning considers changing circumstances.

1.2. National and Provincial Alignment

Table 1: Alignment

National Development Plan	State of the Nation Address	State of the Province Address	Medium Term Strategic Framework MTSF (2019-2024) Priorities	Back to Basics (KFAs)	Municipal Strategy

National Development Plan (VISION 2030)

It was soon after the promulgation of the Outcomes Based Planning Approach, the State President restructured his cabinet to conform to the set standards. A Planning Commission which reports directly to the Presidency was one of the structures that were established. Its terms of reference were to give planning support and guidelines to all government institutions. The Commission embarked on a diagnostic process to establish the planning data and realities on the ground. About eight issues all revolving around poverty and inequality were raised during this stage and they are: Poor education, High Disease rate, Exclusive Planning, corruption, Aging infrastructure, Poor job opportunities, Resource intensive economy, Public Services uneven and divided communities.

In a means to address these challenges, the Commission drew up a plan called the 2030 Plan for South Africa which is looking at a total attainment of a prosperous and equity state by the year 2030. This plan proposes several issues that need to be considered when doing our planning if we are indeed to realize the 2030 vision. These areas were all given an honest consideration during the developmental stages of our IDP to ensure proper alignment. These planning considerations are as follows:

- Creation of Jobs
- Expanding Infrastructure
- Transition to a low-carbon economy
- Transformation of urban and rural spaces
- Education and Training
- Provision of quality Health Care
- Building a capable State
- Fighting corruption
- Transformation and Unity

Implementation phases of the NDP

The NDP highlights the need to strengthen the ability of local government to fulfil its developmental role, by focusing attention on critical priorities in the NDP that relate to the mandate of local government, such as spatial planning, infrastructure, and basic services.

The NDP seeks to address the following development challenges:

- Poverty and unemployment
- Poor quality of education
- Inadequate and poor infrastructure
- Spatial divide
- Unsustainable and stagnant economy
- Poor public health system
- Poor public services
- High levels of corruption
- South Africa remains a divided society

The National Spatial Development Perspective (NSDP) Guidelines

The ultimate vision of the NSDP in relation to the Municipal spatial development plan will be to: -

- Focus Economic Growth and Employment creation in areas where it will be most effective and sustainable through proper Land Use Management systems. (LUMS)
- Support restructuring and or rezoning of areas that have greater potential to encourage industrial advantage for sustainable living and will assist in facilitating economic growth within the Municipality.
- Foster development for the basis of Local Economic Development potential.
- Ensure that all municipalities are able to provide for basic needs.

National Spatial Development Perspective (NSDP) is a tool for policy co-ordination regarding the spatial implications of infrastructure programs in National, Provincial, and local government. The aim of the NSDP in South Africa is to reconfigure apartheid spatial relations and to implement spatial priorities that meet the constitutional imperative providing basic services to all alleviating poverty and inequality. It also examines the spatial dimension of social exclusion and inequality recognizing the burden that unequal and inefficient spatial arrangements plan on communities.

Medium Term Strategic Framework (MTSF) 2019-2024

This Medium-Term Strategic Framework (MTSF) is Government's strategic plan for the 2019-2024 electoral term. It reflects the commitments made in the election manifesto of the governing party, including the commitment to implement the NDP. The MTSF sets out the actions Government will take and targets to be achieved. The MTSF 2019-2024 supports the objective of the NDP 2030 to address the triple challenges of unemployment, inequality, and poverty. These are central to transformation that underpins our national development agenda

The Seven Priorities that form part of the MTSF 2019-24 which the IDP is aligned with:

- **Priority 1:** A Capable, Ethical and Developmental State
- **Priority 2:** Economic Transformation and Job Creation
- **Priority 3:** Education, Skills, and Health
- **Priority 4:** Consolidating the Social Wage through Reliable and Quality Basic Services
- **Priority 5:** Spatial Integration, Human Settlements and Local Government
- **Priority 6:** Social Cohesion and Safe Communities
- **Priority 7:** A better Africa and World

Spatial Land Use Management Act (SPLUMA)

SPLUMA provides a framework for spatial planning and land use management in South Africa. SPLUMA:

- Specifies the relationship between the spatial planning and the land use management system and other kinds of planning.
- Ensures that the system of spatial planning and land use management promoted social and economic inclusion.
- Provides for development principles and norms and standards.
- Provides for the sustainable and efficient use of land.
- Provides for cooperative government and intergovernmental relations amongst the national, provincial, and local spheres of government; and
- Redresses the imbalance of the past and to ensure that there is equity in the application of spatial development planning and land use management systems.

SPLUMA applies to the whole of South Africa (urban and rural areas) and governs informal and traditional land use development processes. **See Chapter 6 on Spatial Rationale**

IDP ALIGNMENT TO DISTRICT DEVELOPMENT MODEL (DDM)

In 2019, the Cabinet of the South Africa Government approved the District Development Model (DDM) as a government approach to improve integrated planning and service delivery across the three spheres of government with district and metro spaces as focal points of government and private sector investment. DDM introduces a new planning instrument in the form of the One Plan. It is expected to strengthen and enhances the IDPs and other plans of municipalities and provide greater certainty and direction for the IDPs. The DDM is an operational model for improving Cooperative Governance at a District/Metropolitan level aimed at building a capable, ethical, sustainable, and developmental state, including improving and enhancing the state of local government. The Model gives provision for One Plan which is an intergovernmental plan setting out a 25-30 years' long-term strategic framework (consisting of short, medium, and long-term intergovernmental actions) to guide the implementation of investment- and delivery-plans in relation to each of the 52 district and metropolitan spaces. The primary objective of the DDM is to ensure government works together and improves communication in the District/Metropolitan areas to synchronize the programmes and projects of different organs of state through the development of One Plan. DDM also ensure inclusivity and amore participatory approach in governance, including oversight over budgets and projects in an accountable and transparent manner. Section 6 of the Revised IDP Guidelines, 2020, DDM is anchored

1.3. Provincial Strategies

Mpumalanga Economic Growth and Development Plan (MEGDP)

Mpumalanga Vision 2030 provides a provincial expression of the key priorities, objectives and targets enumerated in the NDP and expressed within the manifesto. It is a focused and strategic implementation framework that provides a direct implementation response to the National Development Plan. The framework describes the province's approach to realizing the objectives of the NDP in the provincial context. It builds on and informs past & existing sectoral and related planning interventions in Mpumalanga

Strategic overview (MEGDP)

- Set high level provincial targets
- Facilitate decision making and prioritisation
- Inform choices and trade offs
- Locate strategies, programmes, and projects within a focused spatial representation of the content and intention.
- Mpumalanga Vision 2030 includes key targets for the province that are in line with those expressed in the NDP.
- These targets have been developed with due consideration given to the specific demographic, institutional, spatial and socio-economic advantages and challenges of the province.

1.4. Powers and Functions of the Municipality

The Municipal systems act 32 of 2000 (chapter 3 sub-section 3) requires that the Municipality must exercise its legislative or executive authority by performing the following powers and functions assigned to it in terms of the Constitution.

- Developing and adopting policies, plans, strategies, and programmes, including setting targets for delivery.
- Promoting and undertaking development.
- Establishing and maintaining an administration.
- Administering and regulating its internal affairs and the local government affairs of the local community.
- Implementing applicable national and provincial legislation and its by-laws.
- Providing Municipal services to the local community or appointing appropriate service providers in accordance with the criteria and process set out in section 78.
- Monitoring and where those services are provided by service providers other than the municipality.
- Preparing, approving and implementing its budgets.
- Imposing and recovering rates, taxes, levies, duties, service fees and charges on fees, including setting and implementing tariffs, rates and tax and debt collection policies.
- Monitoring the impact and effectiveness of any services, policies, programs, or plans.
- Establishing and implementing performance management systems.
- Promoting a safe and healthy environment.
- Passing by-laws and taking decisions on any of the above-mentioned matters.
- Doing anything else within its legislative and executive competence.

CHAPTER 2: IDP PLANNING PROCESS

2. Preparation Process

District Framework:

The process plan for the Bushbuckridge Local Municipality is guided by the Ehlanzeni District IDP Framework as adopted by Ehlanzeni District Municipality during a council meeting held in August 2021; the IDP process plan for Bushbuckridge Local Municipality for 2022/23 financial year was also approved and adopted by Municipal Council on the 27 August 2021 with Council resolution: **BLM34/27/08/21/2021/2022**

2.1. Bushbuckridge Local Municipality's Process Plan

The following process plan was followed during the development of the Municipal IDP for 2022/23 financial year:

Preparation phase

Bushbuckridge Local Municipality developed a process plan for the development of the IDP for 2022/23. The process plan was circulated internally to directorates for comments and inputs before it was adopted by Council. The Municipality advertised the public meetings as per the MSA no. 32 of 2000. Ward councillors were requested to inform all the stake holders in their wards. Traditional leaders, community members, NGOs, Parastatals, and Sector Departments were invited to attend the public meetings.

Analysis Phase

The municipality conducted extensive Community Based Planning and GIS mapping. The public participation meetings that were held on the following:

Table 2: Dates for Capacitation of ward Committees, CDW, Councilors and communities

Schedule For IDP Community Gap Analysis Date	Ward Numbers	Venue	Time
05/10/2021	01, 03, 23, 24, 25, 26, 27, & 35	Oakley community hall	09:00
06/10/2021	02, 04, 05, & 06	Marite community hall	09:00
07/10/2021	30, 32, 33, 34 & 38	Ludlow community hall	09:00
08/10/2021	14, 15, 16, 17, 18, 19, 20 & 21	Cottendale Nazarene church	09:00
12/10/2021	07, 08, 09, 10, 11, 12 & 13	Maviljan Hall	09:00
13/10/2021	22, 28, 29, 31, 36, & 37	Thulamahashe civic Centre	09:00

The process was inclusive of major stakeholders in the municipal area. Ehlanzeni District Municipality officials attended certain sessions or public participations. During this phase, the aim was to get an understanding of the existing circumstances within the municipality (situational analysis). Ward Councillors, ward committees and CDWs were requested to review their Community Based Planning documents in consultation with the community.

Community Based Planning and Priority Issues

The following table outlines and summaries the challenges and service delivery priorities per ward:

Table2: CBP

PRIORITY ISSUE(S)	NEEDS	WARD(S)
1. Water	<ul style="list-style-type: none"> • Insufficient water • Insufficient Bulk water supply • Water Reticulation • Insufficient Reservoirs 	All Wards 1-38
2. Sanitation	<ul style="list-style-type: none"> • Insufficient sanitation • Lack of bulk sewerage infrastructure • VIP Toilets 	All Wards 1-38
3. Roads / Streets and bridges	<ul style="list-style-type: none"> • Opening of streets • Rehabilitation streets • Re-gravelling and grading. • Tarring of roads. 	All Wards 1-38
4. Human Settlement	<ul style="list-style-type: none"> • Provision of land for housing development • Provision of houses • Rental stock Houses 	All Wards 1-38
5. Education	<ul style="list-style-type: none"> • Provision of Schools. • Renovating schools. • Replacement of mud Schools. 	01,2,6,11,12,13,14,15,19,24,25,27,30,31,32,35,36,37 & 38
6. Health	<ul style="list-style-type: none"> • Provision of Clinics. • Provision of Health Centers. • Provision of Mobile Clinics 	1,2,4,6,11,12,13,14,15,18,19,24,25,27,29,30,31,35,36,37.
7. Energy	<ul style="list-style-type: none"> • Insufficient electrification • Extensions • Power Failure • High mast lights 	1,2,4,6,11,12,13,15,18,19,20,24,25,27,30,32,35,36,37.

Strategy Phase

A strategic session was held on the 15 – 18 February 2022 at Protea Kruger gate, it comprised of the Executive Mayor, Council Speaker, Chief Whip, All MMCs, chairpersons of service and MPAC, Municipal Manager, Directors, Managers and officials. All directorates came up with Strategies on how to address all the needs of the Communities, by prioritising them and came up with projects. The Municipal SWOT analysis was reviewed to project the status quo of the municipality. Strategic resolutions were the ultimate outcomes where each directorate is expected to implement within a specified time frame.

Project Phase

The IDP/Budget technical committee chaired by the Municipal Manager, inclusive of all directors and managers, met several meetings to deal with the projects and all matters related to the development of the IDP. The technical committee meets in the projects phase to consider project proposals that have been developed to undertake and integrate project planning process to ensure an effective and integrated link between project planning and delivery. The Directorates: technical services have been very critical in providing support to ensure proper, implementation and management for effective service delivery. This process assisted in coming up with multi-year projects and the new ones which must form part of the IDP. All the Technicians were requested cost the projects correctly to avoid the shortage of funds during the implementation. Most of the capital projects were prioritised and budgeted under the MIG grant.

Integration Phase

The BLM has integrated its capital projects as informed by the vision, objectives and strategies developed and resources available for the effective implementation of the project in the IDP. That has been seen as putting more emphasis on the implementation of the management strategic meeting resolutions. Meeting organised by COGTA and office of the premier with sector departments were held to deal with integration and alignment of all the spheres of government. All sector departments present their projects for the next financial year and municipalities have the opportunity to make inputs that inform the finalisation of the sector projects.

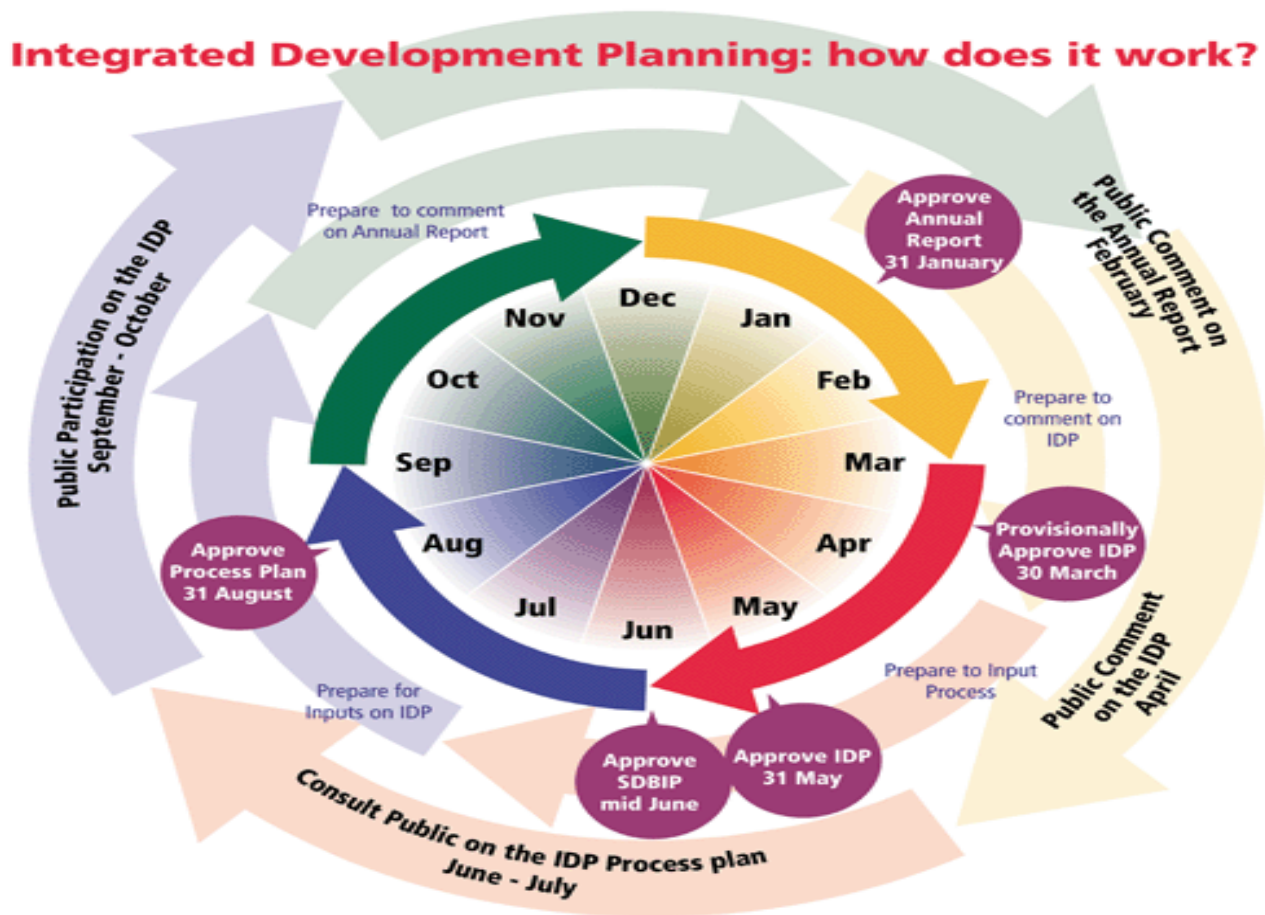

Approval Phase

The 2022/23 (Draft) IDP was tabled on the portfolio committee on the 17 March 2022, Mayoral committee on the 23 March 2022 and Council was adopted on the 30 March 2022 with council resolution **(BLM121/30/03/2021/2020/2021)**. After the adoption of the draft document, the municipality started with the advertising process of the public participation dates and the draft document. The document has been placed on the municipal website and in regional offices and libraries of the municipality. The municipality also held consultations with stakeholders and ward committees from the 19 to 22 April 2022 at OTJ guesthouse as due to COVID-19 the consultations could not be carried out like other years. Finally, the executive Mayor held consultations on radio Bushbuckridge and RFM on the 4 and 5 May 2020. The final IDP document will be approved at the end of **27 May 2021** with Council resolution number:

Evaluation and Feedback

This process is important as it assist with the strengthening of sustainable projects implemented through the IDP. It is proper to evaluate lessons and challenges to improve on the practice.

The below diagram clearly indicates the process plan from the planning stage to the approval and how the evaluation and the feedback on the IDP will be done.

Principles informing the compilation of the IDP requirements of chapter 5 of the Systems Act which requires:

- The IDP be compiled, adopted and implemented
- The municipality monitors and reviews the implementation of the IDP
- The IDP reviewed and adopted annually to the extent that changing circumstances so demand
- The IDP must be aligned with plans of other spheres of Government; and
- The IDP must reflect priority development needs of communities
- The IDP must align with the Municipal budget and SDBIPs.

2.2. IDP Consultative structures

Municipal Council

Council is the authority on all aspects of the IDP process. The reviewal process which is guided by the IDP Process Plan is approved before the reviewal starts. After approval by Council, the IDP is submitted to the MEC of Local Government for comments and the provincial treasury. A copy will also be submitted to the Ehlanzeni District Municipality for information and alignment.

IDP Representative Forum

The forum consists of different stakeholders, interest groups and Councilors. The chairperson of the forum is the mayor. It considers the development priorities, objectives, strategies, projects and the entire plan. Issues are debated and agreed upon for final approval by the Council of Bushbuckridge Local Municipality. The municipal Rep forum was held on the **02 April 2022**. The municipality has uses the Ehlanzeni district municipality's IDP Rep forums as part of the reviewal cycle. The following are categories of members of the IDP Representative Forum:

- Mayor (Chairperson)
- Speaker
- All Ward Councilors
- PR Councilors
- Municipal Manager
- IDP Steering Committee
- Community Stakeholders
- NGO's and Parastatals
- Traditional Leaders

IDP/Budget Steering Committee

The IDP Steering Committee consists of internal Directors, Managers and Head of sector Departments as well as representatives of the District Municipality. The chairperson of this committee is the Municipal Manager. He often delegates to the IDP Manager. The steering committee met on the 01 October 2019 to formulate and align the IDP with the budget and its process for further consideration to the IDP representative forum. The steering committee serves as an advisory committee to the IDP representative forum. It was also held on the 23 March 2022 to look into the draft IDP and budget

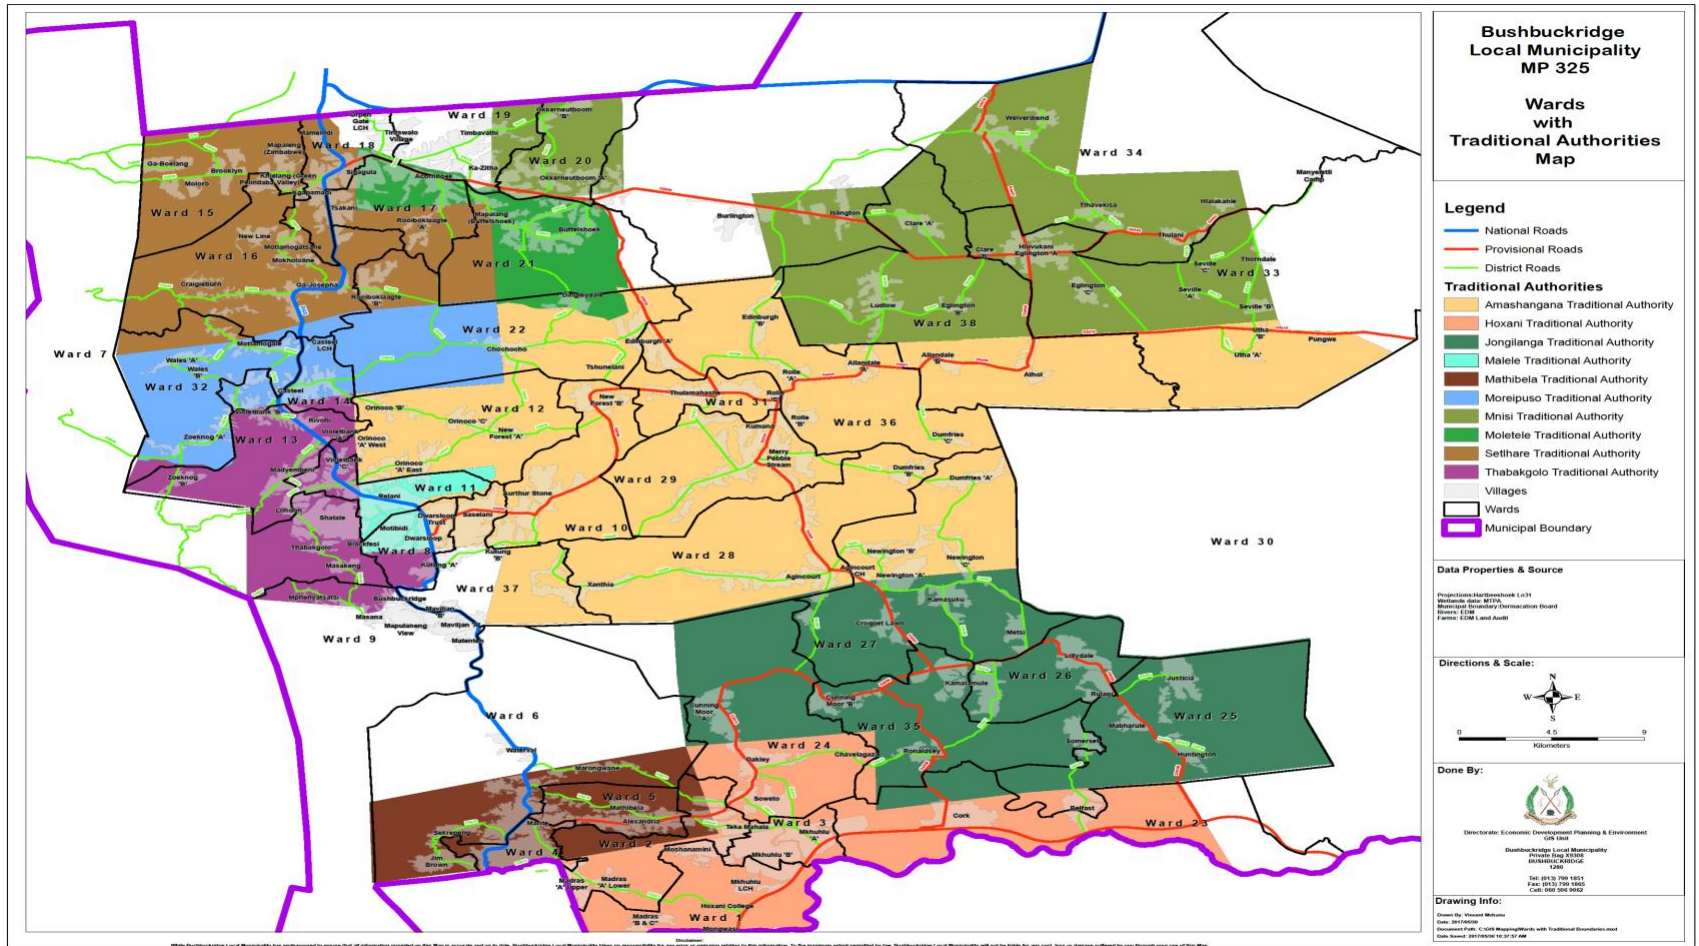

IDP Technical Committee

The Technical Committee consists of all the Directors, Regional Managers, Technicians, Town Planners, and all the Unit Managers. The Municipal Manager is the Chairperson of the Committee, he delegated the IDP Manager to chair the meetings if he is committed. The committee checks the projects, budget, and all the information if it properly captured. The committee met on the 01 September 2021 to deal with the analysis phase. The Committee also met on the 22 March 2022 to ensure that all projects in the IDP are correctly costed or priced to avoid shortfalls during the implementation of the IDP. The Committee was chaired by the IDP Manager delegated by the Municipal Manager and was attended by the Directorate: Municipal Works and Water Services, Technicians, Town Planners and officials from the IDP Unit.

Traditional Mayors Forum (Incorporation of Traditional authorities)

Bushbuckridge Local Municipality is having ten Traditional Authorities; through the Office of the Executive Mayor working relations have been developed with the Traditional Authorities in the form of Bohlabela House of Traditional Leaders housed within the offices of the Municipality. The Traditional mayors' forum was established through these relations. This structure meets to discuss issues of land matters, Local Economic Development, social issues, and Infrastructure Backlog. During the Council sitting on the 15 July 2010, Council has resolved with Council Resolution no. (BLM /01/15/07/2010/11), to formally accord the Traditional

Leaders to participate in all council sittings as major stakeholders with sitting allowances paid to Traditional Leaders. This will, however, strengthen the structures in the municipality and involvement of traditional leadership as partners on matters of development, especially with rural communities that live on tribal land. The municipality is conducting workshops to capacitate Traditional Authorities to tackle the issue of land invasion, land tenure upgrading and servicing of sites.

The municipality has 10 traditional Authorities which are: Amashangana, Hoxani, Jongilanga, Malele, Mathibela, Moreipuso, Mnisi, Moletele, Setlhare and Thabakgolo Traditional Authorities

CHAPTER 3: SITUATIONAL ANALYSIS

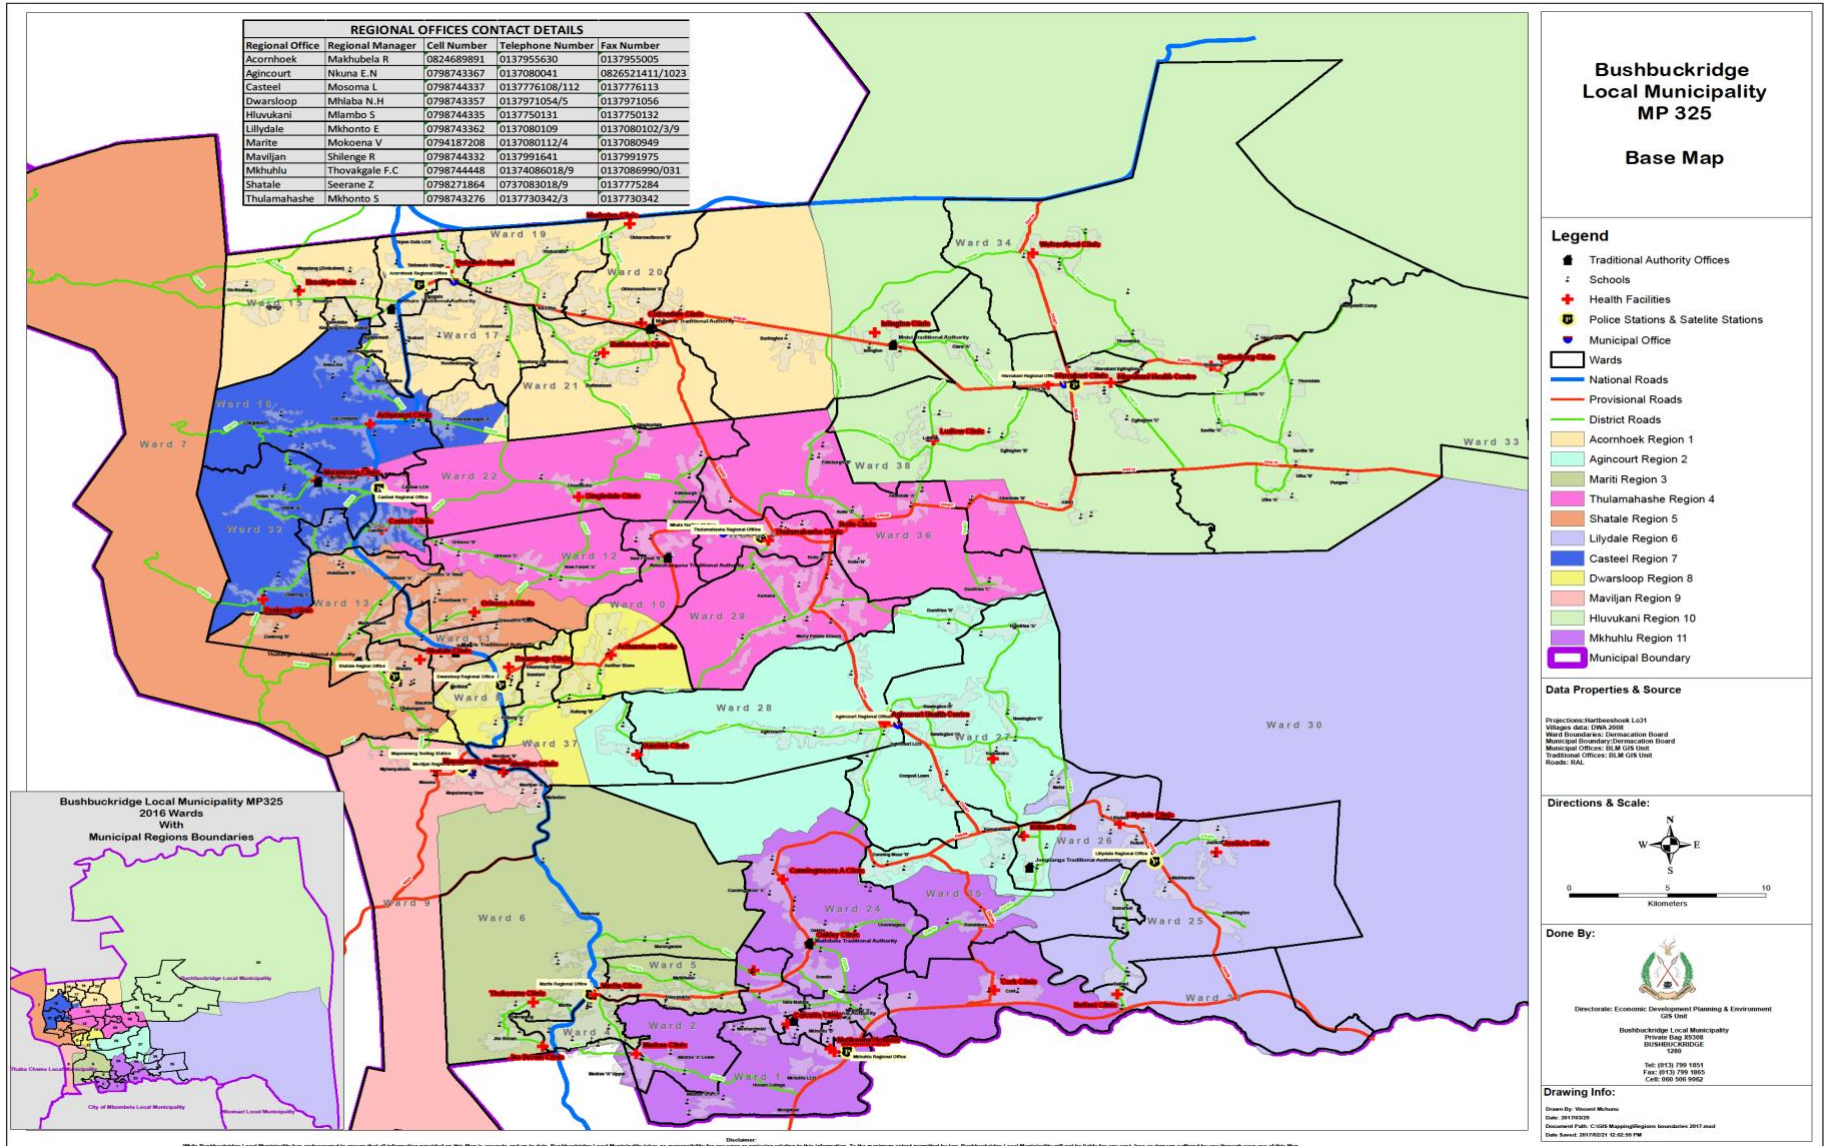

3.1. Location and Characteristics

Bushbuckridge Local Municipality is a category B municipality that forms part of the four Local Municipalities of the Ehlanzeni District Municipality family in the Mpumalanga Province. It is renowned for its agricultural and tourism attractions, and it was declared a nodal point by the then president of the republic in 2001, it is located in the north-eastern part of the Mpumalanga Province and is bounded by Mozambique in the east, city of Mbombela Local Municipality in the South and Thaba Chweu local municipality in the Southwest. A part of Kruger National Park (KNP) forms part of the municipality, its main camp which is the Skukuza camp forms part of the park that is in the municipality.

The Municipal area provides a link to economically viable centres in the Lowveld, particularly Hazyview, Hoedspruit, Pilgrim Rest and Graskop. The R40 national road passes through the municipality starting from Marite to Acornhoek. The Municipal area can therefore be called the gateway to the major tourism attraction points in Mpumalanga and the south-eastern part of the Limpopo Province. It is characterised by high unemployment rate, poverty, unregulated influx that of the Mozambicans, Zimbabweans, Somali, Ethiopian and other foreign nationals. The Municipality has in the past been able to address the issue of social cohesion in ensuring that the setup of placing people along tribal belonging does not exist. The municipality is currently characterised and dominated by Vatsonga, Mapulana tribe (dialect from Sepedi) and Swati speaking people as indigenous inhabitants.

The Municipality has several challenges which form part of the priorities in the interim and certainly the Long-Term Development Strategy. These are high poverty levels, Crime, Unemployment, back-log of service delivery, Skills shortage, High illiteracy, rural nature, HIV/AIDS epidemics and more certainly the lack of adequate access to basic services.

Bushbuckridge Local Municipality- FINAL Integrated Development Plan: IDP 2021-22

3.2. Demographics

The main purpose of this section is to provide a good understanding of the key social, economic, Physical and environmental features of the municipal area and their impact on spatial and sustainable development.

Population size, age and gender

Table: Population according to census 1996, 2001, 2011 and Community survey 2007 and 2017

Census 1996	548 511
Census 2001	500 128
Community Survey 2007	509 970
Census 2011	541 248
Community Survey 2017	548 760

Sources: Stats SA census 1996, 2001, 2011 and Community Survey 2007 and 2016

The population of Bushbuckridge Local municipality was 545 811 according to the Statistics South Africa 1996 Census, then the 2001 census shows that there was decrease to 500 128 in population. There was an increase in population in the 2011 census as the number rose to 541 248. Community surveys are conducted by STATS SA in between censuses, the first community survey was conducted in 2007 where it was found that we had 509 970 and in 2016 the latest one it shows that there are 548 760 people in the municipal area. Contributing factors might be the fertility & mortality rates, migration and influx to increase residential and business development in the municipality as a result of neighboring countries such as Mozambique and Zimbabwe.

Annual growth rate

Table 3: Annual growth rate

Annual Population Growth rate (%)	1996-2001	-0.87
	2001-2011	0.79
	2011 - 2016	0.3

Source: STATS SA census 1996, 2001, 2011 and CS 2016

Between 2011 & 2016, the population grew by only 7 512 and recorded a growth rate of 0.3% per annum – slightly lower than the average annual economic growth rate in the same period, which is positive.

Table4: Annual growth rate

Population		Average annual population growth	Projected number	Projected number by 2030	
2011 Census	2016 CS	2011-2016	2020	CSIR Green Book	2011-16 growth
541 248	548 760	0.3%	555 375	529 300	572 263

Source: Stats SA Census 2011, CS 2017 and 2020 MP SERO report

In Bushbuckridge Local Municipality the growth rate is at 0.3% when comparing the census and community survey years. It is estimated that in 2030 it is estimated that the population would have grown to 572 263 based on the annual growth rate of 0.3%

Figure 1: Age groups

Source: Stats SA CS 2016

The highest population in the Bushbuckridge Local Municipality is the children residents' aged **0 to 14** and below contributing to **218 954** residents, children from **15 to 34** age group of **188 500** equals, the adults from **35 to 65** are **102 465** and the elderly from **66 to 120** are **38 841**.

Sex ratio

Table 5: Sex ratio

Census year	%
1996	83
2001	81.94
2011	83.33

Source: Stats SA census 1996, 2001 and 2011

In sex ratio any number less than hundred (100) means that there are more females than males. In the municipality the population's sex ratio on the 1996 census it was on 83%, the over a five (5) year period to 2001 census it was on 81.94% which is a slight decrease. While between 2001 and 2011 the sex ratio is 83.33 annually over a ten (10) year period.

Population Groups

Table 6: Population groups

Ethnic group	Persons
Black African	547665
Coloured	681
Indian or Asian	162
White	252

Source: Stats SA CS 2016

The population of Bushbuckridge municipality is largely black Africans with 99.55% followed by whites on 0.19%. Coloured and Indian/Asian groups are at 0.10%.

Population composition

a. Population pyramid

Figure 2: Population Pyramid 2011 and 2001

Source: Stats SA Census 2011 and 2001

The population of Bushbuckridge municipality shows a typical age structure of a very young population distribution. There is strong evidence of declining fertility, which is observable from a steady decline in the population 10-14, 5-9 and 0-4. Also evident is that the population of the municipality is concentrated in younger age groups, with the groups 5-19 being the largest. The distribution is similar for both males and females, except observably larger female population at all age groups.

Percentage of disability
Table 7: Percentage of disability

Census	%
1996	5.17
2001	4.48
2011	2.87

Source: Stats SA census 1996, 2001 and 2011

In the municipality the number of people of disability has decreased since the first democratic census in 1996 it was on 5.17% compared to 2001 census when it was on 4.48% and 2011 it was on 2.87%. The municipality has built a center of disability in Marite with others planned to be implemented in the next coming financial years.

3.3. Socio-economic development

HDI (Human Development Index)

Table 8: Human development Index

HDI level		HDI level	
2011	2014	2015	2019
0.48	0.50	0.51	0.55

Source: Mpumalanga department of Finance 2016-socio economic profile

Bushbuckridge Local Municipality- FINAL Integrated Development Plan: IDP 2021-22

HDI is the statistical mark of the life expectancy, educational level, GDP per capita and various factors that decide the common lifestyle. In the socio-economic study conducted in 2020 by the Mpumalanga department of finance the Bushbuckridge Local municipality which indicated that in 2014 the HDI was on 0.50 in 2014 but decreased to 0.55 in 2019.

Gini-Coefficient

Table 9: Gini-Coefficient

INDICATORS	Trend		Latest figure	2016	2020
	2001	2007	2011		
Gini-coefficient (0 best to 1 worst)	0.65	0.62	0.58	0.58	0.58
Poverty rate	61.7%	51.3%	42.2%	45.40%	63.5%

Source: Mpumalanga Department of finance 2020- socio economic profile

This indicator measures inequality estimates ranges from 0 to 1 where 1 is an indication of total inequality and 0 is total equality. Gini-coefficient was at 0.58 in 2011 and it's improving & better than province and district. T

Poverty Rate

Table 10: Poverty rate

% below LBPL		% below LBPL		
2011	2014	2015	2019	2020
54.2%	57.3%	57.3%	61.1%	63.5%

Source: 2020 MP SERO Report

Poverty rate was at 57.3% 2014 then increased to 61.1% in 2017 which is an increase in poverty levels which is a result of government being the main employer in the municipality which will be unsustainable in the long run. The poverty rate has increased to 63.5% in 2020

Unemployment rate

Table 11: Unemployment rate

Unemployment rate		Trend	Unemployment rate		
2011	2014	2011-2014	2015	2019	2020
50.5%	48.9%		48.0%	53.9%	53.2%

Source: Stats SA census 2011, 2015 HIS Global Insight Figures and 2020 MP SERO report

The unemployment rate is a big challenge in the municipality which has seen an unwanted increase from 2015 from 48% to 53.9% in 2019. This has surely become worse when taking the Covid-19 pandemic which has resulted with high job losses in the country and province. The job loss estimates in 2020, due to the COVID-19 lockdown, between 4 800 and 6 500 & the unemployment rate could increase to between 63.7% and 64% according to the MP 2020 SERO report. The report also indicates that in 2020, the unemployment rate for females was 54.5% and that of males 53.0%. The youth (15-24yr) unemployment rate was 86.2% - challenge with especially very high youth unemployment rate of females of 89.1%. in 2020 the unemployment rate stood at 53.2%

Impact of Covid-19 on labour force

Table12: Covid-19 Impact

Unemployment rate			Number of unemployed	Number of job losses	
2019	2020 lockdown estimate – 2 scenarios'		2019	2020 lockdown estimate – 2 scenarios'	
	Slow	Long		Slow	Long
53.9%	63.7%	64.8%	91 469	4 834	6 480

Source: 2020 MP SERO report

The Covid-19 pandemic has a big negative impact on the labour force in the country and province. It has also affected the municipality where community members have lost people. The Mpumalanga SERO report estimates that 6480 jobs will be lost if the pandemic prolongs.

Household income, 2011

Table 13: Households income

Income	No. households
R 1 - R 4800	12075
R 4801 - R 9600	20199
R 9601 - R 19 600	29927
R 19 601 - R 38 200	25684
R 38 201 - R 76 400	10962
R 76 401 - R 153 800	6571
R 153 801 - R 307 600	3976
R 307 601 - R 614 400	1504
R 614 001 - R 1 228 800	240
R 1 228 801 - R 2 457 600	102
R 2 457 601 or more	83

Source: Stats SA census 2011

In Bushbuckridge Local municipality's households' income is relatively low in the province as its ranked number 13 as per department of finance 2011 report. An income of R9601 – R19 600 has the most households surviving on it followed income from R19 601 – R38 200 with 29927. The average households' income is R36 569.

Number of social grants recipients (per grant type)

Table 14: Social grant recipients

Type of grant	Statistics
Old Age	42 129
Disability	12 359
War Veteran	0
Foster Care	3419
Child Support	219 803
Care Dependency	2053

Bushbuckridge Local Municipality- FINAL Integrated Development Plan: IDP 2021-22

Type of grant	Statistics
Grant In Aid	2311
Social Relief grant	98 328
Total	380 802

SASSA February 2022

In Bushbuckridge Local Municipality there are 282 474 child support grant recipients as the highest followed by 40 973 old-aged grants recipients. There are 12 359 disability grant recipients and there's no war veteran recipient. During the Covid lockdowns the country introduced the social relief grant to assist the unemployed.

Dependency Ratio

Dependency ratio looks at how the communities look at or depend on the government for grants which is too high and unsustainable in the long run. Looking at the grant receipts it shows that the child support grant is too high almost half of the population of this municipality. That shows that most young people rely on grants for living of which is not sustainable. This means the level of education for the youth residents is low and are mostly unemployable. The unemployment rate shows that the education level must be improved to reduce this rate.

Education

The municipality values education as an important aspect in the developing community and as a result some vulnerable and child headed families finds it difficult to access basic education. The municipality is committed to provide psycho-social support programs for learners and educators through the facilities provided by the department of education. The municipal area has 213 primary schools, 119 secondary schools (1 NEPAD e-school), 4 combined schools and further education and training institutions.

Access to basic education is realized and made possible through the provision of free Learner Support Materials and by also declaring other school no-fee schools for the previously disadvantaged communities. However, higher education remains a challenge since there is no proper higher education institution within the boundaries of the province.

However, serious problems are experienced in many of these schools including overcrowding, high failure rate that could be attributed to poor infrastructure and facilities. There are other educational facilities which are currently not used for education purposes such as Mapulaneng and Hoxani colleges of Education. Currently there are four community libraries to serve the community of Bushbuckridge municipal area and one is planned to be implemented in Acornhoek in this financial year.

The Municipality has realized a 37% reduction in illiteracy, an attribute in the access to Adult Basic

Education and Training (ABET). In comparing the illiteracy level of the Census 2001 conducted by the Statistics S.A and the Community Survey of 2007 of the same, Census 2001 recorded 86 866 people aged 20 and above with no Schooling while Community Survey recorded 54, 696 with about 32, 170 difference which indicates a drop-in illiteracy rate.

2016 Census: Stats SA

The municipality with the department of education through collaborative efforts will always try to improve the level of literacy in the municipality as the target is to have more than 50% of the youth educated so they can be employable. The Highest stat is for people with less matric at 36.7% followed by those with Matric on 17.0%. In this country the most vulnerable to unemployment are those without post matric qualifications, therefore this shows that government and the municipality must come up with strategies that will lead this group to be employable as they are the dominant group in the municipality.

2015-2021 Matric Results

Table 14: Matric results

FOUR YEAR PERFORMANCE							
Academic Year	2015	2016	2017	2018	2019	2020	2021
Grade 12	76,7	72,3	72,4	76,9	76,0	74.00	73.7%

Source: Mpumalanga Department of Education

In the Municipality there was a good showing by the grade 12 learners in 2015 where a 76.7 % pass rate was achieved. The next two academic years there was a decrease of 72.3 % in 2016 and 72.4 % in 2017. Through collaboration between the Municipality and the Department of Education by doing learner assistance programs the pass rate improved to 76.9% in 2018 academic year. There was a slight decrease in 2019 academic year by 0.6% from the previous year to 76% in 2019. These collaborations will continue as a target of 80% + has been set for the 2020 academic year. In 2020 there is a drop of 3% to 74% due to the Covid pandemic that has impacted the academic calendar year. In 2021 the matric pass rate had a slight decrease of 0.3% to 73.7%

Education and unemployment in the municipality continues to drive multi-dimensional poverty. The improvement in bachelor's pass rate to 26.5% is a step in the right direction. Relatively low unemployment rate for people with diplomas and degrees in the municipality – normally lowest unemployment for people with degrees.

Health Status

Bushbuckridge Local Municipality has 3 equipped hospitals, 3 health centers, 37 operational clinics and 5 mobile teams. The challenge the municipal faces inadequate medical services in most clinics due to poor supply of medication. These do not dispute the changes that the department has done in the past years in upgrading the service delivered to the communities in other clinics. There are sufficient programs targeting youth, women and disable people in the communities within the Bushbuckridge Local Municipality’s jurisdiction. Health is responded to as a major component of service provided by the municipality.

Table 14: Public health facilities

PUBLIC HEALTH FACILITIES	2018
Number of clinics	37
Number of community health centers (CHC)	3
Number of hospitals	3

Source: Department of health

The Municipality through the directorate of community services and IDP forum is continuously engaging the department of Health to have mobile clinics where there are no clinics, or the walking distance is more than a kilometer as this poses a challenge to the sick and elderly. Awareness campaigns on health matters have sufficient budget from the municipality to keep the communities aware and healthy.

HIV & AIDS

HIV prevalence rate of pregnant women was 31.1% in 2013 the second lowest rate in the province. HIV prevalence rate excluding pregnant women was 16.8% in 2011 a decreasing trend. TB cases are increasing since 2010 as its second highest (worst) among the 18 municipal areas between 2010 and 2011. Bushbuckridge Local Municipality as a custodian of service delivery has a mandate to respond to HIV and AIDS as a developmental problem. The municipality envisages promoting good behavioral patterns and practices through activities that are aligned and coordinated to enable sustainable socio-economic and human capacity in responding to challenges in addressing the pandemic. Further, the struggle against HIV/AIDS needs all the sectors, formations and stakeholders of our society to be involved.

In the municipality, an estimated infection rate is 29% average. Currently there are 12 service points that are accredited as Ant-Retroviral (ARV) treatment centers. One private clinic (Bhubezi clinic) Mapulaneng & Tintswalo Hospitals, Maviljan Health Centre, Agincourt Clinic, Thulamahashe and Casteel Health Centers are accredited health institutions for providing ARVs. Currently estimations indicate that there are more than 4 200 people taking Anti-retroviral treatment in Bushbuckridge Municipal area. The most infected are the economically actives groups (women & men) between the age of 18 - 40. The municipality has further developed and adopted workplace policy that is aimed at assisting employees who are affected and infected with HIV/AIDS pandemic.

There are also supporting institutions within the municipal area in the form of Home-Based Care Facilities across Bushbuckridge municipal area, mainly aimed at assisting people and families who on a daily basis live with the pandemic. These institutions are supported by the department of social development and welfare as the main sponsor.

Top ten causes of death

Table 16: Top ten causes of death

Death causes
Tuberculosis
Gastro Enteritis

Death causes
Pneumonia/Lower respiratory tract infections
HIV related disease
Cancer
CCF
Hypertension / CVA
Diabetes
Meningitis
Accidental injuries

Source: Department of Health Mpumalanga

In the municipality the highest cause of death is tuberculosis, gastro enteritis diseases follows, and the least cause of death is accidental injuries.

Anti-natal HIV prevalence rate

Table 17: Anti-natal HIV Prevalence rate

Census	%
2009	25.50
2010	28.80

Source: Mpumalanga department of Health

Anti-natal prevalence is the number of pregnant women who tested positive for HIV in clinics. In Bushbuckridge Local municipality anti-natal prevalence has increase as according to the Mpumalanga department of health in 2009 it was at 25.50% then went up to 28.80% in 2010. There must be emphases on the mainstreaming of HIV in the municipality through partnership of the municipality and the department of health to fight this prevalence.

3.4. Household profile and services

Table 17: Household profiles

Type of service	Census 2011	Community Survey 2016	Share 2011	Share 2016
Informal dwellings	1 597	1 099	1.2%	0.8%
Piped water backlog	28 124	15 217	21.0%	11.0%
Toilet backlog	16 966	7 178	12.6%	5.2%
Flush/chemical toilet backlog	121 994	112 304	90.9%	81.7%
Electricity backlog	7 783	2 921	5.8%	2.1%

Source: Department of finance 2019

Basic service delivery/infrastructure indicators of Bushbuckridge Local Municipality are worse than district and provincial figures except for informal dwellings and electricity indicators. It is also ranked best and second

Bushbuckridge Local Municipality- FINAL Integrated Development Plan: IDP 2021-22

best with informal dwellings and electricity for lighting indicators. The municipality is the third worst with no toilets and eighth worst with connection to piped water.

Number of households

Table18: number of households:

Households		Average annual household growth	Projected number	Projected 2030 number	
2011 Census	2016 CS	2011-2016	2020	CSIR Green book	Economic Analysis
134 197	137 419	0.5%	140 186	132 325	144 449

Source: Stats SA census 1996, 2001, 2011, CS 2017 and MP 2020 SERO report

In the municipality there were 113 199 households from the 1996 census count, after a five year there was a decrease to 110 586 according to the 2001 census then in the 2011 census count it indicates an increase with 134 197 households counted and the households rose to 137 419 on the community survey 2016. The SERO report estimates that the households are at 144 449. In terms of our own municipal GIS estimations it is believed that the households are at 180 000 which we hope to engage STATS SA on this matter.

Annual growth rate of households

Table 58: Annual households' growth rate

Census	%
1996-2001	-0.23
2001-2011	1.94

Source: Stats SA census 1996, 2001 and 2011

In Bushbuckridge Local Municipality over a period of five (5) years, the households' growth rate was -0.23 annually between 1996 and 2001. While between 2001 and 2011 the growth rate was 1.94 annually over a period of ten (10) years.

Average households' size

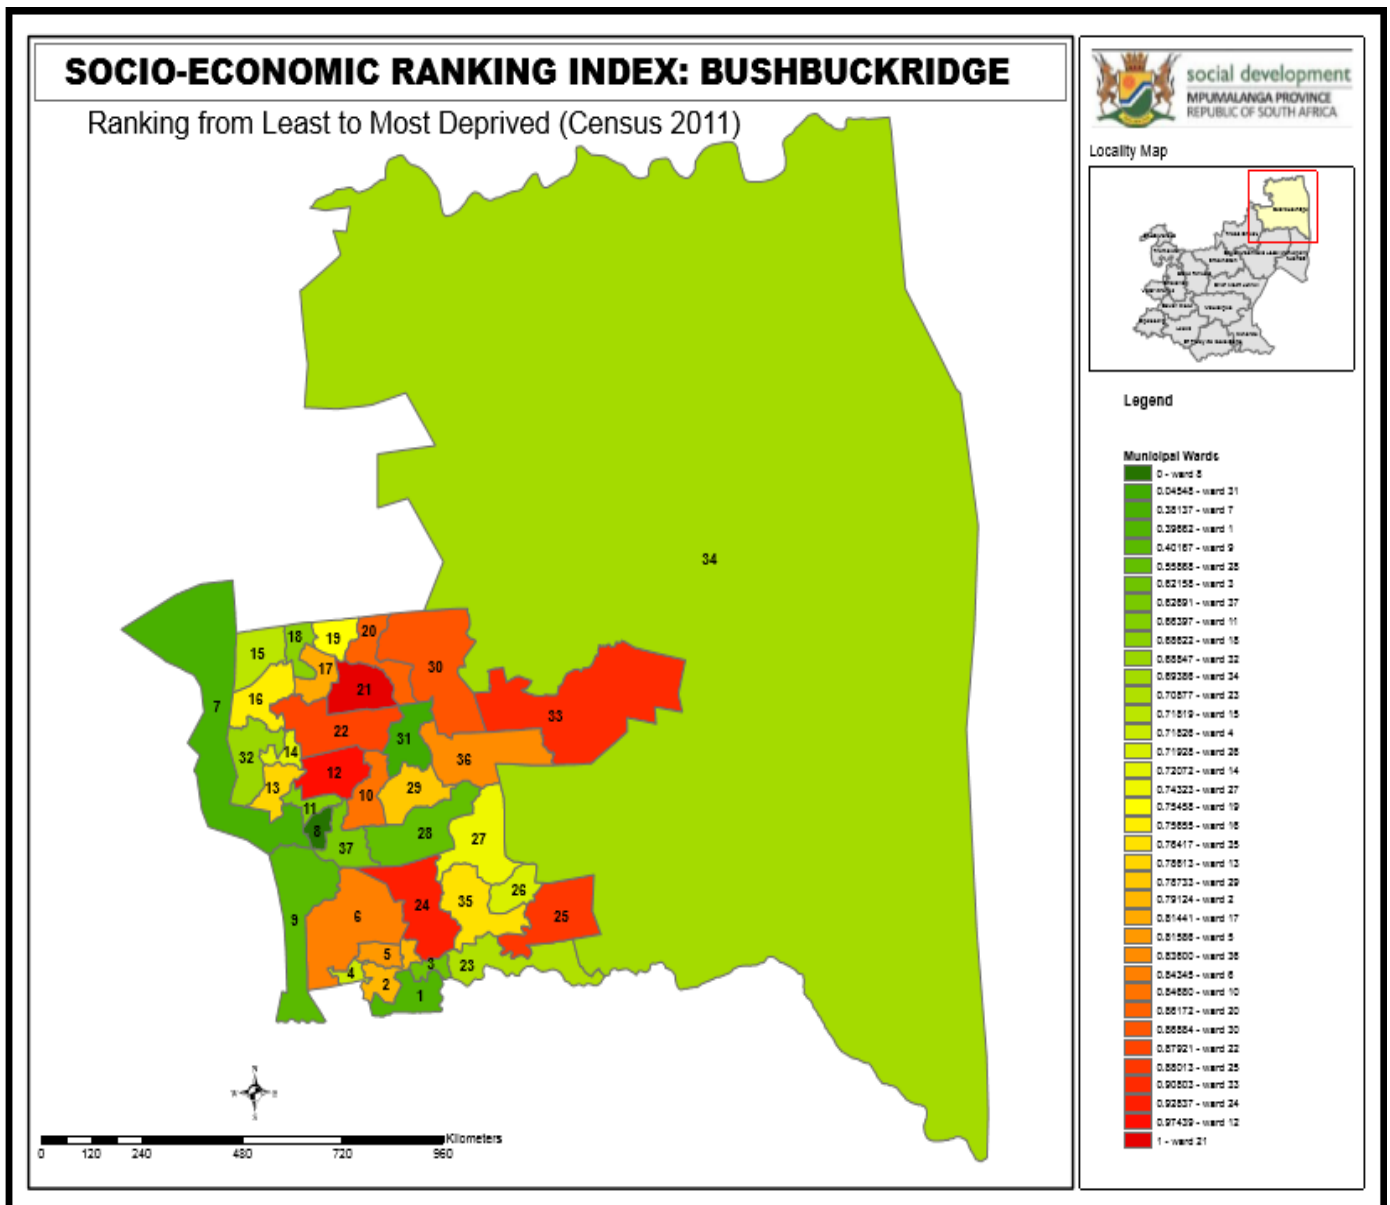

Table 19: Average households size

Census	%
1996	4.76
2001	4.48
2011	4.02

Source: Stats SA census 1996, 2001 and 2011

In the municipality the number of households' size is decreasing as it's at 4.02 as per 2011 census which is a decrease as it was on 4.76 in 1996 census and 4.48 on 2001 census count.

Socio-Economic index- Wards

The Map above indicates wards which are most deprived in terms of development to the ward which mostly developed. With ward 1 the most developed to ward 21 with the most deprived

Informal Dwellings

Table 20: Informal dwellings

Number of households in informal dwellings		Share of total households	
2011	2016	2011	2016
1 597	1 099	1.2%	0.8%

Source: Stats SA CS 2016

The municipality has few informal dwellings with a recorded 0.8% share of total households in 2016.

Migration

The Municipality is in proximity with Mozambique, Zimbabwe and Swaziland. Migration is a norm when a municipality is in such proximity with international borders. The R40 route which passes through the municipality also plays a role in international and local migrants influenced by job opportunities and trade. Migration has a big impact on municipalities as it plays a big part in planning as well as allocation of resources. There are 3 different types of migration that must be taken into consideration when planning namely:

- Non-migrants - those born in Bushbuckridge and have never moved from their location
- In-migrants - those who moved from elsewhere within Mpumalanga or from other provinces within South Africa
- Immigrants - those who moved from other countries into Bushbuckridge

Households with access to water:

Table 21: Households with access to water

Local Municipal area	Number of households without access*		Share of total households	
	2011	2016	2011	2016
Bushbuckridge	28 124	15 217	21.0%	11.1%

Source: Mpumalanga Department of Finance and Economic Development

The municipality has had an improvement when it comes to households with access to water as there was 28 124 houses without access in 2011 and in 2016 there are 15 217 households that translates to 11.1% of households without access.

3.5. ECONOMY OF THE MUNICIPALITY

The Municipality is predominately rural as it was declared nodal point by the then President Thabo Mbeki in 2001, this was done as this municipality doesn't have towns (base for revenue collection), major industries and mining. The potential sectors are mainly agriculture and tourism aided with having part of the Kruger National Park (KNP) within the boundaries of the municipality. The Municipality has a LED strategy that is under review that has a clear path on to grow the local economy and reduce unemployment.

Economic growth

Table 22: Economic growth rate

% contribution to Mpumalanga economy	Average annual economic growth 1996-2017	Average annual economic growth 2014-2019	Average annual economic growth 2019-2024
2019			
4.0%	1.6%	0.5%	-0.8%

Source: MP 2021 SERO Report

The economic growth rate was 1.6% per annum over the period of 1996 – 2017 and experienced a negative growth rate from 2014 – 2019 of 0.5%. The negative growth rate was also influenced by the decline of the national economy. The average annual economic growth is projected to growth negatively at 0.8% at the period of 2019-24 due to the Covid-19 pandemic and recession that the country is facing.

CHAPTER 4: STRATEGIC OBJECTIVES

4.1. Municipality Vision

Bushbuckridge Local Municipality strives for sustainable development and prosperous life for all.

4.2. Municipality Mission

The municipality commits to provide affordable and sustainable services through good governance and community participation

4.3. Municipal Goals and Strategic Objectives

Strategic Objectives	
Goal 1: Ensuring integrated development planning and integrated Human settlement	<ul style="list-style-type: none"> • Strengthen existing IDP structures • Improve the IDP and budget planning process • Ensure implementation of IDP priorities • Allocate available funds to identified priorities on a Multi-Year Plan • Promote Public-Private-Partnerships Ensure implementation of LED strategy
Goal 2: Provision of basic services	<ul style="list-style-type: none"> • improve provision of basic services (water, Electricity, Sanitation and Refuse removal)
Goal 3: To build a capable and high performing municipality	<ul style="list-style-type: none"> • Implement performance management system • Create awareness and buy-in to BLM strategy • Improve communication strategy • Continuous assessment and staff development through PMS
Goal 4: Sound Financial Management	<ul style="list-style-type: none"> • Implement AG action plan • Improve audit outcome to clean audit • Ensure all National Treasury regulations • Increase revenue collection by 10% • Ensure spending of all allocations
Goal 5: Sustainable economic growth and job creation	<ul style="list-style-type: none"> • Reduce unemployment by 3%
Goal 6: Mobilise resources for improved and conducive environment, public safety, and community welfare	<ul style="list-style-type: none"> • Improve awareness on public safety • Implementation of recreational programs • Tackle social issues

4.4. Municipality Core Values

- Accountability
- Openness and Transparency
- Responsiveness
- Honesty
- Service standards
- Diligence
- Effective and efficient governance

4.5. Municipal PEST and SWOT Analysis

1. Table 6: PEST and SWOT Analysis

MIXED SWOT AND PESTLE ANALYSIS (ENVIRONMENTAL SCANNING)

STRENGTHS	WEAKNESSES	OPPORTUNITIES	THREATS
<p>Stable Council and Section 79 and 80 Committees Stable Council, MPAC and public participation structures Conducive political environment for investor confidence</p>	<p>Social distance between politician and the community</p>	<p>Easy decision making</p>	<p>Community unrests</p>
<p>Provision of Paved/Tarred Roads network in all Towns and Villages Financial viability Kruger National Park Maputo Sub-Corridor (R40 Road) Railroad Agriculture (Subtropical climate) Existence of the Agri hub Multi-cultural indigenous tourism points Retail and manufacturing Stable financial Position.</p>	<p>Insufficient budget for infrastructure maintenance. High Water losses Low revenue collection system Lack of beneficiation to businesses Lack of by-law enforcement Lack of LED Forum Lack of by-law enforcement Insufficient support for SMME's (including free wi-fi access services) Insufficient resources (budget) for proper implementation of policies Lack of land ownership Lack of access to the market (agricultural produce) Poor infrastructure to support development and attract investment The non-existent LED forum hampers economic growth.</p>	<p>Creation of jobs through infrastructure development projects Development of SMMEs through subcontracting Increasing revenue base through establishment of new township Replacement of old water meters to improve revenue in formalised areas (Townships) Proximity and linkages with Blyde River Canyon and being part of the Kruger to Canyon Biosphere (K2C) Existence of tourism attractions points Agricultural potential (food security) Sound relations with business Sound relations with Sector Departments Build partnership with other Increased GDP through land development Use of smart water meters</p>	<p>Loss of potential revenue High level of unemployment Land invasion Non-compliance to legislations Poor infrastructure to enable economic growth Crime Land Invasion Global Economic Meltdown Resistance to pay for services. Adverse Covid-19 impact on businesses and individuals</p>
<p>Adequate Performance Management System (PMS) Internal bulk water provision Effective stakeholders' engagement (structures) Cultural diversity Youthful population Highly qualified personnel</p>	<p>Poor organizational culture Weak relationship with traditional leaders High unemployment rate Lack of utilization of social amenities Lack of indigent numbers within the municipality.</p>	<p>Awareness campaign on local government legislation The participation of traditional leaders in Council sittings Multi-cultural events Recruit highly qualified energetic young personnel</p>	<p>Unvaccinated employees Rising death rate of officials High HIV / AIDS rate Land invasion Loss of life: Covid -19, GBVF, climate change Social ills: drug abuse High crime rate Loss of municipal property Crime High poverty rate</p>

MIXED SWOT AND PESTLE ANALYSIS (ENVIRONMENTAL SCANNING)			
STRENGTHS	WEAKNESSES	OPPORTUNITIES	THREATS
			High substance abuse migration
Availability of internet connectivity Sound Land Development Management System Sound Financial Management System	Inadequate ICT infrastructure Unstable and unreliable network connectivity.	ICT Strategy Automated filing system and implementation of online payment platforms Installation of telemetric system and leak detector system Automation of boreholes Electronic Complaints Management System (ECMS) Automated filling system and implementation of online payment platforms. TPAMS BPAMS GIS Dashboard	Information security (Viruses, hacking, etc.) Lack of back-up system Loss of data due to technological failures. Delay in issuing of operating/user licence for Inyaka WTW by DWS Inability to compete in the world stage in terms of 4IR Delays in service delivery and economic growth SPAM and Load Shedding
Public Participation PMS cascaded to the lowest level Community – Based Plans (CBP) Compliance to Grants Conditions Approved Budget and IDP Availability of sectoral plans and policies	Inadequate adherence to schedules and statutory timelines Inadequate compliance to legal prescripts High number of litigations Lack of enforcement Non-adherence to some regulations: Irregular Expenditure minimal implementation of sectoral plans.	Implementation of WC/WDM Clean Audit Outcome Adherence and compliance to legislation Improved enforcement of bylaws and compliance with legislation	Land invasion around Hoxane WTW Negative Audit Outcomes
Availability of water sources (Surface and Underground) Availability of land for development Natural vegetation Availability of waste collection resources Rich Biodiversity	Wasting and loss of water Poor planning and release of land for development {Town planning} Insufficient enforcement of by-laws Climate Change Impacts	Availability of water sources (Surface and Underground) Solar Energy system Opportunities for development through land tenure upgrading, capital investment projects. Implement paperless technologies including electronic filing technology. Development Green Economy	Land invasion around Hoxane WTW Load Shedding Dirty, polluted and harmful environment loss of biodiversity Illegal Dumping Climate change Environmental degradation

The Current Challenges facing the Bushbuckridge Municipality include the following:

- ❖ Poor road network to enable easy movement for the community that will facilitate economic development.
- ❖ Lack of a development strategy for the municipal area based on a proper land audit.
- ❖ Lack of sufficient bulk water supply, reservoirs, and reticulations.
- ❖ Lack of strategy to attract skilled labour force and to retain the skilled personnel.
- ❖ Inadequate health facilities and poor supply of medicines to clinics.
- ❖ Lack of a reliable and structured waste management plan for waste disposal in the area.
- ❖ Lack of effective debt collection and revenue generating strategies

4.6. Developmental Strategy Priority Issues (outcome based)

The municipal objectives and strategies should focus on the strategic intent of the municipality in achieving the vision and mission in line with the identified priority issues and program.

Municipal KPA	Corporate Services									
Problem statement and root causes per KPA:	Poor internal control and non-adherence to statutory timelines									
One Plan Transformation Area										
2019-24 MTSF Priority	A Capable, Ethical and Developmental State									
Municipal Priority	Good governance and Institutional									
Strategic objective	To build a capable and high performing municipality									
Impact statement: Accessible services to communities	MTSF Target: 100% access to piped water, sanitation, electricity and 75% to weekly waste removal

CHAPTER 5: INSTITUTIONAL TRANSFORMATION AND GOOD GOVERNANCE

This chapter shows the institutional framework of Bushbuckridge Local Municipality and the effectiveness of municipal strategies when dealing with governance issues.

5.1. Municipal Institutional Structure

To deal with challenges of service delivery and performance of certain powers and functions, Bushbuckridge Local Municipality has developed a structure, which caters for the following stakeholders:

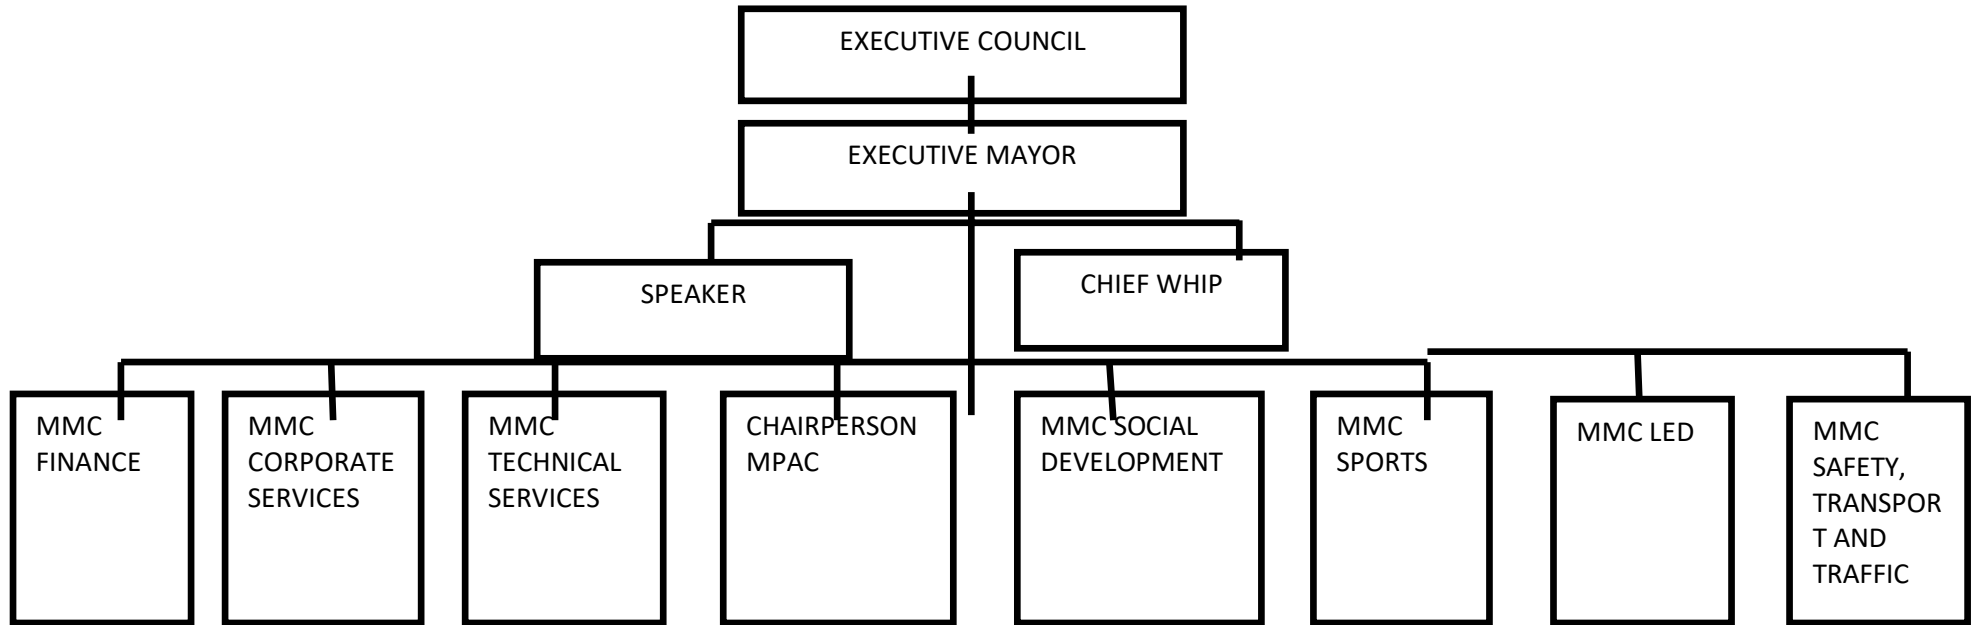

- ❖ **Municipal Manager – Mrs. CA Nkuna**
Units under this directorate: All directorates, IDP, PMS, Internal Audit, Risk Management, Communications and 11 Regional offices
- ❖ **Chief Financial Officer (CFO)- Vacant**
Units under this directorate: Budget and Treasury office (BTO), Income, Supply Chain Management, Assets, Expenditure and AFS
- ❖ **Directorate : Corporate Services- Vacant**
Units under this directorate: Council Support, Auxiliary, Human Resource, Legal, and ICT
- ❖ **Directorate : Community Services- Vacant**
Units under this directorate: Transversal, Employee Wellness, DLTC and Traffic
- ❖ **Directorate : Economic Development, Planning and Environment- Mrs. S Mogakane**
Units under this directorate: Town Planning, Local Economic Development, Environment, and Waste Management
- ❖ **Directorate : Technical services- Mr. E Mashava**
Units under this directorate: Roads, Water Authority and Sanitation, Water services, PMU, Human Settlement and Electricity and maintenance

Organizational structure, Staff Component and Appointments

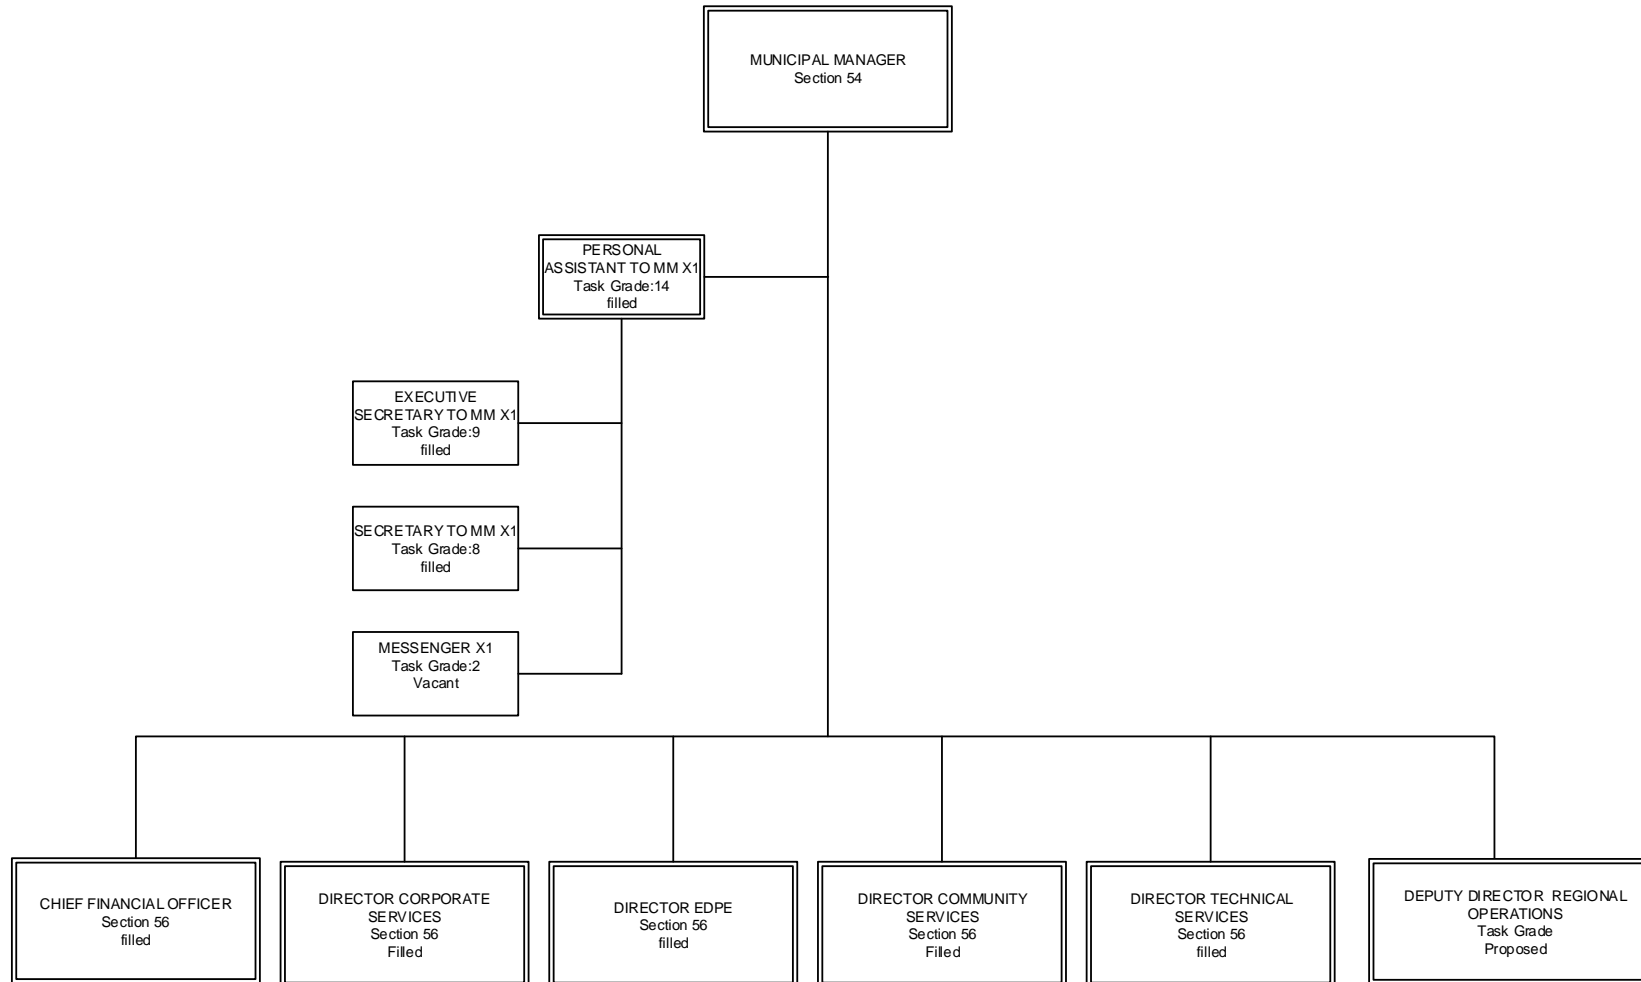

The municipality has 1151 posts filled with 736 vacant as per 2020/21 approved organizational structure with council **resolution number: BLM/71/20/03/14/2013/214**. There are five section 57 posts with 2 posts vacant. The organogram was adopted in 27 May 2021.

Staff Component and Appointments needs the implementation of the Employment Equity Plan, which was adopted by Council by June 2006, and it was reviewed by the municipal Council in December 2015. The main challenge is the effective implementation of the EEP at management level whereby five female unit managers have been appointed against sixteen male unit managers.

Unskilled	253	192	445
Disabled employees			
Professionally qualified	2	0	2
Skilled technical	2	1	3
Semi-skilled	4	3	7

5.2. Human Resources (HR) Strategy

The development of HR Strategy and its implementation plan is a requisite of the IDP. The strategy serves as a framework and guide to HR functions. The development and implementation of the HR Strategy is meant to create an enabling environment that will assist towards improving service delivery. An amount of R15 000 000 is budgeted for the development of HR Strategy during 2021/22. However, there will be future financial need for the implementation of HR Strategy imperatives.

Recruitment and Selection

The objective of the Recruitment and Selection Unit is to provide staff the through implementation of the Recruitment and Selection as well as the Promotion and Transfer policies. The unit is also responsible for compliance with the Employment Equity Act 55 of 1998. The structure of the unit comprises of a manager, 11 officials that covers Labour relations, Skills Development and Employment equity. A challenge of an Inability to meet the Employment Equity targets, to deal with the challenge some measures are being employed where all selection panels are encouraged to appoint female employees (on merit).

Occupational Safety

The objective of the Occupational Safety section is to promote health by providing the employees with ongoing education, information, and communication in all health-related aspects. They are also encouraged to be proactive about their health and modify their lifestyle for their own health benefits. The section has a responsibility of ensuring a safe work environment of all the employees at work and safety during operations. This is to comply with the Occupational Health and Safety Act 85 of 1993, Medicine and Related Substances Control Act 101 of 1965, Employment Equity Act 55 of 1998 and the Compensation of Occupational Injuries and Diseases Act 130 of 1993.

Organizational Development

The objective is to provide organizational design services to ensure that BLM has the most appropriate structure and improved work processes to achieve the goals of the organization. This is done through facilitating processes, advising management and departments about the most appropriate structures to be effective at BLM.

For good governance, development of skills and professional service delivery, the municipality develops a workplace plan on a yearly basis and implement and report on it. There are 48 officials being capacitated on MFMA which is facilitated by the University of Northwest and 20 officials that are being trained on an Assessor and Coaching programme which are running until June 2014 as per WSP. There are 4 finance interns appointed as per National Treasury regulations.

The municipality has various learnership programmes that are aimed at equipping the local youth with skills so they can be employable or be able to become entrepreneurs.

Anti- Fraud and Corruption

The anti-Fraud and corruption Policy is intended to reinforce existing systems, policies, procedures, rules and regulations of BLM by preventing, detecting and reducing the impact of fraud and corruption. The Municipality fosters a zero tolerance to fraud and corruption anti-Fraud and Prevention strategy was approved and adopted by Council during November 2009 Council sitting. Anti-Corruption line was also established to allow members of the public to report on the fraudulent and corrupt activities that includes the misuse of Municipal Vehicles. Anti-Corruption line is managed and controlled by an independent body who takes report on behalf of the municipality.

5.3. Committees

Oversight Committee

Municipal Public Account Committee (MPAC) was established in terms of Section 79 of the Local Government Municipal Structures Act, 1998 to serve as an oversight over the executive obligations of the Council. The committee was established on the 28th June 2011 as per the Council resolution number: BLM/133/28/06/2010/11 and consists of 12 members.

The committee was inducted with the rest of the members throughout Mpumalanga province. It consists of 12 members, which is chaired by Cllr L Lekhuleni. Currently the committee managed to meet with the Auditor General (AG) to assist with the interpretation of its report coupled with management letter. Questions from the AG's report have been prepared for the executive to give response. The committee meets regularly before each council sitting so that they prepare report that will be tabled to the council.

Council committees

The Municipality has nine council committees which are chaired by members of the Mayoral committee. Five of the committees deal with administration and the other four are for the political wing of the municipality. The committees were established on the 24th August 2016 with the Council resolution number: **BLM/07/24/08/16/2016/17**. The committees seat regularly before the sitting of each council meeting. Reports are interrogated in the committees before the can be table to the Mayoral Committee and the Municipal Council. The committees are as follows:

2.Council Speaker Cllr R.B Raganya	0605816522
3.Council Chiefwhip Cllr B.W Malandule	060 506 4887

Functions of Council committees:

- To monitor the performance of the municipality and their relevant managers including directors to implement or start projects in time to avoid delays
- Playing of oversight role in preparation and drafting of the IDP, the IDP process plan, community needs register and public participation plans
- Helping to adopt and review IDP budget and recommend for publication of the final IDP
- Help communities prioritize projects through public participation
- Encourage the community form IDP Rep forums in their wards and at district
- Conduct information campaigns on issues affecting the community
- Communicate activities that promote transparency and promote public involvement in all activities
- Assist constituents to make formal complaints of petition as may be appropriate for submission to the municipality
- Handover of new projects and completed projects according to the IDP
- Ensure that the municipality meets its executive obligations, discharges its developmental duties and realizes the constitutional objective of local government (section 19 of Structures Act)
- Submission of approved IDP document to the MEC for Local Government
- Approval of SDBIP and submit to National and Provincial treasury
- Implementation of SDNIP
- Monitor, review and adjust the SDBIP

Labour Forum

The municipality has a Labour forum that has labour party representatives from SAMWU, IMATU and DEMAWUSA. Also, part of the forum is municipal councillors and officials. The structure meets quarterly on a normal basis unless there are pressing issues to attend to that must go to council.

Ward Committees

Ward committees were established in terms of section 72 of the Municipal Structures Act of 1998, to assist with the Ward councilors to carry out their duties to the community. Bushbuckridge Local municipality established the ward committees between the periods of September 2016 to January 2017 after the Municipal council resolved to deploy Councilors to lead the establishment of the committees. A report on the establishment of ward committee members was tabled to council on the 27th August 2017 with **BLM/21/27/09/16/2016/17**

All the 38 wards have established their ward committee structures. The municipality together with the department of Cooperative Governance and Traditional Affairs (**COGTA**) provided an induction workshop to all ward committee members over two weeks where they divided the sessions into three clusters (North, Midlands, and South). The municipality makes out of pocket expenses to all ward committee members as gazetted by government.

Operation Vuka Sisebente (OVS)

The main aim of OVS is integrating the services of government to fight the triple challenges of unemployment, poverty and inequality and promote healthy lifestyle, embrace community partnership, thereby creating a better life for the entire citizenry of the municipality. OVS operates through reformed governance structures constituting of Ward, Local and Provincial war rooms. A ward-based initiative targeting disease management in the wards with special emphasis on HIV, TB, and poverty.

Strategic goals of OVS

- **Goal 1:** Institutionalization- OVS becoming fully coordinated and integrated
- **Goal 2:** Partnerships- To have a fully functional war rooms as service delivery engines engaging all stakeholders
- **Goal 3:** Capacity development- to have skilled human resources at all levels
- **Goal 4:** Performance management- a single integrated M&E system to track integrated service delivery

In the municipality the OVS was launched in 2015 by the former Premier Hon DD Mabuza. The municipality has managed to launch in all 38 wards with only 3 non-functional. Of the 3 non-functional wards two (2) needing CDWs and the last one needs to be relaunched. The OVS is made up of various stakeholders including SAPS, Home affairs, SASSA, Health, Education, etc. where they discuss community issues raised in all villages of the municipality. The unresolved issues are referred to the Local Council of Stakeholders (LCOS) to further find solutions to the raised issues thereafter the report is referred to the war rooms.

5.4. Service Delivery Standards (Bath- Pele Principles)

Bushbuckridge municipality, with all its service delivery challenges, is obliged to develop a Service Delivery Charter and a Service Delivery Improvement Plan to ensure efficiency and good governance. Adherence to Batho-Pele principle is possible if service delivery policies are developed and implemented.

BLM Service standards

We undertake to provide services of high quality; in this regard we aim to:

- Ensure that all municipal employees wear their name tags
- Ensure that all municipal officials be formally dressed and be presentable
- Ensure that complaints raised by the public shall be treated as confidential
- Attend to all queries within 10 working days
- Answer the telephone calls within 5 rings
- Process applications within 30 days
- Deal with written requests within 21 days
- Pay our creditors within 30 days

5.5. Communication, Marketing and Events Co-ordination

The Communication, Marketing & Events unit is primarily responsible for the communication between the municipality and the communities within the municipality, through the media (electronic and print) and Community Outreach Programs. The unit works in synergy with the district and other local municipalities within the district (city of Mbombela, Nkomazi and Thaba Chweu) and the provincial departments. This is done daily whenever the need arises and also monthly, through the District Communicator's Forum. This allows all communicators to ensure that they communicate one message in service delivery.

The objectives set out by the unit and indicated on the Communications Strategy as follows:

- To ensure participation and support to Integrated Development Plan (IDP).
- To improve communication mediums internally and externally (website, quarterly newsletter, monthly newsletter, newspapers, and radio).
- To conduct constant monitoring of communications, marketing, and events management.
- To support and participate in the Municipal's programs and activities.
- To implement the Communication Strategy.
- To create platforms for greater public participation through consultative processes and by sharing information with communities.
- To enhance Intergovernmental Relations through the coordination of communication activities, programmes, and projects among the three spheres of government.
- To strengthen and sustain media relations and to communicate proactively with the media.
- To brand BLM at events and activities organized by both the Municipality and the District municipality.

Communication tools to communicate internally and externally:

- Quarterly newsletter (will also include local municipalities and other government departments)

- Internal newsletter
- Radio interviews, advertising and talk shows
- Website.
- Social Media

Complaints Management Systems

The Office of the Executive mayor and Speaker conducts Izimbizos where the community is given the platform to raise their complaints and frustrations in terms of service delivery matters. During the IDP public consultation meetings which are held as per requirement of the Municipal Systems Act, the community also gets a platform to raise their concerns. There are other ways where the community members are given an opportunity: Suggestions boxes at all municipal offices, LED forum, awareness campaigns, Community Radio airplay slot, etc.

5.6. Information Technology

Bushbuckridge Local Municipality established an Information Management Unit with the main objective to manage the planning, development, evaluation, coordination, implementation and maintenance of Wide Area Network (WAN) Information Technology (IT) system initiatives that support organization in meeting its strategic objectives and goals in service delivery. The unit must ensure the alignment is achieved between the IT initiatives (which is IT Strategy) and business strategy (that is the IDP – Integrated Development Plan). The unit is responsible to build and maintain the network infrastructure. In so doing the data management is inherent together with systems analysis as major functions.

BLM has implemented systems internally at head office and shared others with its regional offices. There are requirements for reporting to National and Provincial government and hence implementation of systems is key to meet these requirements. At minimum, the following systems are implemented at for major business processes and functions:

- Financial Management System (Pastel Evolution)
- Electronic Document Management System
- Geographic Information System (GIS – ArcGIS ESRI)
- Payroll {Human Resource} System (VIP)
- Performance Management System

5.7. Auxiliary

The Auxiliary unit under the corporate services directorate covers fleet, records management, and Administrative Support services for the municipality. The records management is in the process of moving from manual paper records to electronic records with the assistance of the Information Technology (IT) unit that will take approximately three (3) years for fully transformation. This will assist in office space as there are many files in the offices. The Municipality is in the process of moving from the normal line telephones to VOIP (Voice over Internal Protocol) which converts outgoing phone calls into data that zips through high-speed internet connection.

The fleet management is fully functional though more fleet is needed to cover all corners of the municipality when it comes to service delivery. In order for Council to function and execute its core responsibility, a requirement being a support aid in the form of fleet was identified. This is a support aid which requires both acquiring and then maintaining.

The BLM’s fleet which can be categorized as follows:

Table no:

Type of vehicle	Number of vehicles
Graders	10
Front Loader	1
TLBs	7
Water tanker	22
Refuse compactor	8
Skip loader	6
LDVs	29
Sedans	18

Type of vehicle	Number of vehicles
Trailers	4
Fire fighters' trucks	3
Tipper trucks	2
Refuse supplement trucks	6
Tractors	3
High up truck (Electrical vehicle)	1
Low bed	1
Total	105

5.8. Institutional Plans and Sector Strategies

CHAPTER 6: SPATIAL DEVELOPMENT FRAMEWORK

This Chapter looks at how the municipality is spatially divided and where certain projects development will be located.

The spatial vision of the municipality is to “**envisage a well-planned Bushbuckridge Local Municipality leading to sustainable livelihoods for all**”. This spatial vision aims to contribute to social stability, economic growth and development in an equitable and sustainable way and address the problem of rural-urban inequality. The Ehlanzeni RDP has identified the BLM as a strategic area in terms of agro-processing and rural development. This is informed by the identification of Mkhuhlu as an area that will accommodate the proposed Agri-Hub which will not only be a transit point for produce and goods in the area, but will also serve the region, going as far as cross-provincial inclusion. The RDP further encourages rural development, which is further emphasized by the municipality’s IDP and the NDP 2030. Thus, in achieving its goals, the municipality not only has a role to play in development but must integrate policies in place to achieve set targets. Later in the report, spatial proposals that seek to address these are discussed in detail and further depicted spatially.

The Spatial Planning and Land Use Management Act, 16 of 2013 (SPLUMA). SPLUMA requires each municipality to develop a Spatial Development Framework (SDF). Section (12) (a) of the SPLUMA requires that Spatial Development Frameworks (SDFs) be compiled by all spheres of government for their areas of jurisdiction, hence the compilation of an SDF for Bushbuckridge Local Municipality is in terms of the Act.

Regarding municipal SDFs, SPLUMA section 20 provides that municipal SDFs be compiled as part of a municipality’s Integrated Development Plan (IDP) in accordance with the provisions of the Municipal Systems Act, 32 of 2000, while section 21 details the content of a municipal SDF.

Bushbuckridge Local Municipality’s (SDF) is an indicative plan showing the desired patterns of land use, direction of growth, urban edges, special development areas and conservation-worthy areas. The municipal SDF is flexible and able to change thus reflecting the changing priorities of the Bushbuckridge Local Municipality.

The SDF was reviewed and adopted during Council sitting on the 2017/2018 financial year through the assistance of DRDLR. SPLUMA requires that the municipality should review its SDF every five year. The municipality is currently reviewing its SDF should be finalized in June 2017. The SDF sets the strategic development direction for the area.

The SDF recognizes Bushbuckridge, Acornhoek, Thulamahashe and Mkhuhlu as the main urban nodes of the local municipality. Additionally, primary nodes identified for development are Casteel, Shatale/ Dwarsloop, Hluvukani, Agincourt, Kildare and Marite. Several transportation hubs have been also identified with three main hubs being located at Acornhoek, Thulamahashe, Mkhuhlu and Bushbuckridge CBD. Nodes are identified as areas where development is concentrated.

These nodes are the structuring elements of the municipality and can contain both a mixed and single land use. These Nodes are linked via a number corridor as they are crucial to the development of its area. Corridors contain a variety of transportation modes and intense land uses. Corridors are expected to contribute to the economic development of the municipality and be enabler for service delivery.

All corridors including primary routes, secondary routes, arterial roads, and rail transport are seen to play a significant role in the growth and development of the municipality. It is proposed that development be focused within these nodes, so that they become places where services are rendered at a central point to communities.

It furthermore envisioned that the eastern parts of the municipality should be developed as a tourism belt where Public-Private Partnerships (PPPs) should be encouraged. The Openn Gate Road to the Kruger National Park should also be developed as part of the tourism belt.

The primary aims and objectives of the SDF can thus be summarized as follows:

- To create a spatially based policy framework whereby change, needs and growth in the Bushbuckridge Local Municipal area are to be managed positively to the benefit of everyone. It should focus on how land should be used within the broader context of protecting the existing values of the Bushbuckridge Local Municipal area i.e., tourism destination, rich historical and cultural area.
- To improve the functioning of the local urban and rural, as well as the natural environmental systems.
- Identification of local opportunities for future urban/ rural development, and natural environmental conservation, and make recommendations as to where and how development of the open space system should be managed.
- To establish strategies and policies to achieve the desired spatial form i.e., movement and linkage systems, open space system, activity system, overall land use pattern etc.

Table 7: Strategic Development Areas (SDAs)

Bushbuckridge Area
<ul style="list-style-type: none"> • SDA1: The triangular area between Bushbuckridge/Maviljan, Dwarsloop and London C which will act to consolidate the urban structure of these three areas. • SDA2 and SDA3: The vacant land parcels to the north and south of the Dwarsloop-Arthur Stone area.
Casteel Area
<ul style="list-style-type: none"> • SDA4: Located in the area to the north-west of Casteel.
Acornhoek Area
<ul style="list-style-type: none"> • SDA5: Around Route R40 between Rooiboklaagte, Arthurseat, and Tsakani. • SDA6: To the north of the Acornhoek business node on both sides of the railway line. • SDA7: The vacant land between Moloro and Green Valley. • SDA8: The vacant land between Acornhoek and Okkernooitboom.
Burlington Area
<ul style="list-style-type: none"> • SDA9: Infill development between Burlington and Khokhovela.
Hluvukani Area
<ul style="list-style-type: none"> • SDA10 and SDA11: Infill development in the vacant areas between Clare and Hluvukani (SDA10) and Hluvukani and Tihavekisa (SDA11).
Thulamahashe Area
<ul style="list-style-type: none"> • SDA12: This infill area is strategically located between the two business areas and adjacent to the south of the link road between the business areas. • SDA13 and SDA14: These two areas pose potential for infill development to the north-west and north-east of SDA12.
Agincourt Area
<ul style="list-style-type: none"> • SDA15: This area represents the vacant land located between Agincourt and Newington.
Kildare Area
<ul style="list-style-type: none"> • SDA16: This area comprises the vacant land between Kildare and Cunningmoore.
Lillydale Area
<ul style="list-style-type: none"> • SDA17: This SDA poses potential for infill development on the vacant land between Lillydale, Justicia, Huntington and Somerset.
Mkhuhlu Area
<ul style="list-style-type: none"> • SDA18: This area already holds a significant number of informal structures and stretches from road R536 in the south up to Oakley in the north. • SDA19: This area is located to the south of Calcutta next to road R536 and also holds a significant number of new informal structures. • SDA20: The area could accommodate future infill development between Oakley and Alexandria A.
Marite Area
<ul style="list-style-type: none"> • SDA21: Located to the east of road R40 this area could act to consolidate/link development between Marite and Mkhuhlu. • SDA22: This represents infill development to the west of route R40 and southwards up to the municipal border.

Geographic Information System

The mission of the GIS Unit is to provide spatial information and support to all users both internal and external inclusive of all citizens to facilitate informed decision-making and enable users to achieve their objectives.

This GIS Unit provides the technological vision and leadership to deploy appropriate spatial technologies that will contribute towards an enriched community of BLM. It re-invents, re-engineer, and streamline municipal operations wherever spatial technology can contribute towards increased efficiencies, increased effectiveness, and reduced costs.

The Municipality has adopted a GIS Policy which its aim is to:

- a) Ensure standardization on the use of GIS with a view of maximizing its benefits.
- b) Provide a process for access to both information contained in the BLM GIS unit as well as map and data products developed by the system.
- c) To guarantee compliance to all legislative requirements relating to the handling and dissemination of spatial and related information, Legislations such as *Spatial Data Infrastructure Act, Act no 54 of 2003* and *Promotion of Access to Information Act, Act No.2 of 2000*.

The municipality has an effort to build and maintain a spatial information system to provide more efficient service to its citizens and clients. It is the intent of the BLM to provide access to spatial information as permitted or required by law. It should be noted that the *Promotion of Access to Information Act, Act No.2 of 2000* requires the organs of state to make all public records available to the public. Hence the municipality has concluded that the main objectives governing the adoption and use of GIS should be:

- Increased efficiency and effectiveness in the delivery of the municipal service delivery
- Improve data and information integration at all municipal directorates

Encourage data sharing wherever possible at all levels of government; easy consistent and effective access to geographic information; and promote use of geographic information and tools as widely as possible.

CHAPTER 7: BASIC SERVICES AND INFRASTRUCTURE

This chapter looks into one of the constitutional mandates which dictate that local government must ensure provision of basic services to the communities.

7.1. Water services

Bushbuckridge Local Municipality has the mandate to provide free basic water service in terms of the National Framework. Water supply to communities remains a challenge. Through the massive program of bulk supply, the municipality aims to improve the lives of the communities and households with provision of multiple sources of water. Linked to water supply problems is poor sanitation, particularly in the densely populated settlements clusters and dispersed small settlements. Through the construction of VIP toilets in households, the Municipality will archive its objective of providing environmentally friendly sanitation services to the people for the promotion of healthy living amongst individuals.

The Municipality is a water service authority which was effective from the 1 March 2006. The actual transfer of assets (infrastructure, staff, and finance) took place on the “effective date” in the Transfer Agreement.

Water Service delivery backlog

Bushbuckridge Local municipality has, 146 720 households as per WSDP with 35 213 (24%) households without access to water and 111 507 (76%) households have access to water in their yards. The municipality has completed the Acornhoek bulk as well other major bulks. In terms of the master plans the bulk water is 98% and above completed. To provide the community with water in the short-term basis while awaiting the completion of the bulk and reticulations the municipality is refurbishing and maintaining boreholes to arrest the backlog. In 2016/17 financial year the municipality managed to reticulate 21 243 households and in the 2017/18 financial year the municipality reticulated a further 10 543 households and a backlog of 12 500 households will be implemented on the 2022/23. Water tankers are used to deliver water to areas with a pressing shortage of water.

The municipality has budgeted R455 000, 000 for the 2022/23 financial year to fast track the implementation of the projects identified in the municipal IDP document. The budget is also informed by the resolutions of the PCF where all municipalities in Mpumalanga must budget 65% of the budget to water and sanitation.

Table 8: basic service delivery standards and reasons for lack of service

Ward	Settlement	Type of service	Reasons for lack of service
19	Sigagula,	Bulk supply and water reticulation	Awaiting water reticulation
20	Jameyane, Phendulani	Bulk supply and water reticulation	Awaiting for the completion of Acornhoek bulk water supply
22	Dingledale A&B	Bulk supply and water reticulation	Awaiting for the completion of Acornhoek bulk water supply
25	Lillydale, Summerset	Bulk supply and water reticulation	Awaiting for the completion of Injaka bulk water supply
28	Agincourt	Bulk supply and water reticulation	Awaiting for the completion of Injaka bulk water supply
29	Rolle	Bulk supply and water reticulation	Awaiting for the completion of Injaka bulk water supply
33	Hluvukani, Dixie	Bulk supply and water reticulation	Awaiting for the completion of Injaka bulk water supply
34	Gottenburg, Welverdien	Bulk supply and water reticulation	Awaiting for the completion of Injaka bulk water supply

Water Services Development Plan (WSDP)

The municipality has developed water services development plan, which was adopted by council in 2018, this plan is used to address the back log of water supply in various settlements. This is a municipality where the potential exists of regional bulk water supply schemes respectively from the Inyaka dam and Sabie River. The water supply systems are very complex with some short term sub-regional surface water schemes with ground water schemes particularly in the distant rural localities.

Water supply is a dominant problem, especially in rural areas where 30% does not meet RDP standard. Around 24% of the households do not have access to potable water, 70% rely on tap water, while 25% rely on boreholes and 5% on natural water (spring and rivers).

Water supply to settlements and townships is still not reliable. On certain days' taps are dry in the townships whereas some settlements go through dry taps for days.

Linked to water supply problems is poor sanitation, particularly in the densely populated settlement clusters and dispersed small settlements. Approximately 80% of the households in the municipal area use pit latrines, 84% of the population do not meet RDP sanitation standards. The extensive use of unlined pit latrines poses a potential pollution threat to the surface and ground water resource. (Page 14 of the WSDP)

The purpose of the water services development plan is to articulate a national vision for the water Services sector for the next ten years. It furthermore stipulates the following core goals:

- All people have access to an appropriate, acceptable, safe and affordable basic supply.
- All people are educated in healthy living practices and the wise use of water.
- Water services are provided equitably, affordably, effectively, efficiently, and in a sustainable manner with gender sensitivity.
- All Water Services Authorities are accountable to their citizens, have adequate capacity to make wise choices and able to regulate services provision effectively.
- The price of water services reflects the fact that it is a social and economic good.
- Basic services would be subsidized

Blue and Green drop

Bushbuckridge Local Municipality has a responsibility to provide potable water and a basic sanitation service. Blue and green drop programme was developed to monitor the performance of the WSA's in providing (water service). Blue and drop certification programme allows for protective management and regulation of drinking water quality and wastewater management based upon legislated norms and standards. Blue and green drop situation in Bushbuckridge is considered critical from a regulatory view. The Municipality must ensure that it uploads data on the BOS, develop water safety plans for plants that do not have them and ensure that samples are done regularly at the confirmation assessment. Two municipal plants that are critical are under refurbishment and the others were doing route maintenance to maintain the status.

7.2. Sanitation

The municipality has five sewage treatment plants, which are operating. These are Acornhoek treatment, Mkhuhlu treatment plant, Maviljan treatment plant, Dwarsloop treatment plant and Thulamahashe treatment plant. The municipality has budgeted money to expand the sewage treatment plant to cater settlements which has water e.g., R293 towns. Other than the R293 towns the municipality is largely rural therefore Enviro Loo toilets are being constructed. The Mpumalanga PCF has resolved that VIP toilets must be replaced as they pose a challenge of polluting the underground water therefore new technology of toilets called Enviro-loo toilets

Sanitation Service delivery backlog

Bushbuckridge Local municipality has, 146 720 households as per 2016 Community survey and 36 289 (25%) households do not have access to sanitation. The municipality has a large backlog because of ageing infrastructure where most of the sewerage pipes are asbestos and are being replaced, the other major problem is that treatment plants are operating above design capacity thus the municipality has prioritized upgrading the plants.

The municipality has budgeted R12 000, 000 for the 2022/23 financial to fast track the implementation of the projects identified in the municipal IDP document. In BLM 75% of the residents have access to sanitation. The budget is also informed by the resolutions of the PCF where all municipalities in Mpumalanga must budget 65% of the budget to water and sanitation.

The following information as supplied by STATISTICS SA will help in providing necessary statistics

Table 94: Sanitation

Local Municipal area	Number of households without toilets	
	2011	2018
Bushbuckridge	16966	36 289

Source: Technical Services directorate

7.3. Electricity

The Bushbuckridge Local Municipality is providing the communities with free basic electricity and alternative source of energy (solar panels & gel). In partnership with ESKOM and Department of Energy, the Municipality sufficiently provides the community with acceptable standard of electricity, with 98% of the households electrified, 0.8% uses paraffin, 1.8% uses candles, and 1.0% solar panels. However, provision of energy in the area needs to be upgraded especially in rural areas where interruptions of electricity supply occur. There is a need to improve the current infrastructure to an acceptable level. Currently ESKOM is upgrading some of the sub-station to accommodate massive reticulation and bulk supply between Ngwarele Sub-station and Hazyview.

Table 25 Electricity connections

Local Municipal area	Number of households not connected*			Share of total households		
	2011	2016	2018	2011	2016	2018
Bushbuckridge	783	2 921	1 340	5.8%	2.1%	2%

Source: Mpumalanga Department of Finance and Economic Development and Technical directorate

7.4. Cemeteries

The municipality envisages constructing municipal owned cemeteries in the rural areas to ensure protection of the cemeteries. Majority of rural communities prefer to bury their loved ones in their own yards, which do not take into consideration the effects to hydrological impact. The Municipality is committed to provide necessary infrastructure to already existing and newly identified cemeteries. The municipality has formed a team that is currently engaging the traditional authorities in order to identify land for cemeteries. After that exercise the municipality will come with an action plan on how to demarcate the identified land.

7.5. Telecommunications Infrastructure

A large section of the municipal area is provided with formal telecommunications facilities, 70% uses Cell phones, 20% uses fixed lines with 10% rely on public phones. Telecommunications is well provided in big institutions such as hospitals, schools, and government departments.

7.7. Human Settlement

The Bushbuckridge Local Municipality as a declared nodal point, has in terms of the adopted housing chapter that must be reviewed, prioritized the allocation of housing units to all earmarked wards as per the need on the ground. As the municipality is facing a provision of adequate and sustainable human shelter (housing) backlog, this extensive problem has been exaggerated by the lack of well suitable and located land for the implementation of integrated human settlements development, shortage of serviced stands and inadequate provision of housing subsidies by the Provincial Department of Human Settlements.

Based on the influx and escalating number of people who needs an adequate and sustainable human shelter, the Municipal Human Settlements & Building Unit is experiencing a high number of backlogs through the initiated new waiting list system of capturing the different housing typology of beneficiaries called **National Housing Needs Register (NHNR)** of which currently is **24 624** for the entire jurisdiction. It is the guideline for all municipalities that is controlling the processes of allocation of units according to the database by National Department of Human Settlements.

The municipality has to work collectively to consolidate the waiting list through consultation of all structures such as *Ward Councilors, Ward Committee's, CDW's and NGO's, Tribal Authorities as well Municipal Officials i.e., Human Settlements & Building and Town Planning* by ensuring that all different housing typologies applicants are accommodated within the NHNR database.

The municipality has a Sector Plan called Housing Chapter that was adopted by Council in 2009 of which it needs to be reviewed based on the number of issues such as the new demarcation, number of wards currently, influx and the escalation of needs.

The implementation of Integrated Human Settlements will address the shortage of an adequate and sustainable human shelter (RDP's), fully serviced sites for high density and Gap Market (Middle Income Housing) with fully infrastructures in the five new township establishment i.e.

Table 26: Traditional authority connections

Township Establishment Areas	Tribal Authority	Number of Sites
Lillydale - A	Jongilanga	655
Lehumo	Moreipuso	607
Burlington - A	Mnisi	652

Kumana	Amashangana	517
Rooiboklaagte - C	Setlare	654

In addition to the above the engagements of other Tribal Authorities for securing the well-located land for the implementation of integrated human settlements will ease the stress for people of Bushbuckridge. The area itself will be well developed, including *Greenvalley Mamokutu, Mkhuhlu Eco-Estate* etc.

Municipal Building

The refurbishment and maintenance of Municipal Buildings and Municipal Community Halls to follow National Building Regulation and Building Standards Act 103 of 1977 by promoting a safe and healthy environment by preventing healthy hazardous as per Occupational Health and Safety Act.

7.8. Roads and Transport

The Bushbuckridge Local Municipality aligns with the Ehlanzeni District Transport Plan as per the integrated plan. The Municipality envisages improving the road links network to enable access to service points. The road links network currently doesn't enable viable mobility for economic activities to be performed in the nodal area and as a result, the Municipality has planned a construction of a multi-modal taxi rank facilities through the intervention of National Treasury (NDPG).

Road infrastructure

Bushbuckridge Local Municipality's roads are characterized by poor gravel roads with unclearly defined road network links due to conditions of the roads. The entire roads infrastructure has limited storm water drainages and poor maintenance strategy and results, some tarred roads are destroyed by rains. There is also limited access to bridges to provide sufficient linkage on communities for economic engagements. The R40 road is the only provincial road which is well maintained by the Department of Roads and Transport; other provincial roads are not well maintained. The municipality has budgeted money to improve the measure economic road and roads leading to social facilities (clinics and schools). The municipality has budgeted R110 000,000 for the 2018/19 financial year for paving of streets and maintenance of existing infrastructure.

Table 10: Road infrastructure

Total km	Tarred km	Gravel km
4640	345	4 295

Transport

The community of Bushbuckridge Local Municipality depend on buses and taxis as mode of transport. In rural areas only buses are the only mode of transport, transporting people to work, school and shopping complexes for shopping. There is a problem with overloading because the transport is not enough for the communities. Most of the taxis in rural areas are not road worthy and this is a result of poor road infrastructure. Passenger trains no longer pass through the municipality since 2011 and trains only transport goods.

7.9. Operations and Maintenance

The municipality's total requirements for repairs and maintenance on all roads infrastructure is estimated at between R20 million and R30 million annually. The roads that are currently being constructed needs routine maintenance and the old roads needs to be rehabilitated before they get completely into a state of disrepair. There is also a high request for small culvert bridges all over the regions which places additional demands on the amount budgeted for roads. The total amount budgeted for operations and maintenance on Roads for the 2022/23 FY amount to R18 million. Smaller culvert bridges have been provided an additional allocation of R5, 8 million for the 2022/23 FY. The allocation is lower than the 8% norm. Total requirements for repairs and maintenance on all water infrastructure is estimated at between R100 million and R150 million considering the need to replace the old asbestos pipes, routine maintenance on all water treatment works and refurbishment of sewerage plants, especially the Mkhuhlu Sewerage plant that is very old. High level assessment of maintenance requirements conducted by RW before handing over the plants they had operated to BLM estimated backlog maintenance at R72 million which we believe to be significantly understated. The plants which had been operated by BLM require a further estimated 30m. A budget of R61, 5 million has been allocated for operational and maintenance costs of all water and sanitation infrastructure which is also lower than the 8% norm. The municipality did not provide for a cash backed Recapitalization Budget for renewal of infrastructure, however a budget has been set aside for development of Infrastructure Asset Maintenance plans which will serve as a basis for such recapitalization budget. The Maintenance plans are expected to be completed by December 2022. Finance is also currently exploring possible

avenues to fund the routine maintenance requirements, especially for the water and sanitation assets, which we believe will greatly improve the lifespan and efficiency of the assets. Savings on all own funded projects will be channeled towards providing additional O&M funds and engagements with other external stakeholders such as DWS and CoGTA to utilize savings on all conditional grants will be pursued. Additional assistance will also be sought from DWS who the owners of the Inyaka Water Purification Plant and a major pipeline are currently operated by the municipality both of which requires substantial repairs and maintenance.

CHAPTER 8: LOCAL ECONOMIC DEVELOPMENT AND ENVIRONMENT

8.1. Local Economic Development and Environment

This chapter looks into issues of Economic development and environment, on how the municipality needs to stimulate economic development and as per Constitution to promote a health and safety environment.

The Bushbuckridge Local Municipality has a potential for developing the local economic hub through our indigenous wealth in the form of agricultural farming and tourism. Agriculture and tourism can make a meaningful contribution to the local, district and the provincial Gross Domestic Product (GDP) and will have a great potential of creating economic growth and reduce the levels of unemployment.

LED Strategy/Forum

The Municipal LED strategy was adopted in 2010 and is currently under review as it's outdated. The strategy is aligned to the Integrated Development Plan and Spatial Development Framework as the master plans of the Municipality. The strategy is the compass of the institution in terms of economic development concentrating mostly on poverty alleviation and unemployment. It is also aligned to provincial economic strategies or plans. Most of the projects in the strategy are/will be implemented by sector departments. The private sector also plays an integral part in the economy of the municipality thus a high number of employment opportunities come from that sector. It made it imperative for the institution to thoroughly engage the sector when drafting the strategy.

Through the strategy and LED forum was established which is headed by Member of Mayoral Committee (MMC) of Economic Development, Planning and Environment. The Forum sits at least once quarterly. The forum has six (6) sub committees which are:

- Agriculture
- Tourism and conservations
- Mining
- Commercial and retail
- Manufacturing
- Transport and communication

The main challenges facing the implementation of the strategy are:

- Land claims- most areas in the municipality are under land claims and that has halted most projects mostly those funded by the private sector
- Land Invasion- large part of the municipality's land is under traditional authorities' leadership and that hampers the planned projects as the authorities sell land which is earmarked for economic projects
- Funding- as mentioned most of the strategy's projects are implemented by sector departments and funding is a challenge as departments don't only fund this municipality. The municipality is in the process of exploring other funding avenues other than from other sources than sector departments.

8.2. Tourism

Tourism, as already cited above, has a great potential of stimulation of economic growth, taking into account that Kruger National Park (KNP), Manyeleti and various renowned private nature reserves such as Mhala-Mhala, Sabie-Sabie, Phungwe and others are within the borders of the municipality. The municipal area also falls within the Kruger to Canyon Biosphere, which stretches northwards via Hoedspruit to Tzaneen. According to the Tourism Growth and Development Strategy that was conducted by the Department of Finance and Economic Development, tourism in the area has a competitive advantage and has a potential to contribute significantly towards accelerating growth in the tourism industry.

Table 27 GDP

Region	Total tourism spend (R-million)		Tourism spend as % of GDP (current prices)	
	2011	2015	2011	2015
<i>Ehlanzeni</i>	8 355	12 133	12.8%	14.1%
Thaba Chweu	950	1 431	14.0%	16.4%

Mbombela	3 697	5 236	10.3%	11.4%
Umjindi	156	221	2.7%	2.9%
Nkomazi	1 581	2 326	21.2%	23.3%
Bushbuckridge	1 970	2 920	21.4%	22.0%
City of Mbombela*	3 853	5 457	9.2%	10.1%

Source: Department of Economic development and Finance Mpumalanga SERO report 2020

8.3. Agriculture

Agriculture remains the potential economic development platform for the communities of Bushbuckridge through subsistence and animal farming. The Municipality intends to strengthen the existing programs that are aimed at improving the local economic development. Agriculture in the municipal area has a strong competitive advantage in terms of the climate, biodiversity, and number of dams. But this advantage is impacted by problems associated with it such as droughts, bush fires, and rural/bad farming practices. Although commercial agriculture provides bulk of the employment opportunities, approximately half of the population, particularly the youth, is unemployed. The constraints and issues related to agriculture in the municipal area are:

- ❖ Access to viable parcels of arable land.
- ❖ Management of communal grazing land; and
- ❖ Conversion from subsistence to commercial agriculture.

8.4. Gross Domestic Product

The Municipality's economic contribution towards the provincial Growth Domestic Product (GDP) continues to grow at a moderate rate.

8.5. Economic sectors performance

It is a worrying factor that community services (government) is the leading industry with employment with 42.2% and trade (20.6%). There is a huge concern that the industries with potential which is Agriculture and Tourism are not contributing as much as expected. The municipality does not have minerals for mining there's only sand mining activities.

Table 28 Economic sector performance

Local municipal area	% Contribution to Mpumalanga economy 2015	Average annual economic growth 1996-2015	Average annual economic growth 2015-2020
Bushbuckridge	4.3%	0.7%	1.7%

Source: Department of Economic development and Finance Mpumalanga SERO report 2020

The Municipality is number four in the province in terms of contribution to the GDP with a contribution of 4.3% which is an improvement compared to a period from 1996 – 2015 which was on 0.7% contribution. It is projected that for the next five years (2015-2020) it is projected that the contribution will be 1.7%.

8.6. Community Works Programme (CWP)

The CWP started in Bushbuckridge, one of South Africa's identified poverty nodes in July 2009 and build up to 3213 participants by January 2019. The work selected was done through a Participatory Rural Appraisal (PRA) village needs assessment in all 39 sub-sites / villages from 28 wards with 48 villages involved. The programme seeks to address social and economic upliftment of distressed communities which lead into improved service delivery to those communities. The programme is in four traditional councils:

- Mnisi Traditional Authority
- Malele Traditional Authority
- Sethlare Traditional Authority
- Mathibela Traditional Authority

The work done is divided into 5 subsections:

- Health
- Education
- Environment
- Social
- Agriculture

Onsite and external training is sourced for participants and all tools and materials are purchased. PPE is also provided. The programme inception was guided by a steering committee which is chaired by the ward councilor and comprises of the ward committee and other relevant parties. The programme works closely with the municipality and had been incorporated in the LED strategy. Through the establishment of a Local Reference Committee with representatives from the Local Municipality and relevant line departments, the CWP hopes to strengthen its projects and continue to develop participant capacity.

Participation breakdown

Site	YOUTH >55%			WOMAN >55%		DISABLED PARTICIPANTS >2%			
	Male	Female	Total	Male	Female	Male Youth	Male NY	Female Y	Female NY
BBR	164	789	953	509	2 665	5	12	5	28

Budget

Budget item	Amount	Percentage of total
Wages	R31,563,848	82%
Personal Protective Equipment (PPE)	R 2,280,043	6%
Tools and Materials	R 1,915,236	5%
Training and Technical Support	R2.006.438	5%
UIF/COID	R 946,915	2%
TOTAL	R 38,712,480	100%

8.7. Expanded Public Works Program

The EPWP is headed by the EPWP champion Mr. TD Chavane

Bushbuckridge Municipality has its EPWP Policy, and the purpose is to provide a framework within which the municipality and its departments implement the Expanded Public Works Programme (EPWP). This policy document is aimed to provide an enabling environment for the municipality to increase the implementation of EPWP, through the re-orientation of the line budget function and channelling a substantial amount of its overall annual budget allocation and human resources towards the implementation of EPWP. Through this policy the municipality is aimed to achieve the following objectives:

- To have **EPWP as an approved delivery strategy** for projects implementation, employment creation and skills development; by ensuring that EPWP guidelines and principles are adhered to in the implementation of any municipal project.
- To inform all Departments and Units within municipality on how their functions should contribute towards achieving the EPWP objectives; (**clarify the support function roles** further within municipalities e.g., finance, corporate service) (Acknowledge that the model varies)

- To entrench the **EPWP methodology within the IDP**;(acknowledge EPWP in the IDPs)
- To **develop skills** within communities through on-the-job and/or accredited training of workers and thereby developing sustainable capacity within communities.
- To **capacitate SMME's** and emerging contractors within local communities by facilitating the transfer of sustainable technical, managerial, and financial skills through appropriate Learnership Programmes and SMMEs development initiatives.
- Re-engineer how the planning, design and implementation programmes/projects within the existing municipal operational and capital budgets in order, to maximize **greater employment opportunities** per unit of expenditure, to maximise the percentage of the municipal's annual total budget spent and retained within local communities by promoting the procurement of goods and services from local manufacturers, suppliers and service providers.

The municipality has **R5 000 000** adding to R4 500 000 from DPWRT for 2022/23 financial year with a projected 300 people to be employed. The programme covers the following:

- Road Maintenance
- Parks and beautification
- Refuse removal
- Tourism monitors (safety)

CHAPTER 9: COMMUNITY SERVICES

This chapter looks at all social related issues in the municipality as well community facilities

9.1. Transversal Affairs

Youth Development

The Municipality has considered the youth category as the cornerstone for development, given that this category accounts for most of the population in the municipal area. To ensure the transformation process in this category, the municipality further established a youth unit which is responsible for the co-ordination of the Bushbuckridge Youth Council.

Disability affairs

In line with the Employment Equity Plan adopted by Council, Bushbuckridge Local Municipality has also established disability affairs unit that is co-ordinating and championing the interests of people living with disabilities and ensure fairness in the recruitment strategies as a matter of policy. Disability affairs is responsible for Bushbuckridge Disability Forum

Percentage of disability

Table 30: Percentage of disability

Census	%
1996	5.17
2001	4.48
2011	2.87

Source: STATS SA census 1996, 2001 and 2011

In the municipality the number of people of disability has decreased since the first democratic census in 1996 as it on 5.17% compared to 2001 census it was on 4.48% and 2011 as it was 2.87%. The municipality has built a center of disability in Marite with others planned to be implemented in the next coming financial years.

Gender: Women and Men

The municipality has adopted an Employment Equity plan to address the issue equality as most posts are occupied by males. The municipality also has a transversal unit which deals with issues of gender in the communities as to empower women who are regarded as the previously disadvantaged. Currently the municipality is in the process of developing a sectoral plan that deals with gender.

Bushbuckridge Local Municipality through Transversal Affairs unit under Community Services directorate has developed a Gender Mainstreaming strategy in 2014 which was subsequently reviewed in 2019. The strategy serves as a guiding document for the development as well as implementation of gender plans and programmes. It was developed with the collaboration of Bushbuckridge Men and Women councils and other stakeholders from sector departments and civil society organizations. The aforesaid two councils serve as advisory bodies to the municipality regarding issues of gender in the community of Bushbuckridge.

The strategy consists of the following six strategic priory areas:

- Strategic Priority Area 1: **Governance**
- Strategic Priority Area 2: **Economic Growth and Development**
- Strategic Priority Area 3: **Infrastructure Provision**
- Strategic Priority Area 4: **Social Services and Cross-Cutting Issues**
- Strategic Priority Area 5: **Institutional Transformation**
- Strategic Priority Area 6: **The Gender Management System**

IMPLEMENTED PROGRAMMES

Since the inception of this strategy plans and programmers have been developed based on the above strategic priority areas. Hereunder are the implemented programmes:

- Men’s seminar
- Women socio-economic development summit
- Reestablishment of both Men and Women Councils in 2016.
- Induction workshop for both Councils.
- Gender mainstreaming and HIV & AIDS Outreach Programmes; door to door in different communities, campaigns in taxi ranks and business complexes.
- Sanitary Towel Dignity campaign; distribution of M-cups and sanitary towels and information sharing to both boys and girls in schools.
- 16 Days of activism campaigns in different formats.
- Skills Development training for unemployed women.
- Women empowerment workshop.
- Women’s dialogue
- Men’s Indaba.
- Gender mainstreaming capacity building workshop for senior management and political leadership was conducted by both Ehlanzeni District Municipality and SALGA but cancelled in the process due to power attendance more especially from the administrative arm of the municipality.
- Men and Women councils’ meetings
- Radio presentations by the executive mayor and other stakeholders on women empowerment programmes as well as gender-based violence issues
- Gender based violence and femicide community dialogue

GBVF PLAN

Bushbuckridge municipality like the rest of the country is faced with rising cases of gender-based violence and femicide which are perpetuated by various issues within communities. As a result, a comprehensive and integrated approach is key in addressing such. The following is the plan for 2021-2022 financial year.

- Skills development programme
- Gender based violence and femicide advocacy programmes
- 16 Days of Activism for no Violence against Women and Children campaign
- 3 Men council meetings
- 3 Women Council meeting

9.2. Safety and Security

The municipality is committed to a free crime environment that seeks to protect the abuse of vulnerable children and women. The Municipality envisages achieving such through the provided facilities in the form of four (4) main police stations, which are strategically located in Thulamahashe, Maviljan, Mkhuhlu, and Acornhoek. Six (6) satellites offices located in Marite, Shatale, Dwarsloop, Lillydale, Casteel and Hluvukani with magistrate courts where main police stations are located. To complement the facilities, each demarcated ward has Community Policing Forums (CPF) that are active.

Through the involvement of the Bushbuckridge Traffic Police, the Municipality plays an important role in the reduction of road fatalities and accidents. The visibility of Safety Officers in the roads and streets of Bushbuckridge has contributed to the awareness programs in educating road users for road safety.

Serious crime reported

Table: Serious crimes

17 Serious Crimes/100 000	
2014/15	2018/19
1 066	1 158

Source: 2020 MP SERO Report

There has been an increase in serious crime reported in the municipality from 2014/15 which was at 1066 crimes reported to 1158 crimes. This is a worrying factor as the municipality together with the department of safety strives to reduce crime in the municipal area.

9.3. Licensing

The Municipality has six (6) DLTCs in Hluvukani, Acornhoek, Shatale, Thulamahashe, Bushbuckridge and Mkhuhlu that have been established in terms of the E-Natis framework.

9.4. Disaster Management

General Area Description

The Bushbuckridge Municipality covers an area of 25586.76 hectares and has an estimated population of 546 000 with towns and settlements within the region are Acornhoek, Bushbuckridge, Cottondale, Hluvukani, Marite, Mkhuhlu and Lillydale. Disaster Management is a continuous and integrated multi-sectoral and multidisciplinary process of planning and implementation of measures aimed at preventing or reducing the risk of disasters; mitigating the severity or consequences of disasters; ensuring emergency preparedness; enabling a rapid and effective response to disasters and facilitating post-disaster recovery and rehabilitation.

Figure 1 illustrates how the various work streams within Disaster Management increase and decrease in intensity and resource requirements over time as crises approach and are dealt with. The figure demonstrates that Disaster Management involves the simultaneous management of several disaster risks in various stages of the life cycle of disaster risks

The South African Government has responded to negative consequences of disasters by developing legislation (The Disaster Management Act, 2002 – Act No. 57 of 2002) and national policy (The National Disaster Management Framework, 2005) to deal with the management of disaster risk and disaster impact.

The Disaster Management Act (Act No. 57 of 2002) provides for an integrated and coordinated disaster management policy that focuses on preventing or reducing the risk of disasters, mitigating the severity of disasters, emergency preparedness, rapid and effective response to disasters and post-disaster recovery. The Act prescribes the establishment of national, provincial and municipal disaster management centers. Most importantly in the context of this document, the Act also requires the compilation of Disaster Management Plans in all spheres of government.

Legal requirement for Disaster Management Plan

The Disaster Management Act of 2002 requires each local municipality to prepare a DMP for its area according to the circumstances prevailing in the area; to coordinate and align the implementation of its Plan with those of other organs of state and institutional role-players; and to regularly review and update its Plan. The legal requirements related to Disaster management are further elaborated in the Ehlanzeni District Disaster Management Plan.

The Bushbuckridge Municipality must submit a copy of its DMP, and of any amendment to the Plan, to the DMC of the Ehlanzeni District and the National Disaster Management Centre.

Although Local Municipalities are not legislatively required to have specific Disaster Management coordinating structures, it is unlikely that a local Bushbuckridge Municipality would be able to effectively conduct a participative Disaster Management planning process in the absence of some or other Disaster Management coordinating structure within the Bushbuckridge Municipality. It is recommended that each Bushbuckridge Municipality should at least have an internal Disaster Management coordinating body such as an Inter-Departmental Disaster Management Committee. The additional establishment of an advisory forum is strongly recommended to co-ordinate Disaster Management policy within the Bushbuckridge Municipality and enable stakeholder involvement in Disaster Management matters.

Disaster Management has become one of the key components of an IDP's credibility. Section 26(g) of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) lists 'applicable disaster management plans' as core components of an IDP. The next section focuses on the relationship between Disaster Management and the IDP

Linkage with the Integrated Development Plan of the Bushbuckridge Municipality

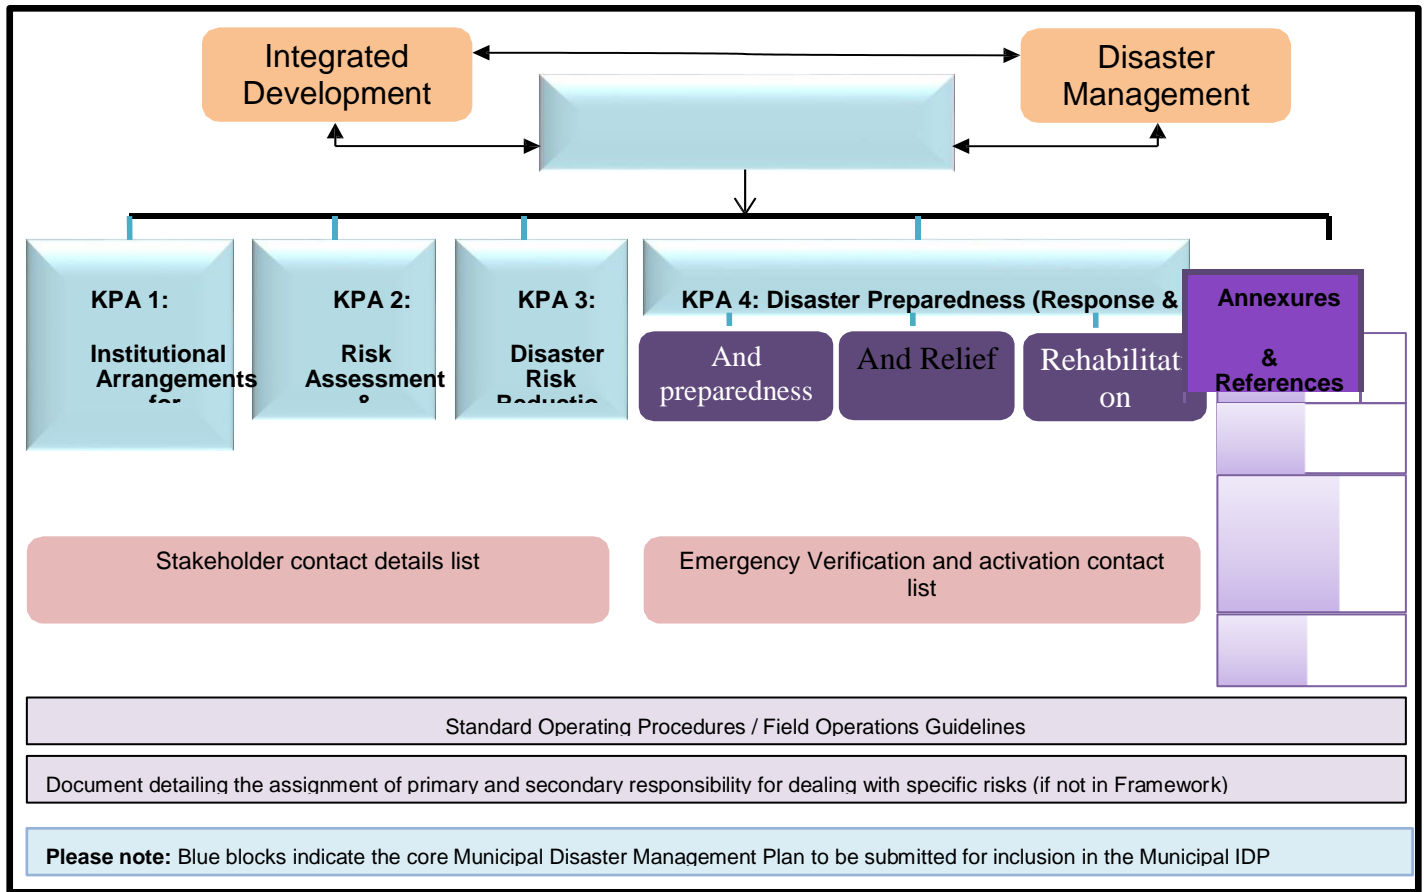

It is strongly recommended that the Bushbuckridge Municipality institutes the compulsory consideration of Disaster Risk Management in the planning and execution stages of all IDP projects. This will ensure the integration of Disaster Management into the IDP and will ensure that all plans and projects are focused on contribution to disaster risk reduction and disaster preparedness – thus receiving the impact of disaster on lives, property, community activities, the economy and the environment in the Bushbuckridge Municipality.

A more detailed discussion of the linkage between disasters and development, and between the IDP and the DMP, is provided in the corresponding section of the Ehlazeni District Disaster Management Plan.

The Municipal Systems Act and the Disaster Management Act requires the inclusion of the DMP of the Bushbuckridge Municipality into the Integrated Development Plan (IDP) of the Bushbuckridge Municipality.

Structure of the Bushbuckridge Municipality Disaster Management Plan

The Municipal DMP is based on the legal requirements described above and consists of the components. In order to comply with the National Disaster Management Framework (NDMF), the Bushbuckridge Municipality Disaster Management Plan is structured around the four KPA's of the NDMF which is also reflected in the Provincial and Ehlazeni Disaster Management Framework

Structure of the Municipal Disaster Management Plan

As indicated in the figure, the four key components of the Plan are:

- KPA 1: Institutional arrangements for Disaster Management (Institutional Capacity)
- KPA 2: Risk Assessment and Risk Profile
- KPA 3: Disaster Risk Reduction
- KPA 4: Disaster Preparedness (Response & Relief) Plan

KPA 1: INSTITUTIONAL CAPACITY

This section describes the planning for institutional capacity for Disaster Management within the Bushbuckridge Municipality, in accordance with KPA 1 of the NDMF.

Current Institutional Arrangements within the Bushbuckridge Municipality

The Bushbuckridge Municipality is composed of a political structure (Council) consisting of proportional and ward behavior, supported by an administrative structure of officials.

The Council elects a Mayor who appoints a Mayoral Committee with defined responsibilities collected into portfolios for members of the Mayoral Committee (MMCs) as illustrated in the figure below.

The current placement of Disaster Management in the Bushbuckridge Municipality

While there is evidence of a lack of human resources dedicated to Disaster Management within the Bushbuckridge Municipality, it is not easy to correct such a shortage over the short term. A phased approach of increasing dedicated Disaster Management would be a more realistic recommendation.

Emergency preparedness within the Bushbuckridge Municipality is a challenge with so little staff and the following recommendations can be made:

A standby roster should be established where other staff (from the same department, another department within the Bushbuckridge Municipality or even other Local Municipality Disaster Management Staff within the District or District staff) are added as first and second call duty officers for the Bushbuckridge Municipality in order to ensure that limitations on standby periods are not exceeded and that the function can continue in the temporary absence of the incumbent.

- Persons who are put on the standby list should be provided with adequate training and equipment and must be familiar with this plan.
- Standby lists for the Bushbuckridge Municipality should be linked to standby lists at Ehlanzeni District and Mpumalanga Provincial level, from where assistance could be requested if the Bushbuckridge Municipality's capacity is exceeded.
- Mutual aid agreements with adjoining Municipalities can improve emergency preparedness and should be compiled for approval by the various councils

Bushbuckridge Municipality Disaster Management

This is the department within the Bushbuckridge Municipality assigned with the Disaster Management function. A LM is not legally obliged to establish a DMC, but it is recommended.

The Disaster Management structure / DMC of the Bushbuckridge Municipality must aim to prevent or reduce the risk of disasters, mitigate the severity or consequences of disasters, prepare for emergencies, respond rapidly and effectively to disasters, prepare for emergencies, respond rapidly and effectively to disaster and to implement post-disaster recovery and rehabilitation within the Bushbuckridge Municipality by monitoring, integrating, coordinating and directing the Disaster Management activities of all role-players.

A fully established and functioning Municipal DMC is a key element of this Plan.

Action: The Bushbuckridge Municipality will establish and maintain a fully staffed and resourced DMC.

Figure 5 indicates the suggested behavior design for a Disaster Management Centre which uses a combination of functional behavior and area-based management. This structure is based on best practice and the recommendations contained within the National Disaster Management Framework, taking into consideration existing capacity and that capacity may have to be built in phases over time. Solid outlined elements refer to the categories of functions to be performed and not individual posts. Depending on resources, each category of functions can be expanded into several post descriptions or rolled up into fewer separate positions. Solid lines refer to lines of authority and reporting within the Bushbuckridge Municipality. Elements with dashed outlines refer to co-ordination, consultation and policy-making structures while dashed connecting lines refer to lines of consultation and collaboration.

Municipal Disaster Management Advisory Forum

Metropolitan or District Municipalities may establish a District Disaster Management Advisory Forum as described in Section 51 of the Disaster Management Act, 2002. Local Municipalities are not required but are encouraged to establish such a forum to coordinate strategic issues related to Disaster Management such as Risk Assessments and to approve and/or review the DMP for the Bushbuckridge Municipality before it is submitted to Council. The frequency of meetings of such a body is 2 to 4 times per year or as required. Once established, such a forum can play an important role in setting policy and priorities for Disaster Management within the Bushbuckridge Municipality and reviewing Risk Assessments and plans from time to time.

The Terms of Reference of the Forum is its founding statement and will determine its functioning. Alternative existing coordination structures may also be used to perform the functions of an Advisory Forum, thereby reducing administration and costs. Where other existing coordination structures are available to perform the envisaged functions of an Advisory Forum, it would be prudent to reduce costs and administration and use existing structures instead of creating a new dedicated structure.

Action: The Bushbuckridge Municipality will consider the establishment of a dedicated body for interdepartmental Disaster Management coordination or will assign this responsibility to the top management team (of officials) of the Bushbuckridge Municipality. The Bushbuckridge Municipality will also consider the establishment of a Disaster Management Advisory Forum and implement its decision in this regard.

Departmental planning groups

This element relates to planning groups that can be established within departments within the Bushbuckridge Municipality to deal with internal Disaster Management issues such as the compilation of Departmental Disaster Management Plans and contingency plans for facilities and services of the Department. The Disaster Management nodal points of such Departments will be involved in these planning groups. In a less complex design these groups can be integrated with others to become technical task teams.

Action: Nodal points will be empowered and supported by their departments / behaviors to establish, manage, and participate in Departmental planning groups.

Risk reduction project teams

These are multi-disciplinary project team convened to address and reduce a specific disaster risk. The teams are convened by the primary role-player for the risk and supported by Disaster Management. In a less complex design these teams can be integrated with others to become technical task teams.

Action: The primary role-players for specific hazards or disaster risks, in collaboration with Bushbuckridge Disaster Management, will establish and manage risk-reduction project teams as required or when requested by the Disaster Management Advisory Forum. (Existing structures should be used as far as possible to prevent duplication and reduce the meeting burden on role-players.)

Preparedness planning groups

A multi-disciplinary planning group convened to ensure a high level of preparedness for a specific disaster risk. Convened by the primary role-player for the risk and supported by Disaster Management. In a less complex design these groups can be integrated with others to become technical task teams.

Action: The primary role-players for specific hazards or disaster risks, in collaboration with Bushbuckridge Disaster Management, will establish and manage preparedness planning groups as required or when requested by the Disaster Management Advisory Forum. (Existing structures should be used as far as possible to prevent duplication and reduce the meeting burden on role-players.)

Joint response & relief management teams

Mostly flowing from a preparedness planning group, this is a team that is 87ehavior87 to deal with the immediate response & relief required during or immediately after major incidents and disasters. Such teams will normally convene in the Disaster Operations Centre (see description below). In a less complex design these teams can be integrated with others to become technical task teams.

Action: The preparedness planning group for each hazard will detail how the activation of a joint response and relief management team for that specific hazard will be managed, and who will form part of the team.

Recovery & rehabilitation project teams

These are project teams managing recovery and rehabilitation after disasters, mostly on a project-management basis. Disaster recovery and rehabilitation must focus on risk elimination or mitigation. Departments who are responsible for the maintenance of specific infrastructure are also responsible for the repair or replacement of such infrastructure after disasters. In a less complex design these teams can be integrated with others to become technical task teams.

Action: The preparedness planning group for each hazard will detail how the activation of recovery and rehabilitation project teams for that specific hazard will be managed, and who will form part of the teams.

Technical Task Teams

The establishment of task teams that deals with several elements of the disaster management process for a cluster of hazards can ensure hazard specific research, risk prevention and reduction, mitigation, and preparedness measures. A more detailed description of the establishment, responsibilities and possible functioning of these task teams is provided in the corresponding section of the Ehlanzeni District Disaster Management Plan.

Action: The Bushbuckridge Municipality will consider the establishment of Task Teams responsible for clusters of hazards and implement its decision in this regard

Bushbuckridge Municipality Disaster Management Communications Centre

This is the centre providing 24-hour emergency and essential services contact points to the public within the Municipal area. The Centre is responsible for day-to-day emergency response by Municipal Departments and for the establishment of strategic communication links. The Bushbuckridge Municipality Disaster Management Communications Centre will liaise closely with the Emergency Control Centers / Groups of other Local Municipalities, the Ehlanzeni District Disaster Management Centre and other Stakeholders within the Bushbuckridge Municipality on an on-going basis.

It would be possible to reduce costs and increase inter-service collaboration by combining the responsibilities and functions of emergency services, fire control centers and law enforcement control centers in one facility with the Disaster Management Communications Centre.

Action: Bushbuckridge Disaster Management will establish and maintain a fully staffed and resourced Disaster Management Communications Centre and if required collaborate with other agencies to maintain 24-hour per day, 7 days per week public emergency call-taking capacity.

Bushbuckridge Disaster Operations Centre (DOC) / Joint Operations Centre (JOC)

The Bushbuckridge DOC is a facility equipped to serve as command and coordination Centre during disasters, where the joint response & relief management team will convene. Alternative facilities should be identified as back-up to the primary DOC. The term JOC for Joint Operations Centre can also be used for this facility.

Action: Bushbuckridge Disaster Management will identify, establish and maintain a fully staffed and resourced Disaster Operations Centre for activation as required and will identify fallback or alternative facilities for the same purpose. Figure 6 illustrates how the components described above would interact with each other. It is important to note that this is a proposed structure, but rather a proposal in terms of lines of communication and collaboration

KPA 2: RISK ASSESSMENT

Disaster Risk Assessment is the first step in planning an effective Disaster Risk Reduction programme. A Disaster Risk Assessment examines the likelihood and outcomes of expected disaster events. This includes investigating the related hazards and conditions of vulnerability that increase the chance of loss.

Risk Profile of the Bushbuckridge Municipality

Various disaster risks have been identified and assessed as set out in detail in the District Risk Assessment Report accompanying the Ehlanzeni District Disaster Management Plan.

The first step in developing a risk profile is hazard identification. A hazard is a potentially damaging physical event, phenomenon, or human activity, which may cause the loss of life or injury, property damage, social and economic disruption or environmental degradation. Hazards are typically behavior into Natural, Technological and Environmental hazards.

Natural hazards are natural processes or phenomena occurring in the biosphere that may constitute a damaging event. Natural Hazards are typically classified into:

- Geological Hazards:* Natural earth processes or phenomena in the biosphere, which include geological, neo-tectonic, geo-physical, geo-morphological, geo-technical and hydro-geological nature.
- Hydro Meteorological Hazards:* Natural processes or phenomena of atmospheric, hydrological, or oceanographic nature; and
- Biological Hazards:* Processes of organic origin or those conveyed by biological vectors, including exposure to pathogenic micro-organisms, toxins and bioactive substances.

Technological hazards constitute danger originating from technological or industrial accidents, dangerous procedures or certain human activities, which may cause the loss of life or injury, property damage, social and economic degradation.

Environmental hazards are processes induced by human behavior and activities (sometimes combined with natural hazards), that damage the natural resource base or adversely alter natural processes or ecosystems.

To identify the typical hazards in the Bushbuckridge Municipality a checklist was compiled which was completed by all Municipalities during the consultative workshops. These checklists were returned to the Project Team listing the hazards as indicated in the following table

Table 3: Identified hazards in EDM

Natural Hazards		
Hydro Meteorological Hazards		
Drought		Hail storms
Erosion		Severe storms
Fire		Violent wind/Tornado
Flood		Mist
Biological Hazards		
Human diseases		Veld fires
Animal disease		
Geological Hazards		
Landslide		
Technological Hazards		
Sewerage and drainage Infrastructure failure		Hazardous material by road
Road accidents		Industrial accidents
Illegal Dumping		
Environmental hazards		
Air pollution	Water pollution	Soil contamination

The above lists illustrate the types of disasters that pose the highest risks within the area of the Bushbuckridge Municipality and their possible effects. The communities at risk can be derived from the risk lists and are also shown in the risk assessment that was conducted for the area. More detailed risk descriptions, inclusive of hazards, vulnerability, and capacity descriptions, are available in the detailed Risk Assessment document which accompanies the Ehlanzeni District Disaster Management Plan.

Total Risk Maps

The total vulnerability, hazard, and risk maps of the Bushbuckridge Municipality within the context of the Ehlanzeni District are illustrated in the Ehlanzeni District Risk Assessment Report. The vulnerability maps include the total societal, environmental, economic, and critical facilities vulnerability, which were overlaid and recalculated to produce the total vulnerability map.

Risk Summary

In this section the results of the Risk Assessment conducted within the EDM behavior.

The table below provides a district-wide view of which hazards were found to be most prevalent within the district, influencing most local municipalities.

Common Hazards

Hazards are typically classified into:		
<p><i>Geological Hazards:</i> Geological hazards include internal earth processes, such as earthquakes and related geophysical processes such as mass movements, landslides, rockslides, surface collapses, debris or mud flows.</p>	<p>Earthquake-related Slope instability-related Coastal zone process-related Cosmic-related</p>	<p>Landslides, rock fall and mudflow</p>
<p><i>Hydro-Meteorological Hazards:</i> Natural processes or phenomena of atmospheric, hydrological or oceanographic nature.</p>	<p>Atmosphere-related Water-related</p>	<p>Severe storms (hail and snow) Floods Strong wind Tornadoes Thunderstorms and lightning Mist (fog) Heat waves</p>
<p><i>Biological Hazards:</i> Processes of organic origin or those conveyed by biological vectors, including exposure to pathogenic micro- organisms, toxins and bioactive substances.</p>	<p>Animal diseases Human diseases Veld fire risk</p>	<p><i>Human diseases:</i> Cholera Malaria HIV/Aids Tuberculosis (TB) <i>Animal diseases:</i> Foot and Mouth Disease (FMD) African Swine Fever (ASF) Rabies (Animals) <i>Veld fires</i> HAZMAT (fire/spill/leak/explosion/road spills) Transport accidents (aircraft, rail, and road) Structural collapse (failure) Fire structural (formal and informal) Sink holes (dolomite) Slime dams (tailing dams) Floods (storm water) Dam failure <i>Service delivery failure or disruption:</i> - Sewerage and drainage. - Solid waste disposal and refuse removal services. - Electricity supply disruption. - Water supply (rural/informal settlements); - Telecommunications and IT.</p>
<p>TECHNOLOGICAL HAZARDS: Technological hazards are defined as danger originating from technological or industrial accidents, dangerous procedures or certain human activities, which may cause the loss of life or injury, property damage, social and economic degradation.</p>	<p>Transport Incidents Urban and/or Industrial incidents Critical infrastructure disruption Key national points Socio-economic disruption</p>	<p>Ground/soil pollution Air pollution Water pollution (surface and groundwater) Desertification Deforestation Erosion Overgrazing Endemism Land Degradation</p>
<p>ENVIRONMENTAL HAZARDS: These are processes induced by human behavior and activities (sometimes combined with natural hazards), that damage the natural resource base or adversely alter natural processes or ecosystems².</p>		

KPA 3: DISASTER RISK REDUCTION

Disaster Risk Reduction involves focused activities to reduce vulnerability, increase capacity and resilience, and avoid or reduce hazards that may affect specific elements at risk.

Disaster Risk Reduction plans providing for prevention and mitigation strategies have been compiled based on best practice and capacity within the Bushbuckridge Municipality.

The risk reduction plans outline in this document and its annexure which are implementable must be considered for inclusion with the IDP projects of the Bushbuckridge Municipality and if included must be budgeted for in terms of the operating and

capital budget of the Bushbuckridge Municipality. Each project should be evaluated to determine which municipal department can lead its implementation. When a lead department is assigned through consensus in the DMAF, such a lead department must manage all planning and budgeting processes for said projects. The Disaster Management Department of the Bushbuckridge Municipality must assist in this regard.

Where the proposed project falls outside the mandate of the Bushbuckridge Municipality, the Bushbuckridge Municipality should establish a lobbying and monitoring mechanisms to motivate the need for the project in the correct governmental or societal sector and to track progress on the project. It is anticipated that many projects will need to be executed on a partnership level, and in such cases the department of the Bushbuckridge Municipality responsible for service delivery partnerships should take the lead with support from the Bushbuckridge Municipality DMC.

Risk Reduction Process

The success of risk reduction efforts will rely heavily on the results of a thorough Disaster Risk Assessment (hazard and vulnerability assessment). The completion of a detailed Risk Assessment is a prerequisite for this process. Community-based risk mapping and Risk Assessments can also provide valuable information to base Risk Reduction Planning on.

Using the Risk Assessment, the first step in Risk Reduction will be to identify priority risks. For each priority risk, the following process should be followed:

- Analyze the risk, through consultation if required.
- Determine stakeholders who can influence the risk (hazard / vulnerability / capacity).
- Convene stakeholders meeting.
- Determine primary and secondary responsibility on a consensus basis (this might already be in place – see Institutional Capacity chapter).
- Develop risk reduction strategy options in a participative manner.
- Evaluate the developed risk reduction strategy options.
- Decide on most viable risk reduction strategies and describe these in detailed project proposals.
- Submit project proposals to DMAF.
- Upon project approval from the DMAF, perform project initiation (if the project is within the mandate of the district it can be submitted to the IDP office at this stage for inclusion in the IDP process).
- Convene a project team:
 - Appoint a project manager (from discipline with primary responsibility for the hazard, vulnerability, or capacity).
 - Appoint an internal project facilitator / manager within the Bushbuckridge Municipality’s DMC.
 - Confirm project team (Stakeholders).
 - Confirm project sponsor.
 - Confirm project champion.
- Perform project scoping:
 - Develop work breakdown structure.
 - Determine milestones and objectives.
 - Confirm critical path.
 - Establish monitoring & evaluation mechanism.
 - Determine budget required.
- Project implementation:
 - Implement, monitor & evaluate.
 - Project review and change control; and
 - Project close-out

Risk Reduction Proposals for the Bushbuckridge Municipality

Risk Reduction Project Proposals for priority risks are listed in the tables below. This risk reduction process is summarized in the previous sub-section. It is important that these proposals are shared with the relevant planning and implementing agencies.

Disaster Risk Project Proposals: Sewerage and Drainage and/or Refuse Removal

Risk Reduction Category	Risk Reduction Project Proposals
Engineering & Construction Measures	1. Build bigger diameter pipes under low-water bridges and ensure proper design
	2. Treat waste before discharging

Economic Measures	3. Budget for infrastructure and maintenance
Management & Institutional Measures	4. Keep rivers clean and cleared (flotsam can block pipes under bridges)
	5. Outsource cleaning or waste treatment services. In addition, focus on employment of local community
Societal Measures	6. Education (understanding of sanitation and hygiene)

Disaster Risk Project Proposals: Water Supply Disruption

Risk Reduction Category	Risk Reduction Project Proposals
Engineering & Construction Measures	1. Build bigger diameter pipes under low-water bridges and ensure proper design. Definition of measures to be included in the mitigation plan, such as: retrofitting projects, improvement of watersheds, and evaluation of foundations and structure
	2. Identification and quantification of hazards that can affect the system, whether they are natural or derive from human activity
	3. Estimation of the susceptibility to damage of components that are considered essential to providing water in case of disaster
	4. Review and implement water saving techniques i.e. rainwater harvesting, building dams and treating raw water (i.e. sand filtration systems or desalinization technology).
Economic Measures	5. Budget for infrastructure and maintenance
Management & Institutional Measures	6. Keep rivers clean and cleared (flotsam can block pipes under bridges)
	7. Identification of measures and procedures for developing an emergency plan. This will assist the water service company to supplement services
	8. Determination of critical assets that might be subject to malevolent acts that could result in undesired consequences,
Societal Measures	9. Education (of water saving techniques)

Disaster Risk Project Proposals: Groundwater Pollution and/or Ground/Soil Pollution

Risk Reduction Category	Risk Reduction Project Proposals
Physical Planning Measures	1. Reduce density of pit latrines (requires reducing the density of informal settlements)
	2. Protect springs, rivers and other water sources.
Engineering and Construction Measures	3. Ensure sufficient number of refuse bins available
	4. Provide water supply schemes
	5. Construct drinking troughs for livestock
	6. Line VIP pits
	7. Pit content removal or chemical treatment (Issue of affordability, chemicals may also affect ground water)
	8. Lining of graves
	9. Urinal diversion / bio digesters / anaerobic process. Left with fertilizer
	10. Construct water reservoirs.
Management & Institutional Measures	11. Conduct a geo-hydrological study of the high-risk areas.
	12. Law enforcement and monitoring and investigation of illegal dumping
	13. Ground Water Pollution Management Plan – includes taking water samples and testing it.
	14. Improve solid waste removal services
	15. Control and monitor agricultural pollution using fertilizers
	16. Monitor and evaluate the treatment of water drinking sources on a regular basis.
Societal Measures	17. Education (understanding of water pollution)
	18. Promote health and hygiene education
	19. Promote waste management and recycling.
	20. Promote utilizing organic fertilizer.

The risk-specific Risk Reduction project proposals mentioned in the table above will, if properly planned and implemented, contribute towards the reduction of disaster risk within the Bushbuckridge Municipality.

The Risk Reduction Plans outlined here which are implementable must be considered for inclusion within the IDP projects of the Bushbuckridge Municipality and if included must be budgeted for in terms of the operating and capital budgets of the Bushbuckridge Municipality. Each project should be evaluated to determine which municipal department can lead its implementation. When a lead department is assigned through consensus in the DMAF, such a lead department must manage all planning and budgeting processes for said project. The Disaster Management Department of the BLM must assist in this regard.

Where the proposed project falls outside the mandate of the Bushbuckridge Municipality, the Bushbuckridge Municipality should establish a lobbying and monitoring mechanism to motivate the need for the project in the correct governmental or societal sector and to track progress on the project. It is anticipated that many projects will need to be executed on a partnership level, and in such cases the department of the Bushbuckridge Municipality responsible for service delivery partnerships should take the lead with support from the Ehlanzeni Disaster Management Centre.

Risk reduction capacity for the Bushbuckridge Municipality

The organizational structure for risk reduction within the Bushbuckridge Municipality includes Disaster Management, the Disaster Management Advisory Forum, the top management team of the Bushbuckridge Municipality, the nodal points for Disaster Management within Municipal Departments within the Bushbuckridge Municipality, departmental planning groups, risk reduction project teams and preparedness planning groups.

The total structure of the Bushbuckridge Municipality, with every member of personnel and every resource should also be committed to Disaster Risk Reduction.

On-going capacity building programmes will be required to ensure the availability of adequate capacity for Risk reduction.

Preparedness Capacity for the Bushbuckridge Municipality

The organizational structure for preparedness within the Bushbuckridge Municipality includes Bushbuckridge Municipality Disaster Management, Disaster Management representatives of the Ehlanzeni District and adjoining local municipalities, the Disaster Management Advisory Forum, the top management team of the Bushbuckridge Municipality, the focal points for Disaster Management within departments within the Bushbuckridge Municipality, departmental planning groups, preparedness planning groups, Joint Response & Relief Management Teams, Recovery & Rehabilitation Project Teams, and the Disaster Management Communications Centre.

The total structure of the Bushbuckridge Municipality, with every member of personnel and every resource can potentially form part of preparedness capacity.

On-going capacity building programmes will be required to ensure the availability of adequate capacity for disaster preparedness.

The Bushbuckridge Municipality Disaster Management Communications Centre is responsible for the operational procedures associated with day-to-day operational response to emergencies by municipal departments. The Bushbuckridge Municipality Disaster Management Communications Centre and the Bushbuckridge Municipality top management team are jointly responsible for the emergency management policy framework and organization that will be utilized to mitigate any significant emergency or disaster affecting the Bushbuckridge Municipality.

9.5. Environmental and Waste Management

Geographic Overview

The Bushbuckridge LM covers an area of approximately 10 248 km² and is the largest local Municipality in the Ehlanzeni District Municipality (Municipalities SA, 2017). The Bushbuckridge LM displays typical undulating highveld topography with height above sea level ranging from 1100m in the west to 180m in the east. Bushbuckridge Local Municipality (previously known as Lowveld Local Municipality) is a category B municipality that forms part of the four Local Municipalities of the Ehlanzeni District Municipality in the Mpumalanga Province. It is renowned for its agricultural and tourism attractions, and it was declared a nodal point by the president of the republic in 2001, it is located in the north-eastern part of the Mpumalanga Province and is bounded by Mozambique in the east, city of Mbombela Local Municipality in the South and Thaba Chweu local municipality in the Southwest. Bushbuckridge Local municipality comprises of 135 settlements and 38 wards. The municipality is the largest local municipality with the inclusion of the Kruger National Park. It can be accessed via R40 and R533 national roads from the southern part of the district.

Waste Management

Legal context

Waste act (National Environmental Management: Waste Act (Act No. 59 of 2008)

It is the core law that deals with the waste management plans. The NEMWA is being implemented through the National Waste Management Strategy (NWMS) which was approved by DEA cabinet in 2011ns. Section 2 of the Act describes the objectives of the Act as follow: To protect health, well-being, and the environment by providing reasonable measures for:

- i. Minimizing the consumption of natural resources.
- ii. Avoiding and minimizing the generation of waste.
- iii. Reducing, re-using, recycling, and recovering waste.
- iv. Treating and safely disposing of waste as a last resort.
- v. Preventing pollution and ecological degradation.
- vi. Securing ecologically sustainable development while promoting justifiable economic and social development.
- vii. Promoting and ensuring the effective delivery of waste services.
- viii. Remediating land where contamination presents, or may present, a significant risk of harm to health or the environment.
- ix. Achieving integrated waste management reporting and planning.

The Act requires each municipality to produce an Integrated Waste Management Plan (IWMP) and to submit this plan to the MEC for approval. The approved IWMP must be included in the municipal Integrated Development Plan (IDP). Before finalizing the IWMP the municipality is required to follow the consultative process as defined in section 29 of the Municipal Systems Act.

The National Waste Management Strategy (DEA, 2011) NWMS is a legislative requirement of the Waste Act, 2008 (Act No. 59 of 2008).

The purpose of the NWMS (DEA, 2011) is to achieve the objects of the Waste Act. Organs of state and affected persons are obliged to give effect to the NWMS.

The overall purpose of the strategy is to give effect to the objects of the Waste Act, which are to protect health, well-being and the environment through sound waste management and application of the waste management hierarchy. The strategy provides a plan to give practical effect to the Waste Act, and as such it seeks to ensure that responsibility for waste management is properly apportioned.

Municipal System Act

All municipalities must draft integrated development plans (IDP's) in terms of the Municipal System Act, 2000. The resultant integrated environmental programmes must be aligned and in accordance with provincial and national plans, policies and strategies.

The National Domestic Waste Collection Standards (2011)

The setting of these standards was informed by various documents, including the constitution of South Africa and Waste Act. These standards outline the level of waste collection services from the separation at source, collection of recyclable waste based on these principles: – Equity – Affordability and availability of resources within municipalities – Clarity and ease at which the standards can be implemented – Practicality – Community participation in design of applicable and appropriate collection systems

Polokwane Declaration of waste management (2001)

In 2001 representatives from all three government levels, civil society and business met at Polokwane to formulate a declaration on waste management. In its preamble the declaration realizes that there is a need for urgent action to reduce, reuse and recycle waste. Furthermore, the represented sectors recommitted themselves to the objectives of an integrated pollution and waste management policy. A goal was set to reduce waste generation and disposal by 50% and 25% respectively by 2012 and to develop a plan for zero waste by 2022.

White Paper on Integrated Pollution and Waste Management (2000)

One of the fundamental approaches in terms of the White Paper's policy is to prevent pollution, minimize waste and to control and remediate impacts. Waste management is to be implemented in a holistic and integrated manner, extending over the entire waste cycle from cradle to grave. The White Paper advocates a shift from the present focus on waste disposal and impact control (i.e., end of pipe) to integrated waste management and prevention as well as minimization. In terms of legal changes this will entail national government drafting legislation requiring the prevention and minimization of waste.

Minimum requirements for waste disposal by landfill

This document presents the procedures, actions and information which may be required from an applicant when permitting a landfill, or written into a permit as conditions, are set out in the form of Minimum Requirements. The objective of setting Minimum Requirements is to take pro-active steps to prevent the degradation of water quality and environment, and to improve the standard of waste disposal in South Africa to ensure practical and affordable environmental protection, graded requirements are applied to different classes of landfill.

Guidelines for the Development of Integrated Waste Management Plans (IWMPs)

The IWMP Guidelines document from DEA provide a comprehensive detail for the compilation of Integrated Waste Management Plans which includes an overview of current waste management processes within the municipality, also presents the demographics, challenges, and also future projections on waste management.

Current Waste Management status within BLM

Bushbuckridge Local Municipality is currently providing services on refuse removal at least once a week in the CBDs areas which include the areas around its 11 regions.

Table 30: Waste removal

Type of waste removal	Number of community members receiving service
Removed by local authority/private company/community members at least once a week	17873
Removed by local authority/private company/community members less often than once a week	3723
Communal refuse dump	16660
Communal container/central collection point	1867
Own refuse dump	467290
Dump or leave rubbish anywhere (no rubbish disposal)	33493
Other	7854

Source: STATS SA CS 2016

The total number of community members who receives refuse removal at least once a week is 17873 and those that receives services more than twice a week is 3723. However, the majority are those who owns their dump sites which is about 467 290. This is since most of the household’s population within the municipality is rural, therefore illegal dumping and backyard burning is constant within the municipality area.

Waste Types

a. Household Waste

Households are one of the sources of waste generated within the municipality. Household waste generated has a major impact on the total amount of waste going to the dumpsites and it requires to be quantified in order to be managed and plan for future projections. Quantifying of waste has huge challenges in places where there are no facilities like weighbridges to determine the amount of waste that goes to the landfill. The weighbridge method is the most accurate method that the municipality should use to record the quantity of waste entering the site.

b. Hazardous Waste (Medical Waste)

There are three public hospitals within the municipality namely Mapulaneng Hospital, Tintswalo Hospital located in Acornhoek and Matikwana Hospital in Mkhuhlu area. A private company called Buhle Waste cc is responsible for collecting medical waste in these hospitals and clinics and other health facilities for the whole Mpumalanga Province. Buhle Waste collects all medical waste within the municipality on Monday, Wednesday and Fridays. Then the municipality collects general waste twice a week and other times delays to collect.

c. Waste Minimization and Recycling Initiatives

Bushbuckridge Local Municipality lacks effective recycling initiatives programmes, however other private recycling organization like Tombson from Sappi and Monti Recycling do collect recyclable waste (boxes and cardboards) in the central

complexes such as Twin City in ward 9 and other complexes. Recovering of recyclable waste by informal recyclers at the landfill sites. Municipality is having plans to formalize the sector and assist on PPE equipment.

d. Waste Treatment and Buy Back Facilities

No waste treatment facilities within the municipality, however, it was noted that there are areas such as in Dwarsloop Shopping Centre where the separation at source is being applied which is a good initiative to reduce the amount of waste that goes to the landfill sites. There is only one buyback facility located in Acornhoek Village where segregation of waste occurs and being transported to recycling facilities.

BLM Waste Disposal Facilities

Bushbuckridge Local Municipality has 8 disposal sites namely Maviljan, Dwarsloop, Shatale, Casteel, Acornhoek, Thulamahashe, Regional and Mkhuhlu Landfill, situated across 11 of its regions. 4 of the Disposal sites are operational and 4 are not including the Regional Disposal in Thulamahashe which is under construction. All of these disposal sites started as illegal dumping hot spots where the community dumps their waste and eventually the municipality formalized it as the formal dumping sites. None of the disposal sites has a weighbridge either access control or daily cover of waste.

Littering and Illegal Disposal

Littering and illegal disposal is a serious challenge in the municipality with the open spaces being targeted the most. These are anthropogenic issues that are being influenced by several possible factors that are occurring both internally and public domains. Internally it is a requirement of the municipality to ensure that it provides adequate waste management to the society within its jurisdiction as collection delays and poor services leads to illegal dumping and littering in the open environment. Shortage of awareness and education in waste management issues of the public leads to illegal dumping within the municipality. In BLM these challenges were most noted where littering alongside to national and other roads, more dumping of building rubble and other in open spaces. All the dumping hotspots that were noted during the site visits were mapped to help the municipality on clearing them and be able to plan for future waste initiatives.

Recycling

Recycling initiatives are mainly informal, and plans are in place to formalize recycling initiatives by establishing a recycling center. The intervention will assist the municipality in improving landfill space-saving targets for the proposed permitted landfill site and will reduce the burden on the current illegal dumpsites which are to be decommissioned and rehabilitated. Separation at source pilot projects will be conducted throughout the municipality to support the recycling facilities and meet waste minimization targets.

Air Quality Management

The NEM: AQA 2004 aims to provide reasonable measures to prevent air pollution and give effect to Section 24 of the Constitution (South Africa, 1996). Section 15(2) of the NEM: AQA 2004 states that local authorities are required to develop AQMPs which should be included in their Integrated Development Plans (IDP) (Act No. 39, 2005) as required in terms of Chapter 5 of the Municipal Systems Act (Act No. 32, 2000).

The Act makes provision for the setting and formulation of national ambient air quality standards for 'substances or mixtures of substances which present a threat to health, well-being or the environment' (Act No. 39, 2005). More stringent standards can be established at the provincial and local levels. The control and management of emissions in the NEM: AQA relates to the listing of activities that are sources of emissions and the issuing of emission licenses. In 2014, the National Environmental Management: Air Quality Amendment Act (Act No. 20, 2014) was published.

Listed Activities are defined as "activities which result in atmospheric emissions, which have or may have a significant detrimental effect on the environment, including health, social conditions, economic conditions, ecological conditions or cultural heritage." The South African Listed Activities were initially promulgated in 2010 (Government Notice No. 248, 2010), amended in 2013 (Government Notice No. 893, 2013) and further amended in 2015 (Government Notice No. 551, 2015). Any activity that falls within this list is required to have an Atmospheric Emissions License (AEL) to operate. Consequences of unlawful conduct of a Listed Activity are set out in the National Environmental Management: Air Quality Amendment Act (Act No. 20, 2014). The issuing of emission licenses for Listed Activities is the responsibility of the metropolitan and District Municipalities. Municipalities are required to 'designate an air quality officer to be responsible for coordinating matters pertaining to air quality management in the Municipality' (Act No. 39, 2005). The appointed Air Quality Officer will be responsible for the issuing of AELs. The current list of Listed Activities includes combustion installations, the petroleum industry (the production of gaseous and liquid fuels as well as petrochemicals from crude oil, coal, gas or biomass), carbonization and coal gasification, the metallurgical industry, mineral processing, the storage and handling organic chemicals industry, inorganic chemicals industry, thermal treatment of hazardous and general waste, pulp and paper manufacturing activities (including by-products recovery), and animal matter processing.

The Municipal Systems Act as read with the Municipal Financial Management Act (Act No. 56, 2003) requires Municipalities to budget for and provide proper atmospheric environmental services. In terms of the National Health Act, Act 61 of 2003 (Act No. 61, 2004), Municipalities are required to appoint a health officer who is required to investigate any state of affairs that may lead to a contravention of Section 24(a) of the Constitution. Section 24(a) states that each person has the right to an environment that is not harmful to their health or well-being.

Local Air Quality By-Laws

Section 156(2) of the Constitution of the Republic of South Africa makes provision for a Local Municipality to make and administer by-laws for the effective administration of the matters which it has the right to administer as long as such by-laws do not conflict with National or Provincial legislation.

The Bushbuckridge LM has not established an air quality by-law. The Department of Environmental Affairs (DEA) has developed a generic air pollution control by-law for Municipalities (Government Notice No. 579, 2010) which deals with most of the air quality management challenges expected in South Africa. The aim of the generic air quality management by-law is to assist Municipalities in the development of their own air quality management by-law within their jurisdictions. Furthermore, use of the generic by-laws as a template will help ensure uniformity across the country when dealing with air quality management challenges.

Temperature

The Bushbuckridge LM is situated in the eastern region of the Mpumalanga Province and therefore experiences typical Lowveld climate conditions which is characterized by hot and humid summers while the winters are cold and dry. The seasonal averages for Bushbuckridge LM were calculated using hourly data from the SAWS weather stations. These averages contain the daily minimum and maximum temperatures.

Precipitation

Daily precipitation amounts for Hoedspruit and Skukuza weather stations as well as seasonal averages were calculated using hourly data from the SAWS Meteorological Stations. The highest recorded rainfall at Hoedspruit weather station occurred during April 2017 and at Skukuza weather station occurred during January 2017 at both weather stations, the season with the highest average daily rainfall and the highest proportion of rainy days is Summer.

Status Quo of the Ambient Air Quality

No ambient air quality monitoring data is available for the Bushbuckridge LM area. The transport network in Bushbuckridge consists of the R40 and the R533 in the west and several smaller roads connecting the rest of the Municipality as well as the Kruger National Park (Figure 11). The R40 connects Hazyview and the South-Eastern parts of Mpumalanga Province to Limpopo Province. Key places the R40 passes through (from South to North) are Marite A, Bushbuckridge, Shatale, Casteel and Rooiboklaagte. The R533 connects Bushbuckridge to Graskop and Pilgrims rest.

Biomass Burning

Bushbuckridge LM is classed as having high to extreme veldfire risk. The vegetation types throughout the Municipality, combined with the climatic conditions, result in the potential for a high number of veld fires to occur. Each open fire, be it a veld fire or burning of garden refuse, adds CO, NO_x, SO₂, non-methane volatile organic compounds (NMVOCs), PM, ammonia (NH₃) and GHG to the atmosphere.

Air pollution in the Bushbuckridge LM is exacerbated in the winter months when the incidences of veld fires (together with the increased use of domestic fuel burning for heating) coincides with an inversion layer (warmer air trapped under a layer of colder air) that prevents the vertical dispersion of pollutants from escaping into the upper atmosphere.

Mining

No major mining activities take place in Bushbuckridge LM. According to SANRAL the only mining activities in the Bushbuckridge LM is stone aggregate sand used in the construction of houses by local people (SANRAL, 2018). There are no companies producing sand or aggregate in Bushbuckridge LM (DME, 2003).

Domestic Fuel Burning

Domestic fuel usage for cooking, heating and lighting comprises a wide range of sources including animal dung, candles, coal, electricity, gas, paraffin, solar power and wood in the Bushbuckridge LM. To quantify emissions from these various fuel sources, the total number of households utilizing each source was determined. Population data per urban area and non-urban areas as a group from the Stats SA Census 2011 was used (Stats SA, 2011). The census data indicates that the total number of households using domestic fuel burning in the Bushbuckridge LM was 15 528 in 2011.

The 2011 census data provides the number of households that utilized each fuel type for cooking, heating and lighting. The three dominant fuels which have quantifiable emissions were paraffin, wood and coal. All other fuels used, except electricity, are consumed in small quantities, thus making their impact relatively insignificant. Households can use one type of fuel for more than one purpose. To avoid overestimation of emissions, it was assumed that the maximum number of households using a specific energy source for either cooking or heating was the actual number of households that used the energy source. The emissions from lighting were regarded as negligible.

For cooking, electricity is the most used domestic energy source used for cooking in 49.6% of the settlements in Bushbuckridge LM. Wood accounts for the other 50.4% of the settlements. For heating, 61.2% of settlements have electricity as the most used energy source, while 37.4% mainly use wood and 0.7% mainly use gas. For lighting, electricity is the most used energy source in 61.2% of settlements in Bushbuckridge, while 37.4% mainly use candles and 0.7% mainly use gas. After electricity, wood is the preferred energy source used for cooking and heating in households in the Bushbuckridge LM and candles are the preferred energy source used for lighting in the Bushbuckridge LM.

Governance

The Department of Economic Development, Planning and Environment is responsible for air quality management functions within Bushbuckridge LM.

As per Schedule 4, Part B, Section 156 of the Constitution, air pollution is an exclusive function of Local Municipalities (Government Notice No. 919, 2013). Air quality functions are, therefore, primarily the responsibility of the Local Government, with support to be provided from Provincial and National Government. Support is provided to Bushbuckridge LM by the Ehlanzeni DM and Mpumalanga Province.

For the Bushbuckridge LM AQMP to be effective, co-operative governance and political buy-in across all spheres of government will be required, as well as the capacity to enforce compliance with new legislation. It is recognized that air quality management and control is primarily a function of District Municipalities. Emission licensing functions are currently undertaken by Ehlanzeni DM. To increase capacity in Local Government, authorities need to invest both time and capital. For Municipalities to fulfil their regulatory role in terms of air quality, dedicated Air Quality Officers and personnel need to be appointed. All newly appointed Air Quality Officers should be sent to undergo relevant training.

Municipalities are also required to undertake monitoring, data analysis and reporting on ambient air quality as per their mandate as air quality authorities. Training on calibration and maintenance of analyzers in the ambient monitoring stations will be required, as well as training on data acquisition and analysis. For this task, technical personnel will need to be appointed. Alternatively, this function needs to be outsourced.

According to legislation (Act No. 39, 2005), Municipalities are required to appoint an Air Quality Officer. Currently, no dedicated Air Quality Officers have been appointed within Bushbuckridge LM, with air quality functions forming part of other Environmental Health Officers' responsibilities.

The Bushbuckridge LM should collaborate with Industry and other Municipalities which are actively involved in air quality matters. Inter-governmental co-operation and co-ordination will support information sharing and dissemination.

Climate Change

World over, the threat of climate change and its impact on livelihoods has become increasingly real and imminent calling for swift attention by policy makers. The debate has now shifted from whether climate change is happening, to how better to manage its impacts and be prepared for it- mitigation and adaptation. Climate change is not weather change (short term e.g., daily) but refers to the long-term changes in the climate (long term, >50years). Increasing temperature and changing rainfall patterns because of the global warming phenomena caused by Greenhouse Gas emissions (GHG), continues to cast a shadow of uncertainty on global economies. Carbon Dioxide equivalent emissions are rising at a rate of approximately 2.5% per annum and left unchecked, this rate may go higher as the population continues to rise and economic activity increases (IPCC, 2014); (World Bank, 2014). It is projected that mean global temperature will increase from 3.7oC to 4.8oC by 2100. Increases in GHG emissions have been attributed to human activity (industrialization, population increase, use of fossil fuels etc.). National and local governments are thus faced with the challenge to ensure that their areas of jurisdiction are informed, equipped, and well prepared to adequately respond to the impacts of climate change.

The latest global climate assessment report (AR5) compiled by the Intergovernmental Panel for Climate Change (IPCC, 2014), indicates with high confidence that there is a growing threat to global food security as a result of changing climatic patterns. The report also highlights variations of impacts across regions thus calling for tailored approaches for mitigation strategies. Floods and draughts in different geographical locations are increasingly becoming the trend due changes in the rainfall patterns and extreme weather events (DEA, 2012). Other manifestations of climate change are wildfires, increasing temperatures and increasing dry periods leading to the subsequent reduction in water availability.

Africa is one of the most vulnerable continents to climate variability because of multiple stresses and low adaptive capacity (Meadows, 2004). Davis (2010) indicates that by 2020 a large portion of Africa's population will be exposed to increased water

stress and yields from rain-fed agriculture could be substantially reduced in certain areas. These impacts will directly affect people's livelihoods as well as their ability to adapt to climate change as the extent of the impact is linked to the local environmental conditions, the general health status of the community and the socio-economic status of the area. People living in informal settlements (which are densely populated, highly dispersed settlements with high concentrations of poverty and limited access to employment and socio-economic services) are the most vulnerable, particularly to extreme events (flooding, drought, severe storms) and health (direct and indirect) impacts (Davis, 2010).

While climate change is a global phenomenon, its impacts are more localized and specific to geographical areas. This puts the onus on governments and local municipalities to spearhead efforts to ensure that their localities are prepared for the impacts of climate change. The White Paper on Climate Change (DEA, 2012) highlights that bottom-up approaches by local authorities provide more detail and deliver solutions to a better degree of confidence. The White Paper further articulates those local authorities are central to building climate resilience in their localities through:

- Human settlements planning
- Urban development
- Providing municipal infrastructure and services.
- Water and energy demand management.
- Local disaster response

Responding to climate change involves, among other things, presenting a tailored adaptation strategy for the local municipality, who are the primary respondents to the needs of their communities (DEA TNC, 2017). Municipalities should then integrate the climate change strategy into their planning tools such as the Integrated Development Plan (IDP), Spatial Development Framework (SDF) and Water Services Development Plan (WSDP) among others.

Role of Government

All spheres of government have a varying degree of roles in the implementation of the NCCR White Paper. The NCCR White Paper indicates that local government plays a crucial role in building climate resilience through planning human settlements and urban development; the provision of municipal infrastructure and services; water and energy demand management; and local disaster response, amongst others. Given this responsibility and the fact that climate change impacts are felt most directly at the local level, there is a great need for proactive efforts to build climate resilience in all municipalities in the country.

The Bushbuckridge LM has developed a **climate change adaptation and mitigation strategy** that help the municipality to identify and respond to current and future Climate Change risks.

Historical climate trends in Bushbuckridge Municipality

Climate data in Bushbuckridge LM is very limited. Some climate data was obtained from ARC-ISCW who have a network of stations throughout South Africa. Many of the stations are old rain gauge stations and only have rainfall data for a limited number of years. To investigate trends, it is more appropriate to have long term data. A few stations with long term rainfall data were selected (Welgevonden-bos 1940-2004; Allandale 1963-2003; Jan Wassenaar Dam 1963-1999). Since none of these stations had data all the way to 2017, station data for the more recently established site at Thulamahashe (data from 2006 to present) was obtained. This station was also the only one that had temperature data.

Figure 11 shows the annual rainfall data from the four selected stations. Long term trends from Jan Wassenaar dam show a small overall positive trend, with annual rainfall slowly increasing over the years. The station at Welgevonden-bos shows a very slight positive trend, while the station at Allandale shows a very slight decline in rainfall. There is annual variability, and these trends are not significant, therefore show little change over this time period. No trend could be determined for Thulamahashe due to the limited time period of the data.

Rainfall peaks between Oct and February, with rainfall being the lowest during May to August. The 10-year average monthly rainfall data shows variation, but no specific trend is evident suggesting that this pattern has not changed significantly over the last 50 years.

Bushbuckridge LM GHG Emissions

There are no GHG emission estimates for Bushbuckridge LM, however an investigation of activities in the region suggests that agriculture, forestry, land use change, transport, energy use and generation are the likely sectors that would contribute to emissions in this region. The Forest Resource Assessment that was recently conducted in Bushbuckridge LM provides the municipality with a unique data set which could be used to determine the land use change and forestry emissions. Due to the uniqueness and detail of this data set, the information could even be used to provide data for the provincial and national inventories. It is therefore highly recommended that this data be utilized to develop a FOLU inventory for the region.

Mpumalanga province has completed a vulnerability assessment (Mpumalanga Climate Change Vulnerability Assessment, 2015) and the Local Government Climate Change Support Programme Inception Report (2016) provides overviews of the

vulnerabilities in each of the Mpumalanga districts. In the Ehlanzeni District where Bushbuckridge LM is located, the vulnerabilities identified were related to agriculture, biodiversity and environment, human health, human settlements, and water.

The Mpumalanga Province Department of Agriculture, Rural development, Land and Environmental Affairs (DARDLEA) has developed adaptation strategies for the province through the Local Government Climate Change Support Program (LGCCSP). Key provincial vulnerable sectors were identified as follows (EDM CCVAR, 2016):

- Agriculture
- Forestry
- Rural/Urban livelihood and settlements
- Terrestrial and aquatic ecosystems
- Tourism
- Water Supply
- Human Health
- Disaster management
- Extractives

CHAPTER 10: ORGANISATIONAL PMS, INTERNAL AUDIT, IDP AND RISK MANAGEMENT

10.1. Organisational PMS

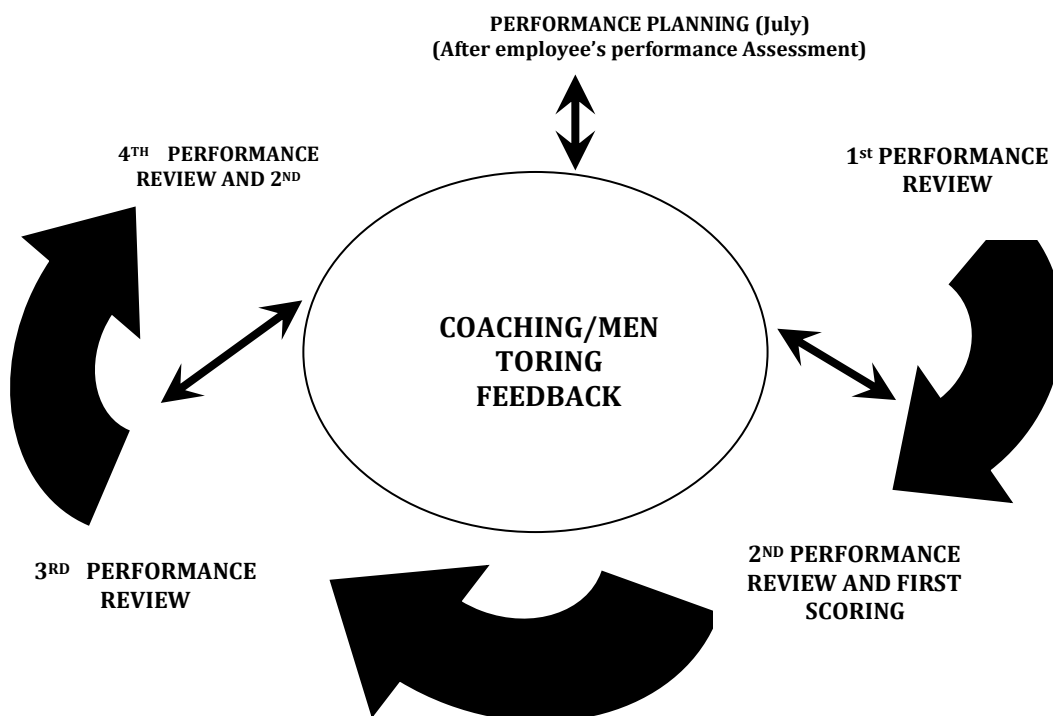

A Performance Management system framework/policy was adopted by June 2013 and review during the Council sitting that was held on the **22 August 2013 (Council resolution no. BLM/02/22/08/13/2013/14)**. This is a milestone towards adequate service delivery with a purpose of providing a system that each employee's individual performance can be measured against the performance of the institution. It is therefore designed to ensure that the Municipality delivers on its mandate as per the municipal Integrated Development Plan (IDP). Currently it is under review and will be adopted by the municipal council before new financial year.

The system is also driven by the following principles:

- Productivity.
- Co-operation.
- Consistency.
- Objectivity.
- Self-enhancement.
- Recognition.
- Development.

Progress review, feedback sessions as well as annual evaluation session take place on the following dates every year. This is in line with the requirements of the MSA of 2000.

Performance Management Cycle

A formal review session is scheduled about half-way through the performance cycle. This session is handled the same way as an Assessment interview. The objective of this review is to update the Performance Plan and adjust any performance expectations that may not be attainable due to external factors beyond the control of the manager or the employee.

10.2. Service Delivery Budget Implementation Plan (SDBIP)

The SDBIP is developed within 14 days of the adoption of the municipal Budget and IDP and signed by the executive Mayor within 28 days. It is mandated to reflect the implementation on the IDP on a yearly basis. The SDBIP is designed to reflect the quarterly projections as a way of monitoring the progress of the implementation of the IDP throughout the year.

10.3. Role players and stakeholders of PMS

10.5. Municipal Performance Report

Quarterly reports are used to monitor the performance throughout the year and they are in line with legislation. In accordance with Section 46 of the Municipal Systems Act, the Municipality prepares for each financial year, an Annual Report aimed at reflecting on the performance of the municipality against its strategic plan which is the IDP as also supported by Municipal Finance Management Act, section 88.

The municipality has adopted its Performance report during Council sitting that was held on the **24 January 2014 (Council resolution no. BLM 63/29/01/2012/13)**

10.6. INTERNAL AUDIT

The internal audit process provides oversight to obtain reasonable assurance regarding management's assertions that objectives outlined in the IDP against Budget and SDBIP are achieved especially for effectiveness and efficiency of operations, reliability of financial information, and compliance with laws and regulations. Internal audit unit proactively partners with management in undertaking financial, compliance, information technology, operational and performance audits, as well as consulting reviews, to maximize value added contributions from the process.

INTERNAL AUDIT MANDATE

The Internal Audit Unit's mandate emanates from Section 165(1) of the Municipal Finance Management Act, No.56 of 2003 (MFMA) which states:

- (1) Each municipality and each municipal entity must have an internal audit unit.
- (2) Internal Audit unit of a municipality or municipal entity must:
 - Prepare a risk-based audit plan and an internal audit program for each financial year;
 - Advise the accounting officer and report to the audit committee on the implementation of the internal audit plan and matters relating to:
 - Internal audit.
 - Internal controls.
 - Accounting procedures and practices.
 - Risk and risk management.
 - Performance management.
 - Loss control; and
 - Compliance with this act, The annual Division of Revenue Act and any other applicable legislation

STRATEGIC APPROACH

A risk based strategic approach is adopted which considers the results of a risk assessment and subsequent discussions with management. This approach involves a focus on understanding the work of each focus area and identifying risks associated with that focus area. It further includes a process of linking risk analysis to assigned planning and audit program development. This approach aligns the priorities of internal audit work with the objectives and goals of the Municipality.

FLEXIBILITY OF APPROACH

Internal Audit develops an internal audit plan to determine the timing of internal audit projects to be undertaken during a financial year. The plan incorporates:

- A three-year strategic rolling Internal Audit plan; and
- An Annual Internal Audit Plan for each financial year.

The approach to the Internal Audit plan is flexible and where necessary the planned approach can be adjusted to take account of any special requests by management. Detailed scope and timing of the work and the focus of planned internal audit projects can be amended and/ or the projects removed from the plan to take account of special requests.

Risk areas identified and not audited in year one will be taken over to year two and the audit plan adjusted accordingly. Any amendments to the plan would be subject to approval of the Audit Committee and the Accounting Officer.

INTERNAL AUDIT OPERATIONAL PLAN

Definition of the various Internal Audit Reviews

In planning and executing the internal audit plan, the various risks identified are reviewed through various approaches. Set out below are the various reviews that Internal Audit conducts for each financial year. The detailed Internal Audit plan is made up of all these types of reviews. All various internal audit projects in the detailed plan fall under these type of reviews. These reviews are undertaken to address various risks identified.

Table:

Type of Review	Main Objective
Financial Review	Validation of internal controls to facilitate the integrity and reliability of financial information and safeguarding of assets.
Compliance Review	To verify the level of compliance with policies, procedures, standards and relevant legislation.
Operational Review	To review the activities in relation to the adherence to or achievement of the relevant control and business objectives.

Type of Review	Main Objective
Pre-determined objective Review	The review of the adequacy and effectiveness of the application of generally accepted management principles in achieving the desired objectives of the municipality. To ensure the completeness, accuracy, validity and timely reporting of the entity performance achievements against the KPI and strategic plan.
Governance Review	To review and evaluate the adherence to corporate governance practices and principles.
Follow up Reviews	To determine the progress made by management with the implementation of the action plans agreed upon with the internal audit activity.
Annual Financial Statements Review	Review of the Municipality's Annual Financial Statements

INTERFACE WITH THE AUDIT COMMITTEE

Internal Audit operates and reports functionally to an Audit Committee established in terms of Section of the Municipal Finance Management Act, No.56 of 2003 (MFMA). The Committee is established to advise municipal council, the political office-bearers, the accounting officer, and the management staff of the municipality on various matters including internal financial control and internal audit.

To ensure its effectiveness, the Committee yearly adopts a Charter which sets out its fundamental roles and responsibilities. The Charter gets approved by council and the Committee discharges its responsibilities as per the Charter and the requirement of Sec 166 of the Municipal Finance Management Act (MFMA). The Audit Committee (the Committee) consisted of five (5) members. The same members also constituted the Performance Audit Committee.

Members of the Audit committee are:

- J Ngobeni- Chairperson
- Adv. G Khoza
- P Ntuli
- P Mokgope

Internal Audit also has a responsibility to report to the Committee at least once in every quarter of the financial year on matters relating to the execution of the audit plan, status of internal controls, risk and risk management, performance management, governance processes and compliance with various legislation.

10.7. Auditor General's Report and the Action Plan

In the opinion of the Auditor General, the Municipality received a **unqualified report** for the 2020/21 financial year. The report has found gaps on the following: Restatement of corresponding figures, material losses, material impairment, etc.

Value-added tax (VAT) receivable	A system will be developed to ensure that the person who prepares the return is the one who submits it in order to encourage monitoring and compliance to submission dates
Payables from exchange transactions	Improvement of records keeping and reconciliation of payments document and bank statements Manager expenditure and CFO
Revenue- fines and penalties	The Revenue manager and traffic unit will do traffic fines reconciliation The correct GRAP principle will be used Revenue Manager and Chief Traffic Officer
Contracted services	Improvement of records keeping and reconciliation of payments document and bank statements Manager expenditure and CFO

Action Plan Schedule

MM	5	0	5
Total findings	138	11	127

CHAPTER 11: FINANCIAL VIABILITY

11.1. Financial Viability

In terms of the Section 26 (h) of Municipal Systems Act, 32 of 2000, municipalities must ensure that a financial plan which must include a budget projection for at least the next three financial years. This plan must be in line with the Municipal Finance Management Act, 56 of 2003 and treasury regulations in terms of policies and guidelines and procedures to be followed. Bushbuckridge Local Municipality has developed its Financial Plan in 2015 which amongst other things include the following:

- Policy guidelines,
The following policies have been approved by council:
 - Budget policy
 - Virement policy
 - Asset management policy
 - Cash and investment policy
 - Supply chain management
 - Credit Control and Debt collection policy
 - Property rates policy and by laws
 - Cash and investment policy
- Revenue enhancement strategies,
- Financial risk and metrics,
- Cost recovery strategies and access to capital

The plan further identifies challenges facing municipalities with respect to financial planning and complying with all the acceptable and applicable standards e.g., GRAP 17. The municipality further identifies strategic long-range solutions which will ensure that municipal performance improves accountability and the adequate usage of taxpayer's money. This is for the third time and surely indicates the increased proper financial governance and application of internal risks control measures. The plan also alludes in brief the SCM and how it can be customized such that it benefits local people that are emerging SMMEs and Cooperatives. There is a strong link with LED initiatives as the finance department keeps records of jobs created and the companies appointed for execution.

Financial viability and management

The Municipality has for some-time now, adhered to the regulatory requirements in terms of the MFMA to ensure that it maintains effective, efficient, and transparent systems of financial and risk management and internal control. However, Financial Viability remains a challenge as the municipality has not, to manage thus far to implement the revenue enhancement strategies.

The Municipality further prepares its financial statements on the entity-specific basis of accounting, as set out in accounting policy note 1. Bushbuckridge Local Municipality submits its Financial Statements to the Auditor General in line with **Section 126 of the MFMA** for auditing and compliance purposes. There is a need to develop effective billing and debt collection mechanisms and income generating strategies.

Asset Register

The Municipality has developed comprehensive assets register for both fixed and movable assets to be considered by Council during Council. This is an attempt to adhere to regulatory framework after the Auditor General's report for the **2018/19** financial year having raised the matter as a going concern for the municipality. Bushbuckridge Local Municipality owns Assets worth over **R3, 9 billion** and with 8% amounting to nearly **R 320 million**, compliance with the 8% norm is an impossible to achieve now.

The municipality's assets are summarized as below with an abridged infrastructure Fixed Assets register in the format prescribed in the circular hereto attached as an annexure.

Class of Assets	Cost	Accumulated Depreciation	Carrying Amount
TOTAL	R3,970,189,004.55	R489,238,245.72	R3,480,950,758.83
Land	R171,960,982.50	-	R171,960,982.50
Building Assets	R77,952,546.75	R30,535,874.93	R47,416,671.82
Community Assets	R190,603,895.19	R64,928,624.47	R125,675,270.72
Infrastructure Assets	R3,529,671,580.11	R393,773,746.32	R3,135,897,833.79

Tariff Policy

The Municipality has developed a Tariff Policy in line with the provisions of Section 74 of MSA no. 32 of 2000. The Policy is aimed at promoting uniformity and fairness to the communities and shall as far as possible attempt to recover expenses associated with the rendering of basic services to the communities

11.2. Supply Chain Management

That the municipality's supply chain management policy is implemented in a way that is fair, equitable, transparent, competitive, and cost-effective: and that all financial accounts of the municipality are closed at the end of each month and reconciled with its records.

The municipality's Supply Chain Management (SCM) Policy seeks to promote an innovative form of targeted procurement, which will encourage socio-economic transformation within municipality.

Functions of the SCM Unit

- To manage and administer the acquisition/procurement of goods and services for the Municipality.
- To manage the tender processes of the Municipality.
- Manages the Municipality's suppliers'/ service provider database.
- Manages possible procurement risks and manages the disposal of municipal goods no longer needed.
- Manages the contracts of the Municipality.
- Ensure compliance to all legislation relating to SCM.
- Develops procurement plans aligned to the budget (Demand Management).

Challenges

- There is a high rate of procurement deviations.
- Then Decentralized procurement system below R30 000 results in weak procurement controls.
- More detailed monitoring of service provider performance is required due to the high level of terminations of suppliers.
- There is overpricing of certain commodities and this needs to be controlled.
- Procurement planning can be improved substantially.
- Supplier development is not structured which leads to SMME's not being sustainable.
- Utilization of service providers that do not appear on the database.
- A manual and paper-based system of procurement increases the risk of fraud and corruption for procurement below R30 000.
- The risk of irregular expenditure is increased when procurement is decentralized.

Supply Chain Committees

The supply chain committees were established according to the Supply Chain regulation of 2005 which states that all municipalities must establish supply chain committees to deal with procurement process of the supply chain units. The municipality has established 3 committees: **Specifications committee, Evaluation committee and the Adjudication committee**. The members that sit in the committees are selected by the Municipal Manager and are requested to sign a memorandum of agreement which binds them for a specified period which normally a period of six months.

11.3. Revenue Management

This unit ensures the collection of revenue and the billing of consumers. BLM is expected to generate and collect revenue optimally from all possible revenue sources to sustain the activities of the municipality and ensuring service delivery to the community.

Revenue management – the key functions of revenue management:

Billing - to ensure that all consumers are billed accordingly, and the billing statements are correct.

Data management – to ensure the integrity of the billing information on the system is accurate and complete

Debtors' management-

Credit control- to ensure that all debt owed to BLM is collected, and consumers not affording to service their debts are then registered for the indigent subsidy.

Cash management and reconciliation – to ensure that all monies received for services rendered are correctly matched and deposited into BLM's primary bank account and ensure compliance of MFMA Circular 50 of 2009.

Challenges

Link between property owner and property occupier

The approved BLM Credit Control and Debt Collection Policy, specifies that the property owner is responsible for all municipal services, hence it is only the property owner who can open a municipal account.

Indigent Registration

The municipality was declared a nodal meaning it is a rural municipality which has high rates of unemployment. Poverty rates are resulting in high number of indigents. The municipality subsidizes indigents on water, electricity and assist in funerals. The municipality has an indigent register that has been approved by council. BLM is struggling to measure consumption on free basic services and water distribution losses accurately. The balance between cost recovery to ensure financial viability of the municipality and affordability on the part of the consumer remains a challenge.

What actions have been taken to better this situation?

- a. Link between property owner and property occupier
 - The Credit Control and Debt Collection Policy has been reviewed
- b. Indigent Registration
 - The ongoing indigent registration campaign aims to assist BLM in ensuring that qualifying indigents within the municipality who cannot afford to pay for services are registered as indigents for them to gain access to the indigent subsidies
 - The Indigent Policy has been reviewed, increasing indigent's household threshold income to three times the government social grant excluding child support grant.

The following initiatives have been undertaken to improve collection rates:

- Billing all billable consumers and issuing monthly statements
- Implementation of the credit control policy
- Engaging an external debt collector to assist with collections for domestic and business consumers
- By laws have been developed and adopted by Council. The enforcement of these bylaws remains a challenge.

11.4. Budget and Treasury Office (BTO)

Legislation

Chapter 4 of the Municipal Finance Management Act No. 56 of 2003, Section 16 (1) states:

- 1) The council of a municipality must for each financial year approve an annual budget for the municipality before the start of that financial year.
- 2) The Mayor of the Municipality must table the annual budget at least 90 days before the start of the budget year.

Budget Unit Responsibilities

The Budget Unit is responsible for preparing the Annual Budget, Adjustment Budget, the unit is also responsible for S72 reporting which entails reporting on the Mid-Year budget and performance assessment during the first half of the financial year. S71 reports entails monthly and quarterly reporting on implementation of the approved annual budget. Budgeting and monthly financial reporting on externally funded and internally funded projects.

Core Functions of the Budget Unit

- To prepare the Annual Budget
- To prepare the Adjustment Budget
- To prepare the Mid-Year budget and performance assessment
- To develop and update Budget Policy in line with the applicable Treasury regulations
- To assist departments in formulating departmental budgets
- Monthly monitoring of the budget by producing monthly budget versus expenditure report
- To prepare Annual Budget Returns for submission to Treasury
- To submit monthly VAT returns for the institution to SARS
- MSCOA

Key Stakeholders

The Budget unit provides reports to departments relating to expenditure, they are required to scrutinize and correct any misallocations on the reports. The unit is also responsible for sending expenditure reports to National and Provincial Treasury as well as VAT returns to SARS.

11.5. Annual Financial Statements

The accounting and reporting function is responsible for financial reporting monthly, quarterly and annually as well as the coordinating of all reconciliation functions and journal adjustments. The maintenance of the audit file and the compilation of the Annual Financial Statements is part of this function.

Functions of the Accounting and Reporting Unit:

- To maintain accounting records in support of financial reports
- To develop and update accounting policies in line with the applicable reporting framework
- To prepare annual financial statements and consolidated annual financial statements in accordance with the applicable financial reporting framework for each year end
- To facilitate the preparation of the audit file supporting the annual financial statements

11.6. Asset Management

Asset Management refers to all activities and processes carried out during the cycle of acquisition or construction, maintenance, renewal or refurbishment and disposal of all resources consumed during the provision of services by the municipality to the communities or customers. These resources are consumed on the basis that there is future economic benefit derived from their consumption or their utilization results in economic benefit for the municipality.

These resources range from the water and sanitation infrastructure network used to deliver water and sanitation services to households, vehicles used by personnel to maintain the network, tools utilized in the maintenance of the network, equipment used by field and office staff during the delivery of services, furniture used by staff in support of the services to the communities, materials consumed during the construction of service facilities and work in progress in service infrastructure projects.

Capital Assets are classified into the following categories for financial reporting purposes:

1. **Property, Plant and Equipment** (GRAP 17)
 - Land and Buildings (land and buildings not held as investment)
 - Infrastructure Assets (immovable assets that are used to provide basic services)
 - Community Assets (resources contributing to the general well-being of the community)
 - Housing Assets (rental stock or housing stock not held for capital gain)
 - Heritage Assets (culturally significant resources)
 - Other Assets (ordinary operational resources)
2. **Intangible Assets** (GRAP 102) - Intangible Assets (assets without physical substance held for ordinary operational resources)
3. **Investment Property** (GRAP 16)- Investment Assets (resources held for capital or operational gain)
4. **Assets classified as Held-for-Sale** (GRAP 100) - Assets Held-for-Sale (assets identified to be sold in the next 12 months and reclassified as Inventory).
